## Table of Contents

### Invited Talks

Understanding IC3 ................................................................. 1  
*Aaron R. Bradley*

Satisfiability and The Art of Computer Programming (Abstract) ...... 15  
*Donald Knuth*

### Full Papers

#### Stochastic Local Search

Choosing Probability Distributions for Stochastic Local Search and the  
Role of Make versus Break .................................................... 16  
*Adrian Balint and Uwe Schöning*

Off the Trail: Re-examining the CDCL Algorithm .......................... 30  
*Alexandra Goultiaeva and Fahiem Bacchus*

#### Theory

An Improved Separation of Regular Resolution from Pool Resolution  
and Clause Learning .............................................................. 44  
*Maria Luisa Bonet and Sam Buss*

Computing Resolution-Path Dependencies in Linear Time .............. 58  
*Friedrich Slivovsky and Stefan Szeider*

Strong Backdoors to Nested Satisfiability .................................. 72  
*Serge Gaspers and Stefan Szeider*

#### Quantified Boolean Formulae

Extended Failed-Literal Preprocessing for Quantified Boolean  
Formulas .................................................................................. 86  
*Allen Van Gelder, Samuel B. Wood, and Florian Lonsing*

On Sequent Systems and Resolution for QBFs ............................... 100  
*Uwe Egly*

Solving QBF with Counterexample Guided Refinement ..................... 114  
*Mikołaj Janota, William Klieber, Joao Marques-Silva, and  
Edmund Clarke*
Henkin Quantifiers and Boolean Formulae .............................................. 129
Valeriy Balabanov, Hui-Ju Katherine Chiang, and Jie-Hong Roland Jiang

Applications

Lynx: A Programmatic SAT Solver for the RNA-Folding Problem ............... 143
Vijay Ganesh, Charles W. O’Donnell, Mate Soos, Srinivas Devadas, Martin C. Rinard, and Armando Solar-Lezama

Generalized Property Directed Reachability ........................................ 157
Kryštof Hoder and Nikolaj Bjørner

SMT-Aided Combinatorial Materials Discovery ..................................... 172
Stefano Ermon, Ronan Le Bras, Carla P. Gomes, Bart Selman, and R. Bruce van Dover

Faulty Interaction Identification via Constraint Solving and Optimization ........................................ 186
Jian Zhang, Feifei Ma, and Zhiqiang Zhang

Parallel and Portfolio Approaches

Revisiting Clause Exchange in Parallel SAT Solving .............................. 200
Gilles Audemard, Benoît Hoessen, Saïd Jabbour, Jean-Marie Lagniez, and Cédric Piette

Designing Scalable Parallel SAT Solvers ............................................. 214
Antti E.J. Hyvärinen and Norbert Manthey

Evaluating Component Solver Contributions to Portfolio-Based Algorithm Selectors ........................................ 228
Lin Xu, Frank Hutter, Holger Hoos, and Kevin Leyton-Brown

CDCL SAT Solving

Efficient SAT Solving under Assumptions ............................................ 242
Alexander Nadel and Vadim Ryvchin

Preprocessing in Incremental SAT ....................................................... 256
Alexander Nadel, Vadim Ryvchin, and Ofer Strichman

MAX-SAT, Cores Interpolants

On Davis-Putnam Reductions for Minimally Unsatisfiable Clause-Sets ........ 270
Oliver Kullmann and Xishun Zhao
## Table of Contents

### Improvements to Core-Guided Binary Search for MaxSAT

*Antonio Morgado, Federico Heras, and Joao Marques-Silva*

Page 284

### On Efficient Computation of Variable MUSes

*Anton Belov, Alexander Ivrii, Arie Matsliah, and Joao Marques-Silva*

Page 298

### Interpolant Strength Revisited

*Georg Weissenbacher*

Page 312

### Complexity Analysis

#### Exponential Lower Bounds for DPLL Algorithms on Satisfiable Random 3-CNF Formulas

*Dimitris Achlioptas and Ricardo Menchaca-Mendez*

Page 327

#### Parameterized Complexity of Weighted Satisfiability Problems

*Nadia Creignou and Heribert Vollmer*

Page 341

#### Fixed-Parameter Tractability of Satisfying beyond the Number of Variables

*Robert Crowston, Gregory Gutin, Mark Jones, Venkatesh Raman, Saket Saurabh, and Anders Yeo*

Page 355

### Circuits and Encodings

#### Finding Efficient Circuits for Ensemble Computation

*Matti Järvisalo, Petteri Kaski, Mikko Koivisto, and Janne H. Korhonen*

Page 369

#### Conflict-Driven XOR-Clause Learning

*Tero Laitinen, Tommi Junttila, and Ilkka Niemelä*

Page 383

#### Perfect Hashing and CNF Encodings of Cardinality Constraints

*Yael Ben-Haim, Alexander Ivrii, Oded Margalit, and Arie Matsliah*

Page 397

#### The Community Structure of SAT Formulas

*Carlos Ansótegui, Jesús Giráldez-Cru, and Jordi Levy*

Page 410

### Tool Presentations

#### SATLab: X-Raying Random k-SAT

*Thomas Hugel*

Page 424

#### Resolution-Based Certificate Extraction for QBF

*Aina Niemetz, Mathias Preiner, Florian Lansing, Martina Seidl, and Armin Biere*

Page 430
Table of Contents

Coprocessor 2.0 – A Flexible CNF Simplifier .......................... 436
Norbert Manthey

SMT-RAT: An SMT-Compliant Nonlinear Real Arithmetic Toolbox ... 442
Florian Corzilius, Ulrich Loup, Sebastian Junges, and
Erika Ábrahám

CoPAn: Exploring Recurring Patterns in Conflict Analysis of CDCL
SAT Solvers ................................................................. 449
Stephan Kottler, Christian Zielke, Paul Seitz, and Michael Kaufmann

Azucar: A SAT-Based CSP Solver Using Compact Order Encoding ... 456
Tomoya Tanjo, Naoyuki Tamura, and Mutsunori Banbara

SatX10: A Scalable Plug&Play Parallel SAT Framework ............... 463
Bard Bloom, David Grove, Benjamin Herta, Ashish Sabharwal,
Horst Samulowitz, and Vijay Saraswat

Poster Presentations

Improved Single Pass Algorithms for Resolution Proof Reduction ...... 469
Ashutosh Gupta

Creating Industrial-Like SAT Instances by Clustering and
Reconstruction ............................................................ 471
Sebastian Burg, Stephan Kottler, and Michael Kaufmann

Incremental QBF Preprocessing for Partial Design Verification ....... 473
Paolo Marin, Christian Miller, and Bernd Becker

Concurrent Cube-and-Conquer ........................................... 475
Peter van der Tak, Marijn J.H. Heule, and Armin Biere

Satisfying versus Falsifying in Local Search for Satisfiability ........ 477
Chu Min Li and Yu Li

Exploiting Historical Relationships of Clauses and Variables in Local
Search for Satisfiability .................................................. 479
Chu Min Li, Wanxia Wei, and Yu Li

Towards Massively Parallel Local Search for SAT ....................... 481
Alejandro Arbelaez and Philippe Codognet

Optimizing MiniSAT Variable Orderings for the Relational Model
Finder Kodkod .............................................................. 483
Markus Iser, Mana Taghdiri, and Carsten Sinz

A Cardinality Solver: More Expressive Constraints for Free .......... 485
Mark H. Liffiton and Jordyn C. Maglalang
