

Index

1. Introduction	1
1.1 Project Description	1
1.2 Structure of the Thesis	2
2. Application Description	3
2.1 Clinical Need	3
2.2 Technical Need	7
3. State of the Art.....	9
3.1 Neurological Symptoms and Assessment Tasks	9
3.2 Intraoperative Assessment of Neurological Symptoms.....	13
3.3 Quantitative Assessment of Neurological Symptoms	15
3.4 Commercial Systems for Quantification of Neurological Symptoms	19
3.5 Research Systems for Quantification of Neurological Symptoms	21
3.6 Inertial Sensors and Sensor Fusion for Motion Tracking.....	24
3.7 Limitations of Existing Technology	27
4. Glove Monitoring System	30
4.1 Task Description.....	30
4.2 Expected Advantages	33
5. System Concept	35
5.1 Designs with Wireless Communication Interfaces.....	35
5.2 Static System Description.....	36
5.3 Dynamic System Description	40
6. Prototypical Realization	51
6.1 Nine-Axis Direction-Cosine-Method Realization	51
6.2 Prototypes with Wireless Communication Interfaces	52
6.3 Materials	56
6.4 Physical Implementation	61
6.5 Graphical User Interface Implementation	67
6.6 Calibration of Inertial Sensors and Force Sensor Boxes	68
6.7 Combined Version	74
6.8 Conclusion.....	76
7. Experiments and Discussion.....	78
7.1 Verification of Analytical Methods for Tremor Assessment	78
7.2 Verification of Hand Grasping Angle Calculation	83
7.3 Verification of Analytical Methods for Rigidity Assessment	86
7.4 Experiment of Tremor Assessment	98
7.5 Experiment of Bradykinesia Assessment	102
7.6 Conclusion.....	104
8. Conclusions and Outlook.....	106
8.1 Conclusions	106
8.2 Outlook.....	107
9. Glossary.....	109

10. Bibliography	112
