Table of Contents

Wireless Systems of Threats Monitoring ........................................... 1
Slawomir J. Ambroziak, Ryszard J. Katulski,
Jarosław Sadowski, and Jacek Stefański

Monitoring of Live Traffic Information in the Czech Republic .......... 9
Petr Bures and Jan Vlčinsky

Managing Uncertainty in Maritime Applications .......................... 17
Włodzimierz Filipowicz

Safety Driving Assessment Based on Video Image Sequence Analysis ... 28
Toyohiro Hayashi, Kentaro Oda, Tomohito Wada, and
Shuichi Enokida

The ITS Master Plan of the German Federal State of Saxony-Anhalt ... 39
Susanne Jenkner and Andreas Herrmann

Risk Analysis as a Basic Method of Safety Transmission System
Certification ......................................................... 47
Andrzej Lewiński, Andrzej Toruń, and Tomasz Perzyński

The Possibility of Using Telematics in Urban Transportation .......... 54
Jerzy Mikulski

Value of Networking in Transport Policy Related to the Road Safety ... 70
Miroslava Mikušová

Cloud Drive: A Computing Architecture for a Scalable Driving Safety
Management System ................................................ 78
Kentaro Oda, Toyohiro Hayashi, Shinobu Izumi,
Tomohito Wada, and Shuichi Enokida

Travel Behaviour and Alternative Modes of Transportation ............ 86
Grzegorz Sierpiński

Evolving ITS Architecture – The Czech Experience ...................... 94
Zuzana Belinova, Petr Bures, and David Barta

An Intelligent Approach to Wear of Piston-Cylinder Assembly
Diagnosis Based on Entropy of Wavelet Packet and Probabilistic Neural
Networks .......................................................... 102
Piotr Czech
Diagnosing of Disturbances in the Ignition System by Vibroacoustic
Signals and Radial Basis Function – Preliminary Research .................. 110
  Piotr Czech

Petri Net-Based Functional Representation of a Level Crossing ............ 118
  Zuzana Lobotková and Aleš Janota

Mathematical Apparatus for Safety Evaluation of Cryptography and
Safety Codes Used in Safety – Related Communication System ............ 126
  Mária Franeková

A Modular Weather and Traffic Data Acquisition Network to Improve
Green Traffic Management .................................................... 136
  Andreas Herrmann and Ulrike Hempel

The Advantages of the Use of Cloud Computing in Intelligent Transport
Systems ................................................................. 143
  Jolanta Joszczuk-Januszewska

Development of the IMO e-Navigation Concept – Common Maritime
Data Structure ............................................................... 151
  Adam Weintrit

Analysis of Intelligent Transport Systems (ITS) in Public Transport of
Upper Silesia ........................................................................ 164
  Jakub Młyniczak

Vehicle Tracking Using the High Dynamic Range Technology ............ 172
  Krzysztof Okarma and Przemysław Mazurek

Problem of Railway Traffic Control Devices Disruption ..................... 180
  Andrzej Białoń

Implementation of DYSONAPP System as a Method of Increasing
Traffic Safety on Rail-Road Level and Pedestrian Crossings .............. 192
  Wojciech Dinges

Architecture and Basic Assumptions of RSMAD ................................. 200
  Sławomir Gajewski, Małgorzata Gajewska, and Marcin Sokol

The Significance of ITS Applications for the New Mobility Culture in
the Cities .............................................................................. 206
  Ryszard Janecki and Stanisław Krawiec

Effect of Aggressive Driving on Formation of Congestion .................. 218
  Alica Kalasová and Zuzana Krchová

Effect of Fractional Orders in Differential Equation Describing Damping
in the Measuring Transducer ............................................... 226
  Mirosław Luft, Elżbieta Szychta, Radosław Cioć, and
  Daniel Pietruszczak
Perspectives of Telematics Implementation in Tri-city Transport Systems Management and Planning ........................................... 233
  Jacek Oskarbski

Analysis of the Suitability of Selected Data Transmission Systems in RSMAD .................................................. 241
  Marcin Sokol, Stawomir Gajewski, and Malgorzata Gajewska

Applying Military Telematic Solutions for Logistics Purposes ............. 248
  Andrzej Bujak, Miroslaw Smolarek, and Alicja Gębczyńska

Experiences with Video-Based Incident Detection and Parking Space Surveillance Systems on Motorways in the Free State of Saxony ............. 257
  Klaus-Peter Döge

Intelligent Transportation Systems in Transportation Policy of the Cities .............................................. 265
  Ryszard Janecki

Transportation Systems Modelling as Planning, Organisation and Management for Solutions Created with ITS .................... 277
  Grzegorz Karoń and Jerzy Mikulski

The Influence of Motorcycling and Cycling on Small One-Lane Roundabouts Capacity ........................................ 291
  Elżbieta Macioszek

Responsibilities of Airport Management in a Crisis Situation - Information Flow .............................................. 299
  Piotr Uchoński

Personalised Passenger Notification in the Case of Incidents .............. 306
  Sebastian Naumann and Franziska Wolf

Reliability Analysis of Power Supply Systems for Devices Used in Transport Telematic Systems .................................. 314
  Miroslaw Siergiejczyk and Adam Rosiński

LPV Flight Trials in Poland ............................................. 320
  Andrzej Fellner

Technical Devices Cooperation to Obtain Data for 3D Environment Modelling ............................................. 330
  Ján Halgaš and Aleš Janota

Satellite Navigation Systems, Data Messages, Data Transfer and Formats .............................................. 338
  Jacek Januszewski
