Symbols and Abbreviations	ix
1 Introduction	1
2 State of the art	3
2.1 Metal plasticity.....	3
2.2 Material modeling of sheet metals.....	7
2.2.1 Anisotropic yield functions.....	7
2.2.2 Material parameters.....	9
2.3 Conventional material characterization tests.....	11
2.3.1 Uniaxial tension test.....	11
2.3.2 Plane strain tension test.....	11
2.3.3 Hydraulic bulge test.....	13
2.3.4 Biaxial tension test.....	14
2.3.5 Layer compression test.....	15
2.3.6 Shear test.....	17
2.4 Specimens with multiple stress and strain states.....	18
2.5 Stress relaxation in sheet metals.....	20
2.5.1 Experimental characterization.....	21
2.5.2 Finite element modeling.....	22
2.6 Residual stress analysis with XRD.....	23
2.6.1 Domain of measurement.....	23
2.6.2 Bragg's law and $\sin^2\psi$ method.....	25
2.6.3 Stress analysis with anisotropic materials.....	28
2.7 Measurement of loading stresses with XRD.....	31
2.8 Strain analysis with digital image correlation.....	32
2.9 Summary.....	33
3 Aim and scope	35
4 Experimental setup and materials	37
4.1 Conventional characterization setups.....	37
4.1.1 Uniaxial tension test.....	37
4.1.2 Plane strain tension test.....	37
4.1.3 Miyauchi test.....	38
4.1.4 Layer compression test.....	39
4.2 X-ray experimental setup.....	40
4.3 Materials.....	42
4.3.1 AA5182.....	42

4.3.2	DC06.....	44
5	Analysis of stress relaxation	47
5.1	Stress relaxation problem.....	47
5.2	Experimental procedure	48
5.3	Experimental results.....	49
5.4	Numerical analysis	55
5.5	Conclusion.....	58
6	Design of a new specimen geometry	61
6.1	Design procedure	61
6.2	Multi-state specimen geometry	73
6.2.1	Numerical analysis	74
6.2.2	Experimental analysis.....	75
6.3	Conclusion.....	83
7	Yield locus determination with X-ray stress analysis	85
7.1	Selection of X-ray measurement parameters	85
7.2	Analysis of repeatability	89
7.3	Applicability of effective X-ray elastic constants.....	90
7.4	Determination of stress factors	97
7.4.1	Analysis of applicability and validity.....	97
7.4.2	Calculation of stress factors	98
7.5	Determination of yield locus.....	104
7.5.1	Conventional characterization.....	104
7.5.2	XRD measurements in biaxial stress states.....	110
7.6	Conclusion.....	112
8	Experimental verification and discussion	115
8.1	Cross-die workpiece.....	115
8.2	Stress measurement in sheet bending process.....	122
8.2.1	Bending machine and experimental procedure	122
8.2.2	Experimental and numerical results	124
8.3	Conclusion.....	126
9	Conclusion	127
