

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Structure of the Work	2
2	Fundamentals and State of the Art	5
2.1	Laser Beam Welding of Aluminum and Copper	5
2.1.1	Fundamentals of Laser Beam Welding	5
2.1.2	Challenges in Laser Beam Welding of Aluminum and Copper	6
2.1.3	Characteristics of Aluminum-Copper Joints	7
2.2	Computational Thermo-Mechanics of Laser Beam Welding	10
2.2.1	Basic Concept of Laser Beam Welding Simulation	10
2.2.2	Finite Element Based Thermo-Mechanical Simulation	11
2.2.3	Heat Source Modeling	19
2.3	Summary of the State of Art	20
3	Objective and Scope of the Thesis	23
3.1	Research Need for Welding Simulation of Aluminum-Copper Joints	23
3.2	Material Modeling Approach for Laser Beam Welding	24
3.2.1	Computation of Welding Distortions and Residual Stresses	24
3.2.2	Implemented Material Behavior for Aluminum and Copper	26
3.3	Novel Approaches for Aluminum-Copper Laser Beam Welding Simulation	30
3.3.1	Heat Source Modeling for Aluminum-Copper	30
3.3.2	Generic Material Modeling Approach	37
3.3.3	Microstructural Based Approach	40
4	Validation of Base Material Models	49
4.1	Experimental Setup	49
4.2	Characterization of Base Materials	51
4.2.1	Properties of Base Materials	51
4.2.2	Metallographic Investigations	53
4.2.3	Hardness Measurements	54
4.2.4	Residual Stress Measurement based on X-ray Diffraction	55
4.3	Finite Element Analyzes of Base Materials	58
4.3.1	Verification of Material Model	58
4.3.2	Finite Element Plate Model of Welding Process	59
4.3.3	Heat Source Model Calibrations	60
4.3.4	Mesh Convergence Study	62

4.4	Comparison of Experimental and Numerical Results	64
4.4.1	Comparison of Residual Stresses	64
4.4.2	Comparison of Welding Distortions	66
4.5	Summary and Conclusions of Validation Process	67
5	Numerical Analyzes of Laser Beam Welded Aluminum-Copper Joints	69
5.1	Setup of Aluminum-Copper Welding Experiments	69
5.2	Finite Element Model of Aluminum-Copper Lap Joints	71
5.3	Temperature Field Analyzes of Aluminum-Copper	72
5.3.1	Applied Heat Source Models	73
5.3.2	Nonlinear Optimization for Heat Source Calibration	73
5.3.3	Results of Temperature Field Simulations	75
5.4	Results of Generic Material Model Approach	78
5.4.1	Sensitivity Study for Generic Material Model	81
5.4.2	Comparison of Welding Distortions for Lap Joints	81
5.5	Microstructural Simulation of Aluminum-Copper Fusion Zone	83
5.5.1	Experimental Characterization of Microstructure	83
5.5.2	Reconstruction of Representative Volume Elements	87
5.5.3	Verification of Representative Volume Elements	90
5.5.4	Determination of Representative Volume Element Size	92
5.5.5	Sensitivity Studies for Microstructural Models	94
5.5.6	Effective Material Properties for Welding Simulation	99
5.6	Summary and Conclusions of Aluminum-Copper Numerical Analyzes	104
6	Summary and Outlook	107
	Bibliography	109
	List of Publications	121
	Appendix	A-1
A	Mathematical Details	A-1
A.1	Index Notation and Summation Convention	A-1
A.2	Basic Introduction to Tensor Analysis and Further Notations	B-2
B	Constitutive and Governing Equations of Elasto-Plasticity	B-3
B.1	Decomposition of Stresses and Strains	B-3
B.2	Yield Surface and Flow Rule	B-4
B.3	Hardening Laws and Evolution Equations of Elasto-Plasticity	B-7
B.4	Introduction to Nonlinear Finite Element Method	B-10
C	Introduction to Multi Dimensional Optimization Methods	C-12
C.1	Method of Feasible Directions (MFD)	C-13
C.2	Sequential Quadratic Programing (SQP)	C-14
C.3	Genetic Algorithms (GA)	C-16
D	Additional Investigations of Welding Distortion Measurements	D-18
D.1	Qualification of Displacement Transducers	D-18
D.2	Verification of Experimental Welding Distortions	D-21

E	Additional Investigations of Residual Stresses	E-25
E.1	Further Evaluations of Residual Stress Measurements	E-25
E.2	Numerical Studies on Residual Stress	E-26
F	Welding Simulation of Thin Plates	F-27
F.1	Experimental Setup for Aluminum Laser Beam Welding	F-28
F.2	Finite-Element Model	F-28
F.3	Comparison of Experimental and Numerical Results	F-29
G	Investigations on Single-Phase Bulk Intermetallic Samples	G-33
G.1	Generation of Intermetallic Phase Specimens	G-33
G.2	Experimental Setup and Results of Bending Testing	G-34
