**Table of Contents**

**List of Abbreviations**

**Preface**

1 Introductory Summary
   1.1 Epidemiology and Etiology
   1.2 Course of Disease and Complications
   1.3 Individual and Societal Burden of Diabetes and its Complications
   1.4 Disease Management in Patients with Type 2 Diabetes
      1.4.1 Organizational Frame and Disease Management Programs
      1.4.2 Physician-delivered Disease Management
      1.4.3 Patient Self-Management
   1.5 Outcomes in Patients with Type 2 Diabetes
   1.6 Goal of the Dissertation
   1.7 Content and Results of the Dissertation
   1.8 Individual Contribution of the Author
   1.9 References

2 Article 1
The Burden of Diabetes Mellitus in Patients with Coronary Heart Disease: A Methodological Approach to Assess Quality-Adjusted Life-Years Based on Individual-Level Longitudinal Survey Data

3 Article 2
The Effectiveness of German Disease Management Programs in Patients with Type 2 Diabetes Mellitus and Coronary Heart Disease: Results from an Observational Longitudinal Study

4 Article 3
The Association Between Patient-Reported Self-Management Behavior, Intermediate Clinical Outcomes, and Mortality in Patients With Type 2 Diabetes: Results From the KORA-A Study

5 Article 4 (not published yet)
Incremental Costs and Cost-Effectiveness of Intensive Treatment in Patients with Screen-Detected Type 2 Diabetes in the ADDITION Trial: An Update with Empirical Trial-Based Cost Data
