Contents

I Introduction ..... I - 1

1.1 Hemostasis and coagulation: Protective mechanisms in innate immunity ..... I - 3

1.2 The balance of pro- and anticoagulant factors contributes to hemostasis ..... I - 5

1.3 Diagnostic tools to assess hemostasis and blood coagulation ..... I - 7

1.3.1 Blood and platelet tests ..... I - 7

1.3.2 Coagulation tests ..... I - 9

1.4 References ..... I - 12

II Primary stages of hemostasis: Platelet reactions and responses..... II - 1

2.1 Overview..... II - 3

2.2 Endothelium and vascular homeostasis..... II - 5

2.3 Endothelium, innate immunity and inflammation ..... II - 7

2.4 Platelets and their functions ..... II - 9

2.5 Platelet-dependent responses in the primary phase of hemostasis ..... II - 11

2.5.1 Platelet adhesion, von Willebrand factor and ADAMTS13 ..... II - 13

2.5.2 Platelet aggregation and platelet membrane glycoproteins ..... II - 15

2.5.3 Platelet degranulation and membrane flip-flop ..... II - 17

2.5.4 Platelet–blood cell conjugates and composition of thrombi ..... II - 19

2.6 Platelet inhibitors and antithrombotic drugs ..... II - 21

2.7 Platelet disorders and bleeding complications..... II - 21

2.8 References ..... II - 22

III Advanced stages of hemostasis: Blood coagulation and wound closure..... III - 1

3.1 Overview and principles ..... III - 3

3.1.1 The three axes of thrombin Generation and control ..... III - 3

3.1.2 Dynamic reactions in coagulation: Thrombin generation and control ..... III - 5

3.1.3 Human coagulation factors and their deficiencies (procoagulant proteins)..... III - 7

3.1.4 Multicomponent enzyme complexes in blood coagulation and fibrinolysis..... III - 9

3.2 Vitamin K-dependent coagulation factors ..... III - 11

3.2.1 Overview and principles..... III - 11

3.2.2 Vitamin K-dependent carboxylation of coagulation factors ..... III - 13

3.2.3 Factor VII/VIIa ..... III - 14

3.2.4 Factor IX/IXa..... III - 14

3.2.5 Factor X/Xa ..... III - 15

3.2.6 Factor II/IIa (prothrombin/thrombin)..... III - 17

3.2.7 Thrombin: A multifunctional protease..... III - 19

3.2.8 Multiple activities of thrombin ..... III - 21

3.2.9 Natural thrombin inhibitors..... III - 23

3.3 Regulatory cofactors of blood coagulation..... III - 25

3.3.1 Tissue factor..... III - 25

3.3.2 Activation of tissue factor by protein disulfide isomerase ..... III - 25

3.3.3 Factor VIII ..... III - 27

3.3.4 Factor V ..... III - 27

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.4 Initiation phase of blood coagulation (the extrinsic pathway): Tissue factor pathways ..... III - 29
3.4.1 Neutrophil extracellular traps and intravascular tissue factor pathway ..... III - 31
3.4.2 DNase as antithrombotic regimen ..... III - 31
3.5 Amplification, propagation and production of thrombin (the intrinsic pathway) ..... III - 33
3.5.1 Activation of factors XI and IX ..... III - 33
3.6 Contact phase proteins (kallikrein-kinin system) and their deficiencies ..... III - 34
3.6.1 Factor XII ..... III - 35
3.6.2 High-molecular-weight kininogen ..... III - 35
3.6.3 Prekallikrein ..... III - 35
3.6.4 Activation of the contact phase system: *In vitro* versus *in vivo* conditions ..... III - 37
3.6.5 Natural cofactors of the contact phase system ..... III - 37
3.6.6 Multiple functions of high-molecular-weight kininogen ..... III - 39
3.7 Fibrin formation and stabilization ..... III - 41
3.7.1 Fibrinogen and fibrin ..... III - 41
3.7.2 Transglutaminase factor XIIIa, fibrin stabilization, and wound healing ..... III - 43
3.8 References ..... III - 44

IV Natural anticoagulant and regulatory pathways ..... IV - 1
4.1 Overview ..... IV - 2
4.1.1 Human anticoagulant factors of the thrombomodulin–protein C pathway and their deficiencies ..... IV - 3
4.2 Thrombomodulin–protein C pathway ..... IV - 3
4.2.1 Thrombomodulin as anticoagulant cofactor ..... IV - 3
4.2.2 Endothelial cell protein C receptor ..... IV - 5
4.2.3 Protein C ..... IV - 5
4.2.4 Protein S ..... IV - 5
4.3 Coagulation inhibitors and their deficiencies ..... IV - 6
4.3.1 Overview ..... IV - 6
4.3.2 Protein Z-dependent inhibitor, protein Z ..... IV - 7
4.3.3 Antithrombin and heparins ..... IV - 9
4.3.4 Heparin cofactor II ..... IV - 10
4.3.5 C1-esterase inhibitor ..... IV - 10
4.3.6 α1-proteinase inhibitor (α1-antitrypsin) ..... IV - 10
4.3.7 Protein C inhibitor ..... IV - 11
4.3.8 α2-macroglobulin ..... IV - 11
4.3.9 Tissue factor pathway inhibitor ..... IV - 13
4.4 Direct inhibitors of coagulation ..... IV - 15
4.4.1 Oral anticoagulants against thrombin and factor Xa ..... IV - 15
4.4.2 Hirudin and derivatives ..... IV - 15
4.5 Targets of natural anticoagulation ..... IV - 16
4.6 Hereditary deficiencies of coagulation proteins as risk factors for thrombosis ..... IV - 17
4.7 References ..... IV - 18

V Fibrinolysis and cellular proteolysis..... V - 1
5.1 Overview..... V - 2
5.2 Factors, cofactors, inhibitors of fibrinolysis, pericellular proteolysis and their deficiencies.... V - 3
5.2.1 Plasminogen, plasmin, angiostatin..... V - 5
5.2.2 Tissue-type plasminogen activator ..... V - 5
5.2.3 Fibrin D-dimer as biomarker of thrombosis/thrombolysis..... V - 6
5.2.4 Urinary-type plasminogen activator (urokinase) ..... V - 7
5.2.5 Plasminogen activator inhibitor-1..... V - 7
5.2.6 Plasminogen activator inhibitor-2..... V - 8
5.2.7 Protein C inhibitor ..... V - 8
5.2.8 Protease nexin-1..... V - 8
5.2.9 α2-plasmin inhibitor/α2-antiplasmin..... V - 9
5.2.10 Thrombin-activatable fibrinolysis inhibitor ..... V - 9
5.3 Initiation and regulation of fibrinolysis/ thrombolysis ..... V - 10
5.3.1 Activation of fibrinolysis ..... V - 11
5.3.2 Kinetics and control of fibrinolysis..... V - 11
5.4 Plasmin-dependent pericellular proteolysis and cell motility..... V - 13
5.4.1 Plasminogen receptors..... V - 13
5.4.2 Multiple functions of the urokinase receptor..... V - 13
5.5 References ..... V - 14

VI Protease receptors and their ligands in hemostasis, coagulation and beyond..... VI - 1
6.1 Protease-activated receptors.....VI - 3
6.2 Genetic manipulation of protease receptors, hemostatic and coagulation factors.....VI - 5
6.3 References .....VI - 6

VII References ..... VII - 1

VIII Abbreviations ..... VIII - 1

IX List of figures..... IX - 1

X Links ..... X - 1
