Preface *XI*

List of Contributors *XIII*

1	Synthesis of Polymer Nanocomposites: Review of Various Techniques	1
	<i>Joel Fawaz and Vikas Mittal</i>	
1.1	Introduction	1
1.2	Synthesis Methods	4
1.2.1	Melt Intercalation	4
1.2.2	Exfoliation Adsorption	9
1.2.2.1	Solution Intercalation	9
1.2.2.2	Emulsion Polymerization	11
1.2.3	<i>In Situ</i> Polymerization	16
1.2.4	Nontraditional Methods	23
	References	26
2	Masterbatch Approach to Generate HDPE/CPE/Graphene Nanocomposites	31
	<i>Ali U. Chaudhry and Vikas Mittal</i>	
2.1	Introduction	31
2.2	Experimental	33
2.2.1	Materials	33
2.2.2	Preparation of Graphite Oxide and Graphene Oxide	34
2.2.3	Nanocomposite Generation	35
2.2.4	Material Characterization	36
2.3	Results and Discussion	37
2.4	Conclusions	47
	Acknowledgments	48
	References	48

3	Preparation and Applications of Hydroxyapatite Nanocomposites Based on Biodegradable and Natural Polymers	51
	<i>Pau Turon, Luis J. del Valle, Carlos Alemán, and Jordi Puiggali</i>	
3.1	Introduction	51
3.2	Preparation of HAp Nanocrystals	52
3.3	Preparation of HAp Nanocomposites	58
3.4	Applications of HAp/DNA Nanocomplexes as Gene Carriers	61
3.5	Tissue Engineering Applications of HAp Nanocomposites Based on Biodegradable Polymers	65
3.6	Applications of HAp Nanocomposites Based on Biodegradable Polymers as Drug Delivery Systems	72
3.7	Miscellaneous Applications of HAp Nanocomposites Based on Biodegradable Polymers	76
3.8	Concluding Remarks	79
	Acknowledgments	80
	References	80
4	Synthetic Methods for Nanocomposites Based on Polyester Resins	87
	<i>Michał Kędzierski</i>	
4.1	Introduction	87
4.2	Nanocomposites with Zero-Dimensional Nanofillers	89
4.2.1	Silicon-Containing Nanospheres	89
4.2.2	Metal Oxides	91
4.2.3	Other 0-D Nanoparticles	93
4.3	Nanocomposites with One-Dimensional Nanofillers	93
4.3.1	Carbon Nanotubes and Nanofibers	93
4.3.2	Cellulose Nanofibers	96
4.3.3	Other 1-D Nanofillers	97
4.4	Nanocomposites with Two-Dimensional Nanofillers	97
4.4.1	Layered Aluminosilicate Clays	97
4.4.1.1	Mixing Methods	98
4.4.1.2	Effects of the Clay Modification	99
4.4.1.3	Nanocomposites with MMT Introduced during the Synthesis of Pre-polymer	102
4.4.1.4	Various Properties and Multiphase Nanocomposites	103
4.4.1.5	Vinyl Ester–Clay Nanocomposites	106
4.4.2	Layered Double Hydroxides	106
4.4.3	Graphene-Based Nanofillers	107
4.5	Conclusions	109
	Abbreviations	110
	References	110

5	Synthesis Fabrication and Characterization of Ag/CNT-Polymer Nanocomposites	115
	<i>Vijaya K. Rangari and Sanchit Dey</i>	
5.1	Introduction	115
5.2	Experimental Procedure	118
5.3	Results and Discussion	119
5.3.1	XRD analysis	119
5.3.2	Transmission Electron Microscopy	119
5.3.3	TGA Analysis of Nanoparticles	121
5.3.4	Thermal Response of the Polymer Composites	121
5.3.5	Compression Test Results of Polymer Composites	124
5.3.6	Flexure Test Results of Polymer Composites	125
5.4	Conclusion	127
	Acknowledgments	127
	References	127
6	Preparation and Characterization of PVDF-Based Nanocomposites	131
	<i>Derman Vatansever Bayramol, Tahir Shah, Navneet Soin, and Elias Siores</i>	
6.1	Synthesis of Poly(vinylidene fluoride) (PVDF)	131
6.2	Structure and Piezoelectric Properties of PVDF	131
6.2.1	Relationships and Equations	135
6.2.1.1	The Piezoelectric Charge Constant and Piezoelectric Voltage Constant	136
6.3	Processing of PVDF for Energy Harvesting Applications	137
6.4	Processing of PVDF Based Materials: Polymer/Polymer, Polymer/Nanofiller, Polymer/Ionomer Blends	138
6.5	PVDF Based Nanocomposites for Energy Harvesting Applications	139
6.6	Conclusion	140
	References	141
7	In Situ Thermal, Photon, and Electron-Beam Synthesis of Polymer Nanocomposites	145
	<i>Luana Persano, Andrea Camposeo, Anna Maria Laera, Francesca Di Benedetto, Vincenzo Resta, Leander Tapfer, and Dario Pisignano</i>	
7.1	Introduction	145
7.2	Thermal-Assisted In Situ Synthesis: Material Choice and Nanocomposite Characterization	146
7.2.1	Precursor Molecules	146
7.2.1.1	Metal Salts	147
7.2.1.2	Organometallic Compounds	147
7.2.2	Thermal Synthesis and Composites Characterization	151
7.2.2.1	Microstructural Characterization	152
7.2.2.2	Optical Spectroscopy Experiments	154

7.3	Fabrication of Nanocomposites and Patterning	155
7.3.1	Nanocomposites by Photoirradiation	157
7.3.1.1	UV and Visible Irradiation	157
7.3.1.2	Multiphoton Irradiation	160
7.3.2	Nanocomposites by Electron-Beam Writing	160
7.3.3	Nanocomposite Polymer Fibers	165
7.3.3.1	Photo-Assisted Synthesis	167
7.3.3.2	Thermal-Assisted Synthesis	169
7.4	Conclusions	171
	Acknowledgments	172
	References	172
8	Synthesis of Polymer Nanocomposites by Water-Assisted Extrusion	179
	<i>Naïma Sallem-Idrissi, Michel Sclavons, and Jacques Devaux</i>	
8.1	Introduction	179
8.2	Nanocomposites Structure and Characterization	180
8.2.1	Clays	180
8.2.2	Organomodification of Layered Silicates	181
8.2.3	Nanocomposites Structure and Characterization	182
8.3	Nanocomposites Preparation	183
8.3.1	Intercalation from Solution	183
8.3.2	<i>In Situ</i> Polymerization	183
8.3.3	Melt Compounding	184
8.3.3.1	Melt Blending of Polymer/Organoclay Nanocomposites	184
8.3.3.2	Melt Blending of Polymer/Pristine Clay Nanocomposites	186
8.4	Nanocomposite Properties	195
8.4.1	Thermal Stability	195
8.4.2	Flame Retardancy	197
8.5	Toward Fully Green Composites?	198
	References	201
9	<i>In Situ</i> Preparation of Conducting Polymer Nanocomposites	211
	<i>Liping Yang, Cher Ling Toh, and Xuehong Lu</i>	
9.1	Introduction	211
9.1.1	Electrically Conductive Polymer Nanocomposites and Their Applications	212
9.1.2	Percolation Theory	213
9.1.3	Factors Affecting the Electrical Conductivity of Nanocomposites	214
9.1.3.1	Physical Properties of the Fillers	214
9.1.3.2	Filler Distribution and Dispersion	216
9.1.3.3	Physical Properties of Polymer Matrices	216
9.1.3.4	Filler Orientation and Alignment	217
9.1.3.5	Nanocomposite Fabrication Methods and Conditions	218

9.2	<i>In Situ</i> Preparation of Conductive Nanocomposites	219
9.2.1	<i>In Situ</i> Polymerization Strategy	219
9.2.1.1	Step Growth	220
9.2.1.2	Chain Growth	224
9.2.1.3	Aligning Conductive Fillers in <i>in situ</i> Polymerization Processes	227
9.2.2	<i>In Situ</i> Formation of Conducting Polymer Nanocomposites	228
9.2.2.1	<i>In Situ</i> Formation of rGO-Based Polymer Nanocomposites	228
9.2.2.2	<i>In Situ</i> Formation of Metallic Conductive Pathways	232
9.3	Challenges and Outlook	233
	References	235
10	Near IR Spectroscopy for the Characterization of Dispersion in Polymer–Clay Nanocomposites	241
	<i>Ana Vera Machado, Joana Margarida Barbas, and Jose Antonio Covas</i>	
10.1	Introduction	241
10.2	Morphology and Properties	241
10.3	Preparation Methods	243
10.4	Characterization Techniques	243
10.5	Dispersion by Melt Mixing	247
10.6	Online and Inline Monitoring of Dispersion	249
10.7	Conclusions	259
	References	259
11	Synthesis of Polymer Nanocomposites in Supercritical CO₂	267
	<i>Yuvaraj Haldorai and Jae-Jin Shim</i>	
11.1	Introduction	267
11.2	Background on Supercritical CO ₂	268
11.3	Physical and Chemical Properties of scCO ₂	270
11.4	Preparation of Polymer/Inorganic Filler Nanocomposites in Supercritical CO ₂	272
11.4.1	<i>Ex Situ</i> Method	272
11.4.1.1	Solution Blending	272
11.4.1.2	Melt Blending	272
11.4.2	<i>In Situ</i> Method	276
11.4.2.1	Synthesis of Nanocomposites by Dispersion Polymerization	277
11.4.2.2	Synthesis of Nanocomposites by Other Techniques	281
11.5	Conclusions	286
	References	286
	Index	291
