Contents

I Economics 7

1.1 Economic development and policy 9
1.2 Knowledge, innovation and adaptation 17
1.3 Small-scale farming and value chains 39
1.4 Climate change, food and agriculture (GTZ) 45
1.5 High-value supply chains and contract farming 51
1.6 Agricultural markets, transaction costs and rural finance 65
1.7 Resource allocation and household welfare 81
1.8 Food security, food prices and institutional analysis tools 89
1.9 Economic development and policy: case studies and others 99

II Plant systems 111

2.1 Integrated pest management 113
2.2 Abiotic stresses - characterisation, effects and management concepts 131
2.3 Cropping systems 137
2.4 Organic matter, microorganisms and organic farming principles 143
2.5 Post harvest technology and quality - a neglected relation 149
2.6 Crop quality 165
2.7 Genetic resources 185
2.8 Forage production and plant pollution 201
2.9 Abiotic stresses: drought, salinity, nutrients and fertiliser 213
2.10 Composts, organic substrates and (bio)fertilisers 233
2.11 Organic farming: theory and practise 245
2.12 Biocontrol and natural enemies 259
2.13 Biopesticides, mycorrhiza and others 277
2.14 Weeds and invasive plants 291
2.15 Cropping systems: resource use and technologies 305

III Animal sciences 327

3.1 Animal nutrition 329
3.2 Livestock production systems 335
3.3 Aquaculture, fisheries and basic research in animal science 341
3.4 New approaches in animal husbandry 355
3.5 Carcass and meat quality of farmed animals 367

Bibliografische Informationen
http://d-nb.info/990883981

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.6 Livestock systems: health, breeding and feeding 379
3.7 Livestock systems: dairy and meat production 391
3.8 Livestock systems: production and development 403
3.9 Animal nutrition: ruminants 417
3.10 Animal nutrition: monogastrics 435

IV Natural resources 455

4.1 New perspectives for sustainable forest management 457
4.2 Non-timber forest products and agroforestry 463
4.3 Water, soil and crop management 469
4.4 Soil fertility management 489
4.5 Soil fertility management: impacts on soil and vegetation 495
4.6 Agroforestry: management and impact 513
4.7 Cultural and socioeconomic aspects of forest management 529
4.8 Ecology and genetics of tropical forests 539
4.9 Ecology of Mexican forests 553

V Social resources 563

5.1 Biofuel vs. food and bioenergy crops 565
5.2 The multidimensionality of participatory development 579
5.3 Land use and biodiversity conservation 585
5.4 Rural development 601
5.5 Rural development and food security 607
5.6 The role of forests in conserving natural resources 621
5.7 Farmers' perceptions, participation and adoption 635
