Table of Contents

Chapter 1 General introduction and scope of the thesis 1

Chapter 2 Progress in the practical application of electron channeling contrast imaging (ECCI) 5

2.1 Background information on the evolution of the ECC imaging technique 5
2.2 Theoretical fundamentals of ECC imaging 7
2.2.1 Bragg diffraction and Bloch wave model 7
2.2.2 Intensity profiles of crystal defects 9
2.3 Experimental procedure 11
2.3.1 Sample preparation 11
2.3.2 Microscope setup for controlled electron channeling contrast imaging 12
2.3.3 Tools for orientation determination and crystallographic analysis 13
2.4 Results and discussion 15
2.4.1 Dislocation imaging by means of ECCI 15
2.4.2 Stacking fault imaging by means of ECCI 21
2.4.3 Coherent phases resolved by ECCI 25
2.4.4 Direct comparison of ECC images and TEM micrographs 27
2.5 Conclusion 31

Chapter 3 Deformation of TWIP steels in experiments with strain path change 33

3.1 Theoretical background 33
3.1.1 High manganese steels 33
3.1.2 Deformation mechanisms in fcc structures 36
3.1.3 Work hardening 44
3.1.4 Cup drawing process 49
3.2 Experimental approach 53
3.2.1 Test material 55
3.2.1 Simulation of cup drawing test 56
3.2.1.1 Channel die - plane strain compression 57
3.2.1.2 Three point bending 58
3.2.2 Electron backscatter diffraction 60
3.3 Results 63
3.3.1 Methods for data analysis 63
3.3.2 Biaxial plane strain compression tests 68
3.3.2.1 Mechanical data 68
3.3.3 Microstructure evolution 72
3.3.4 Bending - Unbending 77
3.3.4.1 State 1: Bending and unbending of the non-pre-strained material 77
3.3.4.2 State 2: Bending and unbending of the -0.07 pre-strained material 88
3.3.4.3 State 3: Bending and unbending of the -0.2 pre-strained material 96
3.3.4.4 Bending – Unbending in X40MnAlSi20-1.5-1 105

3.4 Discussion 109
3.4.1 Deformation mechanisms of single grains in polycrystals 109
3.4.1.1 Microstructure evolution 110
3.4.1.2 Orientation dependence 112
3.4.1.3 Correlation of hardening behavior and twinning 115
3.4.2 Pre-strained grains (strain path change) 118
3.4.2.1 Deformation mechanisms 119
3.4.2.2 Orientation dependence 122
3.4.3 Recrystallized and pre-deformed grains in the reverse deformation 126
3.4.3.1 Deformation mechanisms (Detwinning) 126
3.4.3.2 Grain orientation spread 132
3.4.4 Critical structures for hydrogen embrittlement 136
3.5 Conclusion 139
