"The Green Economy is not a unitary concept"	2
Thirteen Green Economy myths	4
1. "The Green Economy invigorates sustainable development"	4
2. "The crisis is an opportunity for the Green Economy"	7
3. "The Green Economy reconciles economic and environmental goals"	10
4. "The Green Economy creates good jobs"	15
5. "The 'efficiency revolution' boosts growth whilst reducing resource requirements"	18
6. "A strong state is good for the environment and sustainability"	23
7. "Business is the motor of the Green Economy"	26
8. "Employees and unions block the transformation"	30
9. "Green money stimulates a Green Economy"	33
10. "Germany can use green technology to expand on its position as a world market leader"	36
11. "With our shopping basket we can force companies to protect the environment"	39
12. "The Green Economy offers the Global South opportunities for development"	42
13. "The Green Economy reduces poverty"	45
Conclusion: In light of the false promises associated with the Green Economy, a socio-ecological transition is necessary (and possible)!	47
