Table of Contents	i
List of Figures	iii
List of Tables	viii
Abbreviations.....	x
Abstract	xi
Kurzfassung.....	xii
Extended Abstract.....	xiii
1 Introduction.....	- 1 -
2 State of Technology	- 2 -
2.1 <i>Fundamental of automotive Li-ion batteries</i>	- 2 -
2.1.1 Introduction of automotive Li-ion batteries.	- 2 -
2.1.2 Construction of lithium-ion batteries in single cell and module . . .	- 5 -
2.1.3 Value of spent automotive Li-ion batteries	- 11 -
2.2 <i>Recycling concepts of automotive Li-ion batteries</i>	- 13 -
2.2.1 Directives regarding to the Li-ion batteries recycling in Europe . . .	- 13 -
2.2.2 Review of Li-ion batteries recycling methods at industrial scale ..	- 15 -
2.2.3 Hydrometallurgical Li-ion batteries recycling methods tested only at lab scale.	- 23 -
2.3 <i>Leaching</i>	- 26 -
2.3.1 General remarks.	- 26 -
2.3.2 Kinetic modelling	- 26 -
2.3.3 Thermochemical modelling	- 28 -
2.4 <i>Cu cementation</i>	- 30 -
2.5 <i>Metal precipitation from leaching solution</i>	- 32 -
2.5.1 Metal hydroxide precipitation	- 32 -
2.5.2 Metal sulphide precipitation	- 34 -
2.5.3 Fundamentals of Fe precipitation	- 37 -
2.6 <i>Solvent extraction</i>	- 39 -
2.6.1 Mechanism and procedure of solvent extraction	- 40 -
2.6.2 Solvent extraction equilibrium.	- 41 -
2.6.3 Extractants in the solvent extraction process	- 42 -
2.7 <i>Lithium market primary resources, applications and production</i>	- 44 -
2.8 <i>Comparison of pyro- and hydrometallurgical process</i>	- 46 -
2.9 <i>General assessment and motivation of this work</i>	- 48 -
3 Experimental methodology.....	- 49 -
3.1 <i>Pre-treatment of spent automotive Li-ion batteries</i>	- 49 -
3.2 <i>Characterisation of the electrode powder</i>	- 50 -

3 3	Design of metallurgical recycling process	- 52 -
3 4	Leaching experiments	- 55 -
3 5	Solution refining.	- 57 -
3 5 1	Cu cementation with Fe powder	- 57 -
3 5 2	Cu precipitation as sulphide	- 58 -
3 5 3	Fe and Al precipitation by pH adjustment	- 60 -
3 5 4	Solvent extraction	- 60 -
3.6	Cathode metal precipitation with hydroxide, carbonate and sulphide methods.	- 62 -
3 7	Li_2CO_3 crystallisation/precipitation	- 64 -
4	Results and discussion	- 65 -
4.1	Leaching reactions	- 65 -
4 1 1	Leaching in sulphuric acid media	- 66 -
4 1 2	Leaching kinetics	- 70 -
4 1 3	Verification experiments.	- 78 -
4 1 4	Purity and morphology of filtered graphite	- 79 -
4 2	Solution refining	- 80 -
4 2 1	Cu recovery via Cu cementation	- 80 -
4 2 2	Cu recovery via sulphide precipitation	- 86 -
4 2 3	Fe and Al precipitation by pH adjustment	- 89 -
4 2 4	Purification of leaching solution by solvent extraction	- 91 -
4 3	Cathode metal (Co, Ni, Mn) precipitation	- 94 -
4 3 1	Cathode metal hydroxide precipitation	- 94 -
4 3 2	Cathode metal carbonate precipitation	- 96 -
4 3 3	Metal sulphide precipitation	- 97 -
4 4	Li_2CO_3 crystallisation/precipitation	- 99 -
4 5	Evaluation of recycling products and efficiency	- 101 -
5	Conclusions	- 104 -
6	Outlook of future work directions	- 106 -
7	Literature	XXIV
8	Appendix	XXVIII
8 1	pH-time, Eh-time diagrams for leaching experiments	XXVIII
8.2	pH-time and Eh-time diagrams for copper cementation experiments	XXIX
8 3	Eh-pH diagrams for Co, Mn, Ni, Cu and Al	XXXI
8 4	pH and Eh by added NaOH and Na_2CO_3 mass in cathode metal precipitation	XXXIV
8.5	XRD diagram of raw material and list of identified phases	XXXV
8 6	SEM photos of leaching residual (Graphite) under different leaching conditions	XXXVI
