|---|----|
| 1. Summary | V |
| 2. Zusammenfassung | VI |
| 3. Introduction | 1 |
| 3.1. Aims of this work | 2 |
| 4. Single molecule localisation microscopy | 3 |
| 4.1. The diffraction limit | 3 |
| 4.1.1. The image of a single fluorescent molecule | 3 |
| 4.2. Circumventing the diffraction limit by single molecule localisation | 8 |
| 4.2.1. Photo-convertible fluorescent dyes | 9 |
| 4.2.2. Imaging conditions | 11 |
| 4.3. 2D images: How to obtain the position in the focal plane | 11 |
| 4.3.1. The model | 12 |
| 4.3.2. Fitting algorithms | 12 |
| 4.3.3. Localisation accuracy | 13 |
| 4.4. 3D images: How to obtain the axial position | 16 |
| 4.4.1. Biplane imaging | 16 |
| 4.4.2. Astigmatic detection | 20 |
| 4.4.3. Interferometric detection | 22 |
| 4.4.4. Comparison of the theoretically achievable localisation accuracies | 28 |
| 5. The setup | 29 |
| 5.1. The dual-objective single molecule localisation microscope | 29 |
| 5.1.1. The illumination beam path | 29 |
| 5.1.2. The detection beam path | 31 |
| 5.1.3. The objective lenses | 32 |
| 5.1.4. Samples and sample holder | 34 |
| 5.1.5. Motion control for fine adjustment | 36 |
| 5.1.6. Dispersion compensation | 36 |
| 5.1.7. Mirrors | 37 |
| 5.1.8. Vibration, temperature and stray light isolation | 38 |

| | |
|--|----|
| 5.1.9. Device control | 38 |
| 5.2. Adjustment of the beam path | 39 |
| 5.2.1. General installation of the system | 39 |
| 5.2.2. The biplane detection path | 40 |
| 5.2.3. The astigmatic detection path | 40 |
| 5.2.4. The interferometric detection path | 41 |
| 5.3. Particle localisation | 50 |
| 5.3.1. The particle localisation algorithm | 50 |
| 5.3.2. x and y estimation | 53 |
| 5.3.3. z estimation | 54 |
| 6. Quantification of the microscope's performance | 61 |
| 6.1. Preparation of bead samples | 61 |
| 6.2. Detection PSFs | 62 |
| 6.2.1. PSF acquisition | 62 |
| 6.2.2. Measured PSFs | 62 |
| 6.2.3. Effect of polarisation on the interferometric PSF | 67 |
| 6.3. Measured and computed localisation accuracy for ideal emitters | 68 |
| 6.3.1. Accuracy measurement | 68 |
| 6.3.2. Localisation accuracy for biplane detection | 70 |
| 6.3.3. Localisation accuracy for astigmatic detection | 70 |
| 6.3.4. Localisation accuracy for interferometric detection | 71 |
| 6.3.5. Comparison of the localisation accuracies | 72 |
| 6.4. Measured and computed localisation accuracy at realistic brightness for all three colour channels | 72 |
| 6.4.1. Localisation accuracy for biplane detection | 75 |
| 6.4.2. Localisation accuracy for astigmatic detection | 75 |
| 6.4.3. Localisation accuracy for interferometric detection | 77 |
| 6.4.4. Comparison of the localisation accuracies | 78 |
| 7. Proof-of-principle dSTORM measurements | 80 |
| 7.1. dSTORM imaging | 80 |
| 7.1.1. dSTORM sample preparation | 80 |
| 7.1.2. Image acquisition and reconstruction | 81 |
| 7.2. Stained microtubules | 82 |
| 7.2.1. Staining procedure | 82 |
| 7.2.2. STED imaging of microtubules | 83 |
| 7.2.3. dSTORM imaging of microtubules | 85 |
| 7.3. Custom 3D DNA structure | 90 |
| 7.3.1. Immobilisation of DNA structures on the cover glass | 90 |

| | |
|---|------------|
| 7.3.2. 3D reconstruction | 91 |
| 7.3.3. Distance analysis | 91 |
| 8. Conclusions and outlook | 99 |
| 8.1. Localisation accuracy | 99 |
| 8.1.1. Biplane detection | 100 |
| 8.1.2. Astigmatic detection | 101 |
| 8.1.3. Interferometric detection | 101 |
| 8.2. dSTORM examples | 102 |
| 8.2.1. Refractive index matching | 102 |
| 8.2.2. Stained microtubules | 103 |
| 8.2.3. DNA construct | 104 |
| 8.3. Outlook | 105 |
| A. Detailed description of the microscope's PSF | 107 |
| A.1. The image-forming system | 107 |
| A.1.1. Magnification of an infinity-corrected imaging system | 107 |
| A.2. The intensity distribution generated by a radiating dipole | 109 |
| A.2.1. Dipole radiation | 110 |
| A.2.2. The beam path | 110 |
| A.2.3. Diffraction by the finite aperture | 113 |
| A.2.4. Simulations | 126 |
| A.2.5. Intensity distribution for biplane detection | 130 |
| A.2.6. Intensity distribution for astigmatic detection | 132 |
| A.2.7. Intensity distribution for interferometric detection | 137 |
| B. Integral equations | 141 |
| B.1. Method of stationary phase | 141 |
| B.2. Bessel function integrals | 146 |
| C. Phase shift in a beamsplitter | 149 |
| D. The limit of localisation accuracy | 151 |
| D.1. The accuracy of estimates | 151 |
| D.2. Application to single molecule localisation | 154 |
| D.2.1. Numerical implementation | 155 |
| D.2.2. Comparison with experimental values | 158 |
| Bibliography | 161 |
