</table>
A Quality Control Model for Trustworthy Crowdsourcing in Collaborative Learning .................................................. 85
Jun Jo, Ann Stevens, Clarence Tan

Multimodal Human-Robot Interface with Gesture-Based Virtual Collaboration ......................................................... 91
Young Eun Song, Mihoko Niitsuma, Takashi Kubota, Hideki Hashimoto, Hyoung Il Son

Three-Layered Architecture for Tele-operator and Its System Test ................................................................. 105
Koshi Hoshino, Yasuharu Kunii

Analysis of Physiological Signals for Emotion Recognition Based on Support Vector Machine ........................................ 115
Makara Vanny, Seung-Min Park, Kwang-Eun Ko, Kwee-Bo Sim

Human Intention Reading by Fuzzy Cognitive Map: A Human-Robot Cooperative Object Carrying Task ...................... 127
Ji-Hyeong Han, Jong-Hwan Kim

A Simultaneous Generation Method for Gaze Behaviors and Facial Expressions of a Robotic Head ........................... 137
Bum-Soo Yoo, Jong-Hwan Kim

Curvature Path Planning with High Resolution Graph for Unmanned Surface Vehicle ............................................... 147
Hanguen Kim, Byeolteo Park, Hyun Myung

Automatic Take-off and Landing Control for Small Unmanned Helicopter ............................................................. 155
Satoshi Suzuki

Development of Crawler Robot with Pile Units to Traverse Loose Soil with Steep Slope ........................................... 169
Kojiro Iizuka, Hirofumi Komatsu, Takashi Kubota

Robo-Teacher: A Computational Simulation Based Educational System to Improve Cyber Security ...................... 179
Bin Zhang, Kamran Shafi, Hussein A. Abbass

Comparative Analysis of Arm Control Performance Using Computational Intelligence ............................................. 187
Cesar H. Valencia, Marley M.B.R. Vellasco, Karla T. Figueiredo

Advanced Sampling Scheme Based on Environmental Stiffness for a Smart Manipulator ........................................ 199
Taku Shimizu, Takashi Kubota
Walking Pattern Generation on Inclined and Uneven Terrains for Humanoid Robots ........................................ 209
Young-Dae Hong, Jong-Hwan Kim

Stable Modifiable Walking Pattern Algorithm with Constrained Optimized Central Pattern Generator .................. 223
Chang-Soo Park, Jong-Hwan Kim

Optimal EEG Channel Selection for Motor Imagery BCI System Using BPSO and GA ........................................... 231
Jun-Yeup Kim, Seung-Min Park, Kwang-Eun Ko, Kwee-Bo Sim

3D Human-Pose Tracking through a Monocular Vision .................. 241
Minho Kim, Sihyun Joo, Sungho Jo

Operator Standpoint-Based Remote Operation System Considering the Operational Convenience for a Mobile Robot ..................................................... 255
Chang-Seop Shin, Gon-Woo Kim

Sway Motion Cancellation Scheme Using a RGB-D Camera-Based Vision System for Humanoid Robots .................. 263
Jeong-Ki Yoo, Seung-Beom Han, Jong-Hwan Kim

Locomotion of Robotic Fish Using the Univector Field Method in a 3-D space ...................................................... 273
In-Bae Jeong, Jong-Hwan Kim

Humanoid Interface for Artificially Intelligent Role-Based Game Playing ................................................................. 283
Lisa J. Golden, Zachary T. Golden, James Michael McAtee, Eric T. Matson

Task Planning for Service Robots with Supervisory Control .............. 293
Chung-Woon Park, Jung-Woo Lee, Jong-Tae Lim

Cognitive Architecture to Composite Emotions from Autonomic Nervous System for Robotic Head .................. 301
Charmasson Amandine, Kim Jong-Hwan, Kambiz Arab Tehrani

Development and Implementation of Break Falling System for a Biped Robot ...................................................... 315
Seung Je Woo, Sung G. Lee, Jung Seul Ok, Jong Hwan Kim

Application of Fuzzy Logic in Learning Autonomous Robots Systems ...... 327
María Laura González, Jorge Salvador Ierache

Robot Control on the Basis of Bio-electrical Signals .................. 337
Jorge Salvador Ierache, Gustavo Pereira, Iris Sattolo, Juan Irribaren, Nicolás Suiffet
Experience with the Children-Humanoid Interaction in Rehabilitation Therapy for Spinal Disorders ............................... 347
Maria Vircikova, Peter Sincak

Differential Kinematics of Flexible Manipulator for Calibration of Model Parameters ........................................ 359
Bum-Joo Lee

EtherCAT Based Parallel Robot Control System ........................................ 375
Jung-Hoon Kim, Sun Lim, Il-Kyun Jung

Real-Time Trajectory Generation for Both Arms of a Humanoid Robot .... 383
Chang-Young Jung, Jong-Hwan Kim

Chapter II: Ambient Intelligence, Collective Intelligence and Genetic Intelligence

Hyun Myung

Experimental Tests of Autonomous Jellyfish Removal Robot System JEROS ......................................................... 395
Donghoon Kim, Jae-uk Shin, Hyongjin Kim, Donghwa Lee, Seung-Mok Lee, Hyun Myung

An Examination of Feature Detection for Real-Time Visual Odometry in Untextured Natural Terrain ........................................ 405
Kyohei Otsu, Masatsugu Otsuki, Genya Ishigami, Takashi Kubota

Cost Based Navigation for Autonomous Vacuum Cleaners .............. 415
Khaled Al-Wahedi, Aya Darwish, Basma Kodiah

Image-Based ICP Algorithm for Visual Odometry Using a RGB-D Sensor in a Dynamic Environment .......................... 423
Deok-Hwa Kim, Jong-Hwan Kim

Hybrid Indoor Location Tracking for Pedestrian Using a Smartphone .... 431
Seon-Woo Lee, Philhwan Jung, Seong-Ho Song

Overlapped Object Recognition Using Range and Image Data for a Service Robot ........................................ 441
Honggu Lee, Keonhong Lee, Sungho Jo

Novel Scheme of Real-Time Direction Finding and Tracking of Multiple Speakers by Robot-Embedded Microphone Array ............... 453
Daobilige Su, Masashi Sekikawa, Kazuo Nakazawa, Nozomu Hamada

Development of Software and Hardware of Entry-Level Vision Systems for Navigation Tasks and Measuring ..................... 463
S.M. Sokolov, A.A. Boguslavsky, A.I. Vasilyev, O.V. Trifonov
Development of a Quadrocopter Robot with Vision and Ultrasonic Sensors for Distance Sensing and Mapping ............................... 477
Seung-Jae Lee, Jong-Hwan Kim

2D Image Feature-Based Real-Time RGB-D 3D SLAM .......................... 485
Donghwa Lee, Hyongjin Kim, Hyun Myung

Simultaneous Localization Assistance for Mobile Robot Navigation in Real, Populated Environments ................................. 493
Peshala G. Jayasekara, Hideki Hashimoto, Takashi Kubota

Towards an Ami-Robot Applied to Greenhouses ................................... 505
Antonio Bautista-Hernández, Fernando Ramos-Quintana

Particle Swarm Optimization-Based Distributed Control Scheme for Flocking Robots .................................................. 517
Seung-Mok Lee, Hyun Myung

Control Strategies for Heterogeneous, Autonomous Robot Swarms ........ 525
Stefan Thanke, Markus Ax, Lars Kuhnert, Klaus-Dieter Kuhnert,
Marco Langerwisch, Thomas Remmersmann

A Full-functional Simulation and Test Platform for Rotorcraft Unmanned
Aerial Vehicle Autonomous Control .............................................. 537
Ziming Wang, Dalei Song, Juntong Qi, Jianda Han, Yu Miao, Lijun Meng,
Shuaike Zhao, Ming Li

Market-Based Multiagent Framework for Balanced Task Allocation ........ 549
Dong-Hyun Lee, Ji-Hyeong Han, Jong-Hwan Kim, Fellow, IEEE

Autonomy Balancing in a Manned-Unmanned Teaming (MUT) Swarm
Attack .................................................................................. 561
Ji Hyun Yang, Marek Kapolka, Timothy H. Chung

Semi-autonomous Control of Robotic Multi-agents .............................. 571
Jae H. Chung, Christopher Kim

Context-Aware Decision Making for Maze Solving ............................... 589
Sheir Afgen Zaheer, Jong-Hwan Kim

Decentralized Task Re-planning Approaches with en Route Information
Rewards ............................................................................. 599
Sung-Hoon Kim, Sung-Tae An, Han-Lim Choi

Improved CAMshift Based on Supervised Learning ............................ 611
Nur Ariffin Mohd Zin, Siti Norul Huda Sheikh Abdullah, Azizi Abdullah

Development of a Fall Detection System with Microsoft Kinect .......... 623
Christopher Kawatsu, Jiaxing Li, C.J. Chung
Strategic Decision-Making of MASTER Software Agent in Terms of the Behavior of Mobile Robot Agents

Mikulas Hajduk, Marek Sukop

Experimental Study of Grouser’s Effect for Planetary Rovers Based on Terramechanics

Yuto Nakane, Kojiro Iizuka, Takashi Kubota

Evolving Story Narrative Using Surrogate Models of Human Judgement

Kun Wang, Vinh Bui, Eleni Petraki, Hussein A. Abbass

Distributed Multiobjective Quantum-Inspired Evolutionary Algorithm (DMQEA)

Si-Jung Ryu, Jong-Hwan Kim

Neuro-Evolution of Escape Behaviour under High Level of Deception and Noise

Shir Li Wang, Kamran Shafi, Chris Lokan, Hussein A. Abbass

A Homogeneous Distributed Computing Framework for Multi-objective Evolutionary Algorithm

Ki-Baek Lee, Jong-Hwan Kim, Fellow, IEEE

Personalized Emotional Expressions to Improve Natural Human-Humanoid Interaction

Maria Vircikova, Peter Sincak, Dong Hwa Kim

Daniel Lorencik, Jan Vascak, Maria Vircikova

Tuning Fuzzy-Based Hybrid Navigation Systems Using Calibration Maps

Napoleon H. Reyes, A.L.C. Barczak, T. Susnjak

Distributed and Incremental Visual Object Categorization for Humanoid Platform NAO

Peter Sincak, P. Smolar, M. Vircik, M. Pala

Computational Intelligence for Creating Autonomous Robots

Pitoyo Hartono

Chapter III: Intelligent Robot Technologies and Applications

Peter Xu

Fostering Students’ Spatial Skills through Practice in Operating and Programming Robotic Cells

Igor M. Verner, Sergei Gamer, Avraham Shtub
Innovative Experimental System Supporting Mechatronics Education ........................................ 753
Fusaomi Nagata, Akimasa Otsuka, Sakakibara Kaoru, Keigo Watanabe, Maki K. Habib

Humanoids at the Assistive Robot Competition RoboWaiter 2012 ........................................ 763
Igor M. Verner, Dan Cuperman, Amit Cuperman, David Ahlgren, Steve Petkovsek, Vlad Burca, Binay Poudel, Junius Santoso

Human-Like Robot as Teacher’s Representative in a Science Lesson: An Elementary School Experiment ............................................................ 775
Takuya Hashimoto, Igor M. Verner, Hiroshi Kobayashi

Measuring the Information Quality of e-Learning Systems in KSA: Attitudes and Perceptions of Learners ................................................................. 787
Salem Alkhalaf, Anne T.A. Nguyen, Steve Drew, Vicki Jones

Research on Distance-First Based Role Assignment Strategy of Soccer Robot ................................................. 793
Da-Lei Song, Bing-Wei Wu, Xiu-Fang Li, Li-Ping Chen, Chuan-Jun Liu

An Approach to the Specification of Security Concerns in UML .............................................. 801
Vinh Xuan Tran, Ninh-Thuan Truong, Anne T.A. Nguyen

Intelligent Blowing Controller for Autonomous Underwater Flight Vehicle ...................................... 809
Hyun-Sik Kim

Fuzzy Visual Navigation Using Behavior Primitives for Small Humanoid Robot ........................................ 823
Yong-Tae Kim, Su-Hee Noh

Development of Steer-by-Wire for Manned and Unmanned Electric Vehicle ........................................ 835
Yong-Jun Lee, Young-Jae Ryoo

Passive RFID Positioning System Using RF Power Control ....................................................... 845
Sang Yup Lee, Byung-Cheol Min, Dong Hoe Kim, Jae Seok Yoon, Dong Han Kim

An Islands-of-Fitness Compact Genetic Algorithm Approach to Improving Learning Time in Swarms of Flapping-Wing Micro Air Vehicles ................................................. 855
John C. Gallagher

A Collision Control Strategy for Multiple Moving Robots ......................................................... 863
Pejman Kamkarian, Henry Hexmoor

Communication for Task Completion with Heterogeneous Robots ........................................... 873
Danielle Erickson, Max DeWees, John Lewis, Eric T. Matson
Robotic Reasoning with Ontological Semantic Technology .......................... 883
Max Petrenko, Christian F. Hempelmann

The Not So Simple Ontology of a “Primitive” Robot ................................. 893
Victor Raskin

Understanding and Processing Information of Various Grain Sizes ............. 901
Julia M. Taylor

Software Platform for the Industrial Dual-Arm Robot ............................... 911
Taeyong Choi, Hyunmin Do, Chanhun Park, Dongil Park, Seunghwi Lee,
Jin Ho Kyung

Design of Dual-Arm Robot for Cell Production ....................................... 921
Hyunmin Do, Chanhun Park, Kyoungtaik Park, Jin Ho Kyung

Dynamic Control of Parallel Manipulator ................................................. 931
Kap-Ho Seo, Yongsik Park, Sungjo Yun, Sungho Park, Jungsoo Jun,
Jeongtack Min

Design of Rotor and Magnetic Bearings for 200RT Class Turbo
Refrigerant Compressor ................................................................. 941
Cheol Hoon Park, Sang Kyu Choi

Forming Complicated Surface in Shipyard Using Neural Network
System ............................................................................................. 951
Nguyen Truong-Thinh, Tuong Phuoc Tho, Trinh Duc Cuong

A Method for Controlling Wheelchair Using Hand Gesture Recognition ....... 961
Nguyen Kim-Tien, Nguyen Truong-Thinh, Trinh Duc Cuong

Position Control of a Quad-Rotor System ................................................. 971
Seungho Jeong, Seul Jung

Mathematical Formula Recognition Based on Modified Recursive
Projection Profile Cutting and Labeling with Double Linked List ................. 983
Yong-Ho Yoo, Jong-Hwan Kim

Control for Smart Transportation Vehicle Based on Dynamic model .......... 993
Phan Le Hung, Trinh Duc Cuong, Nguyen Truong Thinh

Intelligent Camera for Object Identification and Tracking ......................... 1003
Donald G Bailey, Gourab Sen Gupta, Miguel Contreras

Speaker Dependent Visual Speech Recognition by Symbol and Real Value
Assignment ......................................................................................... 1015
Jeongwoo Ju, Heechul Jung, Junmo Kim
Automatic Image Segmentation Using Saliency Detection and Superpixel Graph Cuts ................................................................. 1023
Sandeul Kang, Hansang Lee, Jiwhan Kim, Junmo Kim

A Survey: Stereo Based Navigation for Mobile Binocular Robots ........ 1035
Da-Lei Song, Qian-li Jiang, Wei-cheng Sun, Le-le Yao

Wheel of B2C E-commerce Development in Saudi Arabia ............. 1047
Rayed AlGhamdi, Anne T.A. Nguyen, Vicki Jones

Author Index ........................................................................... 1057
