|-------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>Morphology of Filamentous Fungi: Linking Cellular Biology to Process Engineering Using <i>Aspergillus niger</i></b> .....  | 1   |
| Rainer Krull, Christiana Cordes, Harald Horn, Ingo Kampen, Arno Kwade, Thomas R. Neu, and Bernd Nörtemann                     |     |
| <b>Multi-Scale Spatio-Temporal Modeling: Lifelines of Microorganisms in Bioreactors and Tracking Molecules in Cells</b> ..... | 23  |
| Alexei Lapin, Michael Klann, and Matthias Reuss                                                                               |     |
| <b>Impact of Profiling Technologies in the Understanding of Recombinant Protein Production</b> .....                          | 45  |
| Chandran Vijayendran and Erwin Flaschel                                                                                       |     |
| <b>Engineering the <i>Escherichia coli</i> Fermentative Metabolism</b> .....                                                  | 71  |
| M. Orencio-Trejo, J. Utrilla, M.T. Fernández-Sandoval, G. Huerta-Beristain, G. Gosset, and A. Martinez                        |     |
| <b>Modeling Languages for Biochemical Network Simulation: Reaction vs Equation Based Approaches</b> .....                     | 109 |
| Wolfgang Wiechert, Stephan Noack, and Atya Elsheikh                                                                           |     |
| <b>Impact of Thermodynamic Principles in Systems Biology</b> .....                                                            | 139 |
| J.J. Heijnen                                                                                                                  |     |
| <b>Index</b> .....                                                                                                            | 163 |
