<b>List of Figures</b>	<b>xiii</b>
<b>List of Tables</b>	<b>xvii</b>
<b>List of Algorithms</b>	<b>xix</b>
<b>List of Abbreviations</b>	<b>xxi</b>
<b>1 General Introduction</b>	<b>1</b>
1.1 Motivation . . . . .	1
1.2 Thesis structure . . . . .	2
1.3 Visual cortex . . . . .	3
1.3.1 Primary visual cortex (V1) . . . . .	4
1.3.2 Secondary visual cortex (V2) . . . . .	6
1.4 Circuit of a neocortical area . . . . .	7
1.5 Neurons . . . . .	10
1.5.1 Excitatory and inhibitory neurons . . . . .	10
1.5.2 Spike vs. rate . . . . .	11
1.5.3 Activation function . . . . .	11
1.6 Forms of plasticity . . . . .	12
1.6.1 Synaptic plasticity . . . . .	13
1.6.2 Intrinsic plasticity . . . . .	15
1.6.3 Structural plasticity . . . . .	16
1.7 Developing a model sketch . . . . .	18
1.8 Related models . . . . .	21
<b>2 Network Architecture</b>	<b>31</b>
2.1 Connectivity on population level . . . . .	31

2.2	Population geometry . . . . .	34
2.3	Receptive field sizes and retinotop organization . . . . .	37
<b>3</b>	<b>Network Training and Evaluation</b>	<b>41</b>
3.1	Neural simulator and evaluation software . . . . .	41
3.2	Training data . . . . .	41
3.3	Preprocessing . . . . .	42
3.4	Presentation protocol . . . . .	43
3.4.1	Selection of image patches . . . . .	43
3.4.2	Presentation time and stimuli amount . . . . .	44
3.5	Network initialization . . . . .	44
3.6	Stimulation protocol for evaluations . . . . .	45
<b>4</b>	<b>Structural Plasticity</b>	<b>47</b>
4.1	Introduction . . . . .	47
4.2	Experience-dependent spatial growth model . . . . .	50
4.2.1	Synapse creation . . . . .	51
4.2.2	Synapse removal . . . . .	52
4.2.3	Probability calculation . . . . .	53
4.3	Measuring neuron and network properties . . . . .	54
4.3.1	Spatial arrangement of formation and removal probabilities . . . . .	54
4.3.2	Changes in the synapse amount . . . . .	55
4.3.3	Development of the receptive field size under different initial conditions . . . . .	56
4.3.4	Structural plasticity does not harm retinotop organization . . . . .	62
4.3.5	Stability of structural plasticity . . . . .	65
4.4	Conclusion . . . . .	66
<b>5</b>	<b>Intrinsic Plasticity</b>	<b>69</b>
5.1	Introduction . . . . .	69
5.2	Neuron model with intrinsic parameters . . . . .	72
5.3	Intrinsic plasticity mechanisms . . . . .	73
5.3.1	Threshold adaption . . . . .	74
5.3.2	Slope adaption . . . . .	75

5.3.3	Drift . . . . .	75
5.4	Measuring neuron and network properties . . . . .	76
5.4.1	Development of threshold and slope during learning . . . . .	76
5.4.2	Effective modulation of mean activity and variance . . . . .	76
5.4.3	Encoding of visual objects by the neurons maximal information .	82
5.4.4	Comparison of different drift strengths . . . . .	84
5.4.5	Activity distribution . . . . .	87
5.5	Conclusion . . . . .	91
<b>6</b>	<b>Synaptic Plasticity and Homeostatic Regulations</b>	<b>93</b>
6.1	Introduction . . . . .	93
6.1.1	Hebbian and anti-Hebbian learning . . . . .	94
6.1.2	Trace learning . . . . .	98
6.2	Synaptic plasticity and homeostatic regulations methods . . . . .	100
6.2.1	Neuronal calcium level . . . . .	100
6.2.2	Time constant for calcium dependent synaptic change . . . . .	101
6.2.3	Calcium dependent Hebbian learning of excitatory connections .	102
6.2.4	Synaptic plasticity of inhibitory connections . . . . .	105
6.3	Measuring neuron and network properties . . . . .	106
6.3.1	Efficient coding . . . . .	107
6.3.2	Receptive field shapes . . . . .	113
6.3.3	Weight distributions and connection probabilities . . . . .	130
6.3.4	Translation invariance . . . . .	139
6.3.5	Object recognition performance . . . . .	142
6.4	Conclusion . . . . .	147
<b>7</b>	<b>General Discussion</b>	<b>153</b>
7.1	Intrinsic plasticity . . . . .	153
7.2	Structural plasticity . . . . .	155
7.3	Synaptic plasticity . . . . .	158
7.4	Achievements . . . . .	165
