# Table of contents

**ABSTRACT** ..... 1

**Introduction** ..... 2
1.1. Telomere and Telomerase ..... 3
1.2. Role in Cell division and Senescence ..... 6
1.3. The telomerase knockout mouse model ..... 7
1.4. Cell cycle and regulation ..... 8
1.5. Functional role of p18 (INK4c) ..... 8
1.6. p18 (INK4c) knockout mouse model ..... 10

**AIM OF THE STUDY** ..... 11

**Material & Methods** ..... 12
2.1. Laboratory Equipment ..... 13
2.2. Programs ..... 14
2.3. Chemicals ..... 14
2.4. Tissue Culture Reagents ..... 16
2.5. Enzymes, DNA ladder and protein ladder ..... 16
2.6. Animal work ..... 16
2.6.1. Generation of mice, maintenance and handling of animals ..... 16
2.6.2. Genotyping ..... 17
2.7. Immunohistochemistry ..... 18
2.7.1. Processing of Tissues ..... 18
2.7.2. Immunohistochemistry staining for tissues (Fluorescence) ..... 18
2.7.3. Immunohistochemistry staining (counter staining) ..... 18
2.8. TUNEL staining ..... 19
2.9. *In situ* hybridization (ISH) ..... 19
2.10. Whole mounts ..... 20
2.11. Flow Cytometry ..... 20
2.11.1. Staining protocol ..... 22
2.12. Freezing of bone marrow cells ..... 22
2.13. Protein Analysis ..... 22
2.13.1. Protein Isolation and Concentration Measurement ..... 22
2.13.2 Western Blotting ..... 23
2.14. RNA Analysis ..... 23
2.14.1. RNA Isolation ..... 23
2.14.2. DNase I treatment ..... 24
2.14.3. cDNA Synthesis ..... 24
2.14.4. Quantitative Real Time PCR ..... 24
2.15. Telomere Length measurement ..... 25

Bibliografische Informationen

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

2.16. Statistical Analysis ..... 25

**Results** ..... **27**
3.1. p18(INK4c) knockout mice show increased body weight ..... 28
3.2. p18 (INK4c) deletion improves organ maintenance and elongates lifespan of telomere dysfunctional mice ..... 30
3.3. p18 deletion improves the self-renewal of epithelial stem cells in small intestine and hematopoietic stem cells ..... 36
3.4. Lack of p18 does not rescue telomere function and does not change formation of chromosomal fusions in *G4 mTerc*$^{-/-}$ mice ..... 39
3.5. p18 deletion increases the proliferation rate in basal crypts of small intestine in telomere dysfunctional context in spite of more induction of DNA damage checkpoints in telomere dysfunctional mice ..... 41
3.6. Expression level of p18 in hematopoietic stem cell compartment and small intestine of aged telomere deficient mice ..... 44

**Discussion** ..... **46**

**OUTLOOK** ..... **51**

**REFERENCES** ..... **52**
