

Contents

1	Introduction	1
1.1	Definition and Use Cases of SDN	3
1.1.1	Principles of Software Defined Networking	3
1.1.2	Definition and Significance of SDN Interfaces	6
1.1.3	Definition of Software Defined Networking (SDN) Features	8
1.1.4	Use-Cases for Software Defined Networking	10
1.2	Scientific Contribution	14
1.3	Outline of This Thesis	15
2	Performance Analysis of Software Defined Networking	17
2.1	Background and Related Work	18
2.1.1	Works on Data Plane Performance	19
2.1.2	Works on Control Plane Performance	20
2.2	OpenFlow System Measurement	20
2.2.1	Data Plane Performance Experimental Setup	21
2.2.2	Data Plane Measurement Results	25
2.3	OpenFlow Controller Benchmark	31
2.3.1	Benchmark Architecture	32
2.3.2	Comparison with Cbench	35
2.3.3	Controller Benchmarking Results	36
2.4	Analytical Modeling of OpenFlow	44
2.4.1	Model Input Parameters	44
2.4.2	A Simplified Model of an OpenFlow Architecture	45

2.4.3	Analytical Results for the Simplified Model	48
2.4.4	Generalizing the Model	53
2.4.5	OpenFlow Controller Service Time Distribution	54
2.4.6	OpenFlow Architecture Model using Generalized Controller Service Times	56
2.4.7	Analytical Results for the Generic Service Model	59
2.5	Lessons Learned	61
3	SDN Control Plane Applications	65
3.1	Previous Works on (SDN-based) Measurements	66
3.2	Accuracy of Leveraging SDN for Passive Network Measurements	66
3.2.1	Measurement Architecture	67
3.2.2	Testbed Setup	69
3.2.3	Measurement Results	72
3.3	Proof of Concept for Novel Approaches to Networking enabled by SDN	81
3.3.1	Interactive Proxy Management in Future Communication Networks Using OpenFlow	82
3.3.2	ECDC: An OpenFlow-Based Energy-Efficient Data Center Approach	85
3.4	Lessons Learned	88
4	Leveraging the SDN Northbound-API for QoE-based Application-Aware Networking	91
4.1	Background and Related Work	92
4.1.1	Background and Works on Application-Aware SDN	93
4.1.2	Works on QoE in Inter-active Video Applications	94
4.2	Obtaining Key Performance Indicators on the Example of Cloud Gaming	95
4.2.1	Survey Parameters and Design	96

4.2.2	Rater Reliability	102
4.2.3	Identification of Key Influence Factors for Cloud Gaming QoE	105
4.2.4	Towards a Key Quality Indicator	112
4.3	SDN-based Application-Aware Networking	115
4.3.1	Scenario and Testbed Setup	116
4.3.2	Measurement Results	119
4.4	Lessons Learned	127
5	Conclusion	131
	Bibliography and References	133
	Index	145
