Part I Basics of Supply Chain Management

1	Supply Chain Management: An Overview	3
	Hartmut Stadler	
1.1	Definitions	3
1.2	Building Blocks	5
1.2.1	Customer Service	7
1.2.2	Integration	8
1.2.3	Coordination	11
1.2.4	Relating SCM to Strategy	13
1.2.5	Foundations	17
1.3	Origins	18
1.3.1	Channel Research	18
1.3.2	Collaboration and Coordination	19
1.3.3	Location and Control of Inventories in Production-Distribution Networks	20
1.3.4	Bullwhip Effect in Production-Distribution Systems	20
1.3.5	Hierarchical Production Planning	24
	References	26
2	Supply Chain Analysis	29
	Christopher Sürie and Boris Reuter	
2.1	Motivation and Goals	29
2.2	Process Modeling	31
2.2.1	Concepts and Tools	31
2.2.2	The SCOR-Model	33
2.3	Performance Measurement	39
2.3.1	General Remarks	40
2.3.2	Key Performance Indicators for Supply Chains	43
2.4	Inventory Analysis	47
2.4.1	Production Lot-Sizing or Cycle Stock	48
2.4.2	Transportation Lot-Sizing Stock	49
2.4.3	Inventory in Transit	50
2.4.4	Seasonal Stock or Pre-built Stock	50

2.4.5	Work-in-Process Inventory (WIP)	51
2.4.6	Safety Stock	52
	References	53
3	Types of Supply Chains	55
	Herbert Meyr and Hartmut Stadler	
3.1	Motivation and Basics	55
3.2	Functional Attributes	56
3.3	Structural Attributes	59
3.4	Example for the Consumer Goods Industry	61
3.5	Example for Computer Assembly	65
	References	69
4	Advanced Planning	71
	Bernhard Fleischmann, Herbert Meyr, and Michael Wagner	
4.1	What is Planning?	71
4.2	Planning Tasks Along the Supply Chain	76
4.2.1	Supply Chain Planning Matrix	77
4.2.2	Long-Term Planning Tasks	77
4.2.3	Mid-Term Planning Tasks	79
4.2.4	Short-Term Planning Tasks	80
4.2.5	Coordination and Integration	81
4.3	Examples of Type-Specific Planning Tasks and Planning Concepts	83
4.3.1	Consumer Goods Industry	84
4.3.2	Computer Assembly	89
	References	95
 Part II Concepts of Advanced Planning Systems		
5	Structure of Advanced Planning Systems	99
	Herbert Meyr, Michael Wagner, and Jens Rohde	
	References	105
6	Strategic Network Design	107
	Bernhard Fleischmann and Achim Koberstein	
6.1	The Planning Situation	107
6.2	Strategic Network Design Models	110
6.2.1	Basic Components	110
6.2.2	Dealing with Uncertainty	113
6.2.3	Extensions	115
6.3	Implementation	117
6.4	Applications	119
6.4.1	Computer Hardware	120
6.4.2	Automotive Industry	120
6.4.3	Chemical Industry	120

6.4.4	Pharmaceutical Industry	120
6.4.5	Forest Industry	121
6.5	Strategic Network Design Modules in APS Systems	121
	References	122
7	Demand Planning	125
	Christoph Kilger and Michael Wagner	
7.1	A Demand Planning Framework	126
7.2	Demand Planning Structures	127
7.2.1	Time Dimension	128
7.2.2	Product Dimension	129
7.2.3	Geography Dimension	131
7.2.4	Consistency of Forecast Data	132
7.3	Demand Planning Process	133
7.4	Statistical Forecasting Techniques	136
7.4.1	Moving Average and Smoothing Methods	138
7.4.2	Regression Analysis	139
7.5	Demand Planning Controlling	141
7.5.1	Basic Forecast Accuracy Metric	141
7.5.2	Aggregation of Forecast Accuracy by Time	143
7.5.3	Aggregation of Forecast Accuracy by Product and Geography	144
7.5.4	Forecast Value Added	145
7.5.5	Biased Forecasts	145
7.6	Additional Features	146
7.6.1	Life-Cycle-Management and Phase-In/Phase-Out	146
7.6.2	Price-Based Planning	146
7.6.3	Sporadic Demand	148
7.6.4	Lost Sales vs. Backorders	148
7.6.5	Model Selection and Parameter Estimation	149
7.6.6	Safety Stocks	150
7.6.7	What-If Analysis and Simulation	151
	References	153
8	Master Planning	155
	Martin Albrecht, Jens Rohde, and Michael Wagner	
8.1	The Decision Situation	156
8.1.1	Planning Horizon and Periods	158
8.1.2	Decisions	160
8.1.3	Objectives	161
8.1.4	Data	162
8.1.5	Results	162
8.2	Model Building	163
8.2.1	Modeling Approach	163
8.2.2	Model Complexity	166
8.2.3	Aggregation and Disaggregation	167

8.2.4	Relations to Short-Term Planning Modules	169
8.2.5	Using Penalty Costs	170
8.3	Generating a Plan.....	170
8.4	Sales and Operations Planning	173
	References.....	174
9	Demand Fulfilment and ATP	177
	Christoph Kilger and Herbert Meyr	
9.1	Available-to-Promise (ATP)	178
9.2	Structuring of ATP by Product.....	181
9.2.1	Make-to-Stock	181
9.2.2	Assemble/Configure-to-Order	182
9.2.3	Make-to-Order	183
9.3	Structuring of ATP by Time	184
9.4	Structuring of ATP by Customer	184
9.4.1	Demand Constrained Mode	185
9.4.2	Supply Constrained Mode.....	185
9.4.3	The Customer Hierarchy and Allocation Rules	187
9.4.4	Allocation Planning	189
9.5	Order Promising	190
9.5.1	ATP Search Procedure.....	190
9.5.2	ATP Consumption by Example	192
	References.....	194
10	Production Planning and Scheduling	195
	Hartmut Stadtler	
10.1	Description of the Decision Situation	195
10.2	How to Proceed from a Model to a Production Schedule	196
10.3	Model Building	199
10.3.1	Level of Detail	199
10.3.2	Objectives	203
10.3.3	Representation of Solutions	204
10.4	Updating Production Schedules	204
10.5	Number of Planning Levels and Limitations.....	206
10.5.1	Planning Levels for Production Planning and Scheduling.....	206
10.5.2	Limitations Due to Computational Efforts	210
	References.....	210
11	Purchasing and Material Requirements Planning	213
	Hartmut Stadtler	
11.1	Basics of Material Requirements Planning	213
11.2	Generation and Timing of Uncritical Orders.....	216
11.3	Quantity Discounts and Supplier Selection	221
	References.....	224

12	Transport Planning for Procurement and Distribution	225
	Bernhard Fleischmann, Herbert Kopfer, and Christopher Sürle	
12.1	Planning Situations	225
12.1.1	Transport Systems	225
12.1.2	Interfaces to Other APS Modules	228
12.1.3	Planning Tasks and Information Management	229
12.2	Planning Approaches	232
12.2.1	Transport and Inventory	232
12.2.2	Deployment	235
12.2.3	APS Modules	237
	References	239
13	Coordination and Integration	241
	Boris Reuter and Jens Rohde	
13.1	Coordination of APS Modules	242
13.2	Integration of APS	245
13.2.1	Integration with OLTP	246
13.2.2	Integration with Data Warehouses	248
13.2.3	Integration with Business Planning	249
13.2.4	Enterprise Application Integration	251
13.3	Supply Chain Event Management	254
	References	255
14	Collaborative Planning	257
	Christoph Kilger, Boris Reuter, and Hartmut Stadler	
14.1	Introduction	258
14.2	Types of Collaborations	261
14.2.1	Material-Related Collaborations	263
14.2.2	Service-Related Collaborations	266
14.2.3	Material- and Service-Related Collaboration	267
14.3	A Generic Collaboration and Collaborative Planning Process	269
14.4	Software Support	274
	References	276

Part III Implementing Advanced Planning Systems

15	The Definition of a Supply Chain Project	281
	Christoph Kilger	
15.1	Supply Chain Evaluation	283
15.1.1	Executive Management	285
15.1.2	Sales	286
15.1.3	Product Management and Engineering	287
15.1.4	Procurement	287
15.1.5	Order Management	288
15.1.6	Production	289

15.1.7	Distribution	290
15.1.8	Coordination and Integration Technology	290
15.1.9	Graphical Visualization of the Supply Chain.....	291
15.2	Supply Chain Potential Analysis	291
15.2.1	Financial Performance Indicators	292
15.2.2	Return on Assets	293
15.2.3	External Variability	293
15.2.4	Demand Fluctuations	295
15.2.5	Excess Expenses/Costs	296
15.2.6	Excess Assets	296
15.3	Project Roadmap	297
15.3.1	Enabler-KPI-Value Network	297
15.3.2	KPI-Driven Improvement Processes	299
	References	300
16	The Selection Process	301
	Christoph Kilger and Ulrich Wetterauer	
16.1	Creation of a Short List	304
16.1.1	Planning Processes	304
16.1.2	Industry Focus and Experience	305
16.1.3	Information on the APS Vendor Companies	306
16.1.4	License Fees	307
16.1.5	Implementation Time and Costs	308
16.2	APS Requirements	309
16.3	Implementation and Integration	310
16.3.1	Implementation of the APS Functionality	311
16.3.2	Integration Technology	311
16.3.3	Integration Mode, Performance and Availability.....	313
16.4	Post-implementation Effort and Support Model	314
	References	315
17	The Implementation Process	317
	Ulrich Wetterauer and Herbert Meyr	
17.1	The APS Implementation Project.....	317
17.1.1	Project Definition	319
17.1.2	Solution Design	322
17.1.3	Solution Details	327
17.1.4	Execution and Deployment	330
17.1.5	Close	332
17.2	Modeling Phases of an APS-Project.....	332
17.2.1	Major Phases	332
17.2.2	Steps of Supply Chain Modeling	333
	References	337

Part IV Actual APS and Case Studies

18	Architecture of Selected APS	341
	Baptiste Lebreton, Herbert Meyr, Heidrun Rosič, Christian Seipl, and Ulrich Wetterauer	
18.1	AspenTech: AspenONE	342
18.1.1	AspenTech's Software Modules	342
18.1.2	Coordination of Modules	345
18.2	JDA: Manufacturing Planning Suite	345
18.2.1	Modules of the JDA Manufacturing Planning Suite	346
18.2.2	Coordination of JDA Planning Modules	349
18.2.3	System Integration	349
18.2.4	Collaboration Modules	350
18.2.5	Overview of Further JDA Supply Chain Suites	350
18.3	OM Partners: OMP Plus Suite	351
18.3.1	OMP Plus Modules	351
18.3.2	Coordination and Integration Modules	353
18.3.3	Collaboration Modules	354
18.4	Oracle: Value Chain Planning	354
18.4.1	Oracle's APS Modules	354
18.4.2	Coordination of Modules	356
18.4.3	System Integration	357
18.4.4	Collaboration Modules	357
18.5	SAP: SCM and SAP APO	358
18.5.1	SAP's Software Components	358
18.5.2	Coordination and Integration of Software Components	360
18.5.3	System Integration	361
18.5.4	Software Components for Collaboration	361
	References	361
19	Strategic Network Design in the Chemical Industry	363
	Jochen Häberle and Christoph Kilger	
19.1	Case Description	364
19.1.1	Structure of the Chemicals Supply Chain	364
19.1.2	As-Is Situation	364
19.2	Objectives of the Project	366
19.3	Framework for Strategic Network Design	367
19.3.1	As-Is Analysis	367
19.3.2	Software Selection	367
19.3.3	Baseline Model	368
19.3.4	Alternative Scenarios	369
19.4	Setting Up the Baseline Model	370
19.4.1	Data Collection	370
19.4.2	Modeling of Distribution Network	371

19.4.3	Transportation Links	372
19.4.4	Bills of Materials	373
19.4.5	Product Groups	374
19.5	Alternative Scenarios	375
19.6	Results and Lessons Learned	376
20	Demand Planning of Styrene Plastics	377
	Boris Reuter	
20.1	Description of the Supply Chain	377
20.2	The Architecture of the Planning System	379
20.3	Model Building with SAP APO Demand Planning	380
20.3.1	InfoProviders, Characteristics and Key Figures	381
20.3.2	Master Planning Object Structure	383
20.3.3	Planning Areas	383
20.3.4	Planning Books and Data Views	384
20.3.5	Forecast Methods	385
20.4	The Demand Planning Process of the Styrene Plastics Division ...	385
20.4.1	Sales Budget	387
20.4.2	Rolling Business Forecast	387
20.4.3	Marketing Plan	387
20.4.4	Sales Plan	387
20.4.5	Short-Term Adjustments and Plan Consolidation	388
20.5	Results and Lessons Learned	389
	References	390
21	Food and Beverages	391
	Michael Wagner and Herbert Meyr	
21.1	Case Description	392
21.1.1	The Supply Chain	392
21.1.2	The Architecture of the Planning System	394
21.2	Aim of the Project	397
21.3	Model Building in Oracle's Strategic Network Optimization	397
21.3.1	Time Periods	397
21.3.2	Commodities	398
21.3.3	Nodes	398
21.3.4	Arcs	399
21.4	Implementing the Master Planning Model	400
21.4.1	Model Structure	400
21.4.2	Solution Approaches	405
21.4.3	Data Flows	405
21.5	Results and Lessons Learned	406
	References	407
22	Scheduling of Synthetic Granulate	409
	Marco Richter and Volker Stockrahm	
22.1	Case Description	409
22.2	Objectives	411

22.3	Modeling the Production Process in APO PP/DS	411
22.3.1	General	412
22.3.2	Locations	412
22.3.3	Products	413
22.3.4	Resources	415
22.3.5	Production Process Models	417
22.3.6	Supply Chain Model	421
22.4	Planning Process	421
22.5	Results and Lessons Learned	422
22.5.1	Lessons Learned	423
22.5.2	Outlook: Further APO Implementations Within this Company	423
23	Computer Assembly	425
	Christoph Kilger	
23.1	Description of the Computer Assembly Case	425
23.1.1	Computer Industry Supply Chain	425
23.1.2	Product Structure	427
23.1.3	Computer Assembly Process	428
23.2	Scope and Objectives	429
23.3	Planning Processes in Detail	431
23.3.1	Demand Planning	431
23.3.2	Operational Planning	435
23.3.3	Order Planning	436
23.3.4	Order Promising	438
23.3.5	Integration of i2 with SAP R/3	439
23.4	Results and Lessons Learned	441
	References	442
24	Oil Industry	443
	Mario Roitsch and Herbert Meyr	
24.1	Supply Chain Description and Typology	444
24.2	Requirements for Planning	446
24.3	Description of the (Ideal) Planning System	446
24.4	Modeling and Implementation of APS	450
24.5	Modules in Detail	452
24.5.1	Introduction of the Supply & Demand Manager	452
24.5.2	Implementation of the Product Supply Scheduling	455
24.6	Results and Lessons Learned	457
25	SCM in a Pharmaceutical Company	459
	Tanguy Caillet	
25.1	Case Description	460
25.1.1	Topology of the Pharmaceuticals Supply Chain	460
25.1.2	The As-Is Situation	461

25.2	Objectives of Project	463
25.2.1	The To-Be Vision	463
25.2.2	The To-Be Landscape Implemented	464
25.3	Planning Processes	465
25.3.1	Production Planning and Detailed Scheduling: APO PP/DS	465
25.3.2	Master Planning: APO SNP	469
25.4	Results and Lessons Learned	473
25.4.1	Achieved Results	473
25.4.2	Lessons Learned	473
26	Integrated Campaign Planning, Scheduling and Order Confirmation in the Specialty Chemicals Industry	475
	Baptiste Lebreton	
26.1	Case Description	475
26.1.1	Procurement	475
26.1.2	Production	476
26.1.3	Distribution and Sales	476
26.2	Objectives of the Project	476
26.3	Architecture of the Planning System	478
26.4	Integrated Order Confirmation and Supply Planning with OMP Plus	480
26.4.1	Supply vs. Demand Elements	480
26.4.2	Definition and Weighting of the Allocation Cost Matrix	481
26.4.3	Creation of Supply for Pegging Purposes	483
26.5	Results and Lessons Learned	484
	References	485
27	Event-Based Planning for Standard Polymer Products	487
	Matthias Lautenschläger	
27.1	Case Description	488
27.2	Solution Concept	489
27.3	Planning Process	491
27.3.1	Demand Planning	491
27.3.2	Master Planning	492
27.3.3	Detailed Production Planning	494
27.3.4	Quota Management and Availability Check	497
27.3.5	Key Figure Monitoring	497
27.4	Results and Lessons Learned	498
 Part V Conclusions and Outlook		
28	Conclusions and Outlook	501
	Hartmut Stadtler, Christoph Kilger, and Herbert Meyr	
28.1	Summary of Advanced Planning	501

28.2 Further Developments of APS 503

28.2.1 Modeling and Solution Capabilities of APS 503

28.2.2 Quality of Master and Transactional Data 503

28.2.3 Linking APS to Controlling 504

28.2.4 Extending APS to Polycentric Supply Chains 505

28.2.5 Integration of APS with the Automation
Layer of Technical Processes 506

28.3 Management of Change Aspects 507

28.4 Scope of Supply Chain Management 508

References 508

Part VI Supplement

29 Forecast Methods 513

Herbert Meyr

29.1 Forecasting for Seasonality and Trend 513

29.1.1 Working Example 513

29.1.2 Modeling Seasonality and Trend 514

29.1.3 Winters' Method 515

29.2 Initialization of Trend and Seasonal Coefficients 519

29.2.1 Consideration of Further Information 519

29.2.2 Determination of Seasonal Coefficients
by the Ratio-to-Moving Averages Decomposition 519

29.2.3 Determining the Trend by Linear Regression 521
