

Content

| | | |
|----------|---|-----------|
| 1 | Introduction | 1 |
| 1.1 | Issue | 1 |
| 1.2 | Thesis objectives | 3 |
| 1.3 | Procedure | 4 |
| 2 | Design and development of the research concept | 7 |
| 2.1 | Economic principles of crop production adjustments | 7 |
| 2.1.1 | Production theory | 7 |
| 2.1.2 | Production uncertainty and risk | 10 |
| 2.2 | <i>agri benchmark</i> Cash Crop – A scientific network to provide results and information about international agriculture | 12 |
| 2.2.1 | Development | 12 |
| 2.2.2 | Concept of “typical farms” and panel approach | 13 |
| 2.2.3 | Perspectives | 16 |
| 2.3 | Advancement of <i>agri benchmark</i> methodology for analysing farm level implications | 17 |
| 2.3.1 | Literature review of empirical methods involving groups | 17 |
| 2.3.2 | Focus groups | 19 |
| 2.3.2.1 | Introduction and characteristics | 19 |
| 2.3.2.2 | Sequence of investigations with focus groups | 24 |
| 2.3.2.3 | Special forms of focus groups | 39 |
| 2.3.2.4 | Summary | 41 |
| 2.4 | Consolidation of the research design | 41 |
| 2.4.1 | Course of investigation | 41 |
| 2.4.2 | The single farm calculation tool TYPICROP | 46 |
| 2.4.2.1 | Model requirements | 47 |
| 2.4.2.2 | Model configurations | 47 |
| 2.4.2.3 | Calculation principles | 52 |
| 2.4.3 | Scenario derivation for input and output prices | 64 |
| 2.4.3.1 | Underlying concepts | 64 |
| 2.4.3.2 | Approach and calculation of commodity prices | 65 |
| 2.4.3.3 | Derivation of farm gate prices | 69 |
| 3 | Overview and framework conditions for cash crop production in Germany and Australia | 75 |
| 3.1 | Production output and export of arable commodities | 76 |
| 3.2 | Regional production structures | 81 |
| 3.2.1 | Germany | 82 |

| | | |
|----------|---|------------|
| 3.2.2 | Australia | 85 |
| 3.2.3 | Selected regions and intensity levels of production | 91 |
| 3.3 | Natural conditions and limiting factors to production in the selected regions | 94 |
| 3.3.1 | Soil and climate | 94 |
| 3.3.1.1 | Magdeburger Börde in Germany | 94 |
| 3.3.1.2 | South Coast of Western Australia | 95 |
| 3.3.1.3 | Wheatbelt of Western Australia | 97 |
| 3.3.1.4 | Central West New South Wales, Australia | 98 |
| 3.3.2 | Estimation of production uncertainty | 99 |
| 3.3.2.1 | Precipitation trends | 100 |
| 3.3.2.2 | Soil conditions | 102 |
| 3.3.2.3 | Summary | 103 |
| 4 | Analysis and assessment of adaptation strategies for selected regions in Germany and Australia | 105 |
| 4.1 | Comparison and assessment of the initial configuration of typical farms | 105 |
| 4.1.1 | Farm and land | 105 |
| 4.1.2 | Labour | 109 |
| 4.1.3 | Machinery, key operations and production management | 115 |
| 4.1.3.1 | Tractors | 116 |
| 4.1.3.2 | Towed machinery | 119 |
| 4.1.3.3 | Self-propelled machinery | 126 |
| 4.1.3.4 | Comparison of machinery configurations between farms | 128 |
| 4.1.4 | Buildings | 130 |
| 4.1.5 | Capital structure of fixed assets | 135 |
| 4.2 | The German typical farm in the Magdeburger Börde | 137 |
| 4.2.1 | Status quo crop portfolio and production system | 137 |
| 4.2.2 | Profitability analysis and production cost | 152 |
| 4.2.3 | Analysis and assessment of adaptation strategies | 157 |
| 4.3 | The West Australian typical farm on the South Coast | 167 |
| 4.3.1 | Status quo crop portfolio and production system | 167 |
| 4.3.2 | Profitability analysis and production cost | 175 |
| 4.3.3 | Analysis and assessment of adaptation strategies | 180 |
| 4.4 | The West Australian typical farm in the Wheatbelt | 188 |
| 4.4.1 | Cropping portfolio and type of production system | 188 |
| 4.4.2 | Profitability analysis and production cost | 200 |
| 4.4.3 | Analysis and assessment of adaptation strategies | 206 |
| 4.5 | The typical farm in Central West New South Wales | 215 |
| 4.5.1 | Cropping portfolio and type of production system | 215 |
| 4.5.2 | Profitability analysis and production cost | 226 |
| 4.5.3 | Analysis and assessment of adaptation strategies | 233 |

| | | |
|----------|---|---------------|
| 5 | Conclusions | 241 |
| 5.1 | Farm level implications of high commodity prices | 241 |
| 5.1.1 | Production systems | 241 |
| 5.1.2 | Adaptation strategies and potentials | 243 |
| 5.1.3 | Conclusions | 250 |
| 5.2 | Application of focus groups to panel discussions with farmers | 251 |
| 5.2.1 | Assessment of focus group methodology | 252 |
| 5.2.2 | Conclusions for an application in a global network | 256 |
| 5.3 | Application of the calculation tool TYPICROP | 257 |
| 6 | Summary | 259 |
