Abstract	i
Kurzfassung	ii
Nomenclature	iii
1 Motivation and Methodological Approach	1
2 State of the Art	7
2.1 Building Simulation Models	7
2.1.1 Single-Zone Model	8
2.1.2 Multi-Zone Model	8
2.1.3 Zonal Flow Models	9
2.1.4 Computational Fluid Dynamics	10
2.2 Building Simulation for the Design Process	11
2.2.1 The Building Simulation Wish-List	11
2.2.2 Stand-Alone	13
2.2.3 Data Model Interoperation	14
2.2.4 Process Model Interoperation	15
2.2.5 Process Model Co-Operation	16
2.3 Modular Simulation	17
2.3.1 The Concept of Modularity	18
2.3.2 Co-Simulation	19
2.3.3 The Functional Mock-up Interface	25
2.4 The Web Ontology Language	28
2.5 Appraisal of the State of the Art	30
3 Development of a Scalable Building Performance Simulation with Modular Components	33
3.1 Theoretical Concept	33
3.1.1 Simulation Decomposition	35
3.1.2 Service-Oriented Architecture	39
3.1.3 The FMI Model Description	40

3.2	An Overarching Knowledge Framework for Modular Simulation	41
3.2.1	FMUont - An Ontology for the Description of FMUs	42
3.2.2	FMU Extension	47
3.3	Single-Zone Simulation	48
3.4	Multi-Zone Simulation	49
3.5	Zonal Airflow Simulation	57
3.6	Implementation	61
4	Case Studies	67
4.1	Example 1 - The Twin House	67
4.1.1	Single-Zone Simulation	68
4.1.2	Multi-Zone Simulation	75
4.1.3	Zonal Airflow Simulation	89
4.2	Example 2 - The FZK-House	96
5	Critical Evaluation of the Methodology	103
5.1	Theoretical Aspects	103
5.1.1	The Wish-List Criteria	103
5.1.2	Modularity	106
5.1.3	Functional Implications of the Methodology	109
5.1.4	Simulation Decomposition	113
5.2	Application Aspects	114
5.2.1	Current Limitations	114
5.2.2	The Time Dimension	115
6	Conclusion and Future Work	121
6.1	Conclusion	121
6.2	Future Work	124
6.2.1	Simulation Time Performance	124
6.2.2	Extension with Domains and LODs	124
6.2.3	Intra-Domain Decomposition	124
6.2.4	BIMtoSIM	125
6.2.5	Product Data Integration	125
6.2.6	Internet of Simulation Things	126
6.2.7	Intelligent Building Data Space	127
7	Summary	129
8	Bibliography	133
9	List of Figures	145
10	List of Tables	151

11 List of Listings	153
Appendix	155
A Implemented Classes and Methods for the Modular Simulation	155
A.1 Quantities	157
A.2 Media	169
A.3 Semantic Types	170
B Validation of Heat Pump and Thermal Storage Model	171
B.1 Heat Pump	171
B.2 Thermal Storage	174
C Summary of Case Study Simulations	175
