---------	---	----

## **Chapter 2: Working time and unemployment.....43**

*The course of argumentation can also be pursued without the parts written in italics.*

Abstract.....	43
1. Arguments for a new perspective.....	44
2. Labour supply and demand .....	48
3. Production, consumption and unemployment.....	52
4. <i>Unemployment rate</i> .....	57
5. Unemployment.....	69
6. <i>Unemployment rate and national income</i> <i>(A relation as Okun's law for the long term)</i> .....	71
7. Paths to full employment.....	72
8: Conclusions for economic development .....	76
References.....	78
Acknowledgements.....	82
Figure 1 Utility of all households in relation to working time.....	49
Figure 2 Supply and demand of goods as a function of working time and productivity.....	68
Figure 3 Working time, disposable income and unemployment rate .....	70
Table 1 Productivity, wage rate, unemployment rate, inflation rate .....	46
Table 2 <i>Number of persons and disposable incomes</i> <i>according to economic groups</i> .....	51
Table 3 States and parameters of the economy .....	75

## **Chapter 3: Weakness in sales and economic crisis .....83**

Abstract.....	83
1. Surplus savings and excess production.....	84
2. Economic circuit in borrowing and repayment.....	86
3. Causes of the weakness in sales.....	88
4. Course of the economy with excess production.....	89
5. Economic crisis from 1929 and 2007 .....	91
6. Crisis from 2007 and recessions before.....	94

7.	Resolving the crisis .....	97
8.	Activities in the Great Depression .....	99
9.	Tackling the current crisis .....	102
	References.....	103
	Figure 1 Economic circuit with goods and assets .....	85
	Figure 2 Borrowing and repayment in the long term .....	87
	Figure 3 Course of the economy with excess production.....	90
	Figure 4 U. S. debt level as a percentage of the gross domestic product.....	93
	Figure 5 Excess production 1990 - 2010 .....	94
