

Contents

Zusammenfassung	vii
1. Introduction	1
1.1. Contribution and Structure	2
1.2. List of discussed Papers	5
2. Preliminaries	7
2.1. Digital Circuits and Processors	7
2.2. Test and Diagnosis of Digital Circuits	10
2.3. Fault Models	12
2.3.1. Stuck-At Fault	12
2.3.2. Transition-Delay Fault	13
2.3.3. Small-Delay Fault	13
2.4. Formal Methods	14
2.4.1. SAT	14
2.4.2. PMAX-SAT	15
2.4.3. BMC with Craig Interpolation	16
2.5. Automatic Test Pattern Generation (ATPG)	19
2.5.1. Structural ATPG	19
2.5.2. SAT-Based ATPG	19
2.5.3. Diagnostic ATPG	22
2.5.4. Sequential and Functional ATPG	22
2.6. Software-Based Self-Test (SBST)	25
3. Software-Based Self-Test	27
3.1. Related Work	29
3.2. Functional ATPG Engine	30
3.2.1. Initialization Sequence Computation	30
3.2.2. Functional Stuck-At ATPG	31
3.2.3. Functional Small-Delay ATPG	39
3.3. Optimizations of the Functional ATPG Engine	45
3.3.1. Observability Measure	46
3.3.2. Propagation-Aware Sensitization	48
3.3.3. Propagation-Aware Path Sensitization	50
3.3.4. Propagation Sequence Extraction	54
3.3.5. Prediction of Aborts	67
3.4. Maximization for Functional Stuck-At ATPG	69

Contents

3.5. Validity Checker Module	72
3.5.1. Integration of Constraints	73
3.5.2. Pseudo-Inputs	75
3.5.3. Validity Checker Module Flow	75
3.5.4. Modification of the Functional ATPG Engine	76
3.6. SBST Constraints	77
3.6.1. SBST Environment	78
3.6.2. General Design of Constraints	79
3.6.3. Hardware-Controlled Inputs	80
3.6.4. Processor Instruction Set	81
3.6.5. Program Memory	81
3.6.6. Data Memory	83
3.6.7. Fault Detection	84
3.7. Overview of Automatic SBST Generation Framework	85
3.8. Experimental Results	86
3.8.1. Efficiency of Optimizations	87
3.8.2. Functional Maximization	90
3.8.3. Automatic SBST Generation	91
3.8.4. Comparison to other Approaches	95
3.8.5. Small-Delay Faults	97
3.9. Summary and Outlook	99
3.9.1. Outlook	100
4. Scan-Based Diagnosis and Software-Based Diagnosis	105
4.1. Related Work	107
4.2. Transition-Delay ATPG	108
4.2.1. Enforcement of Fault Detection	108
4.2.2. Encoding of ATPG Problem	110
4.3. Maximization with Implicit Diagnosis	111
4.3.1. Target Faults and Unique Response Signatures	112
4.3.2. Implicit Diagnostic ATPG	115
4.4. Maximization with Explicit Diagnosis	117
4.4.1. Selection of Target Faults	118
4.4.2. Explicit Diagnostic ATPG	119
4.4.3. Equivalence Proof	121
4.5. Diagnostic Maximization Framework	121
4.6. Software-Based Diagnosis	124
4.6.1. Functional Diagnostic Stuck-At ATPG	124
4.6.2. Modified Integration of Constraints	127
4.6.3. SBD Constraints	129
4.6.4. Overview of Automatic SBD generation framework	129
4.7. Experimental Results	132
4.7.1. Different Fractions for Diagnostic Maximization Framework	133
4.7.2. Effectiveness of Diagnostic Maximization Framework	134
4.7.3. Software-Based Diagnosis	137

4.8. Summary and Outlook	140
4.8.1. Outlook	142
5. Summary	145
Appendix	147
A. Experimental Setup	149
A.1. Solver Description	149
A.2. Benchmark Description	149
A.3. Experimental Platform Description	150
B. Complete List of Authors Publications	153
