

# Contents

Introduction .....	1
Pioneers of Marine Geology .....	4
<b>1    Origin and Morphology of Ocean Basins .....</b>	<b>8</b>
1.1   The Depth of the Sea .....	8
1.2   Endogenic Processes .....	12
1.3   Exogenic Processes .....	14
1.4   Historical Aspects .....	14
1.5   Morphology of the Mid-Ocean Ridge .....	18
1.6   Morphology of the Trenches .....	20
1.7   Fracture Zones and Plate Tectonics .....	22
1.8   Seamounts, Island Chains and Hot Spots .....	24
1.9   'Proof' for Sea-Floor Spreading: Magnetic Stripes ...	25
1.10 Open Tasks and Questions .....	29
<b>2    Origin and Morphology of Ocean Margins .....</b>	<b>34</b>
2.1   General Features of Continental Margins .....	34
2.2   Margins Are Sediment Traps .....	36
2.3   Atlantic-Type (= Passive) Margins .....	39
2.4   Unsolved Questions in the Study of Passive Margins ..	41
2.5   Pacific-Type (= Active) Margins .....	42
2.6   Shear Margins and Complex Margins .....	44
2.7   The Shelf Areas .....	44
2.8   The Shelf Break .....	46
2.9   Continental Slope and Continental Rise .....	47
2.10 Submarine Canyons .....	49
2.11 Submarine Fans .....	52
<b>3    Sources and Composition of Marine Sediments .....</b>	<b>54</b>
3.1   The Sediment Cycle .....	54
3.2   Sources of Sediment .....	54

3.3	Sediments and Sea Water Composition	58
3.4	Major Sediment Types	61
3.5	Lithogenous Sediments	63
3.6	Biogenous Sediments	66
3.7	Non-skeletal Carbonates	68
3.8	Hydrogenous Sediments	72
3.9	Sedimentation Rates	76
<b>4</b>	<b>Effects of Waves and Currents</b>	<b>79</b>
4.1	Sediment Transport	80
4.2	Effects of Waves	84
4.3	Effects of Currents	93
<b>5</b>	<b>Sea Level Processes and Effects of Sea Level Change</b>	<b>109</b>
5.1	Importance of Sea Level Positions	109
5.2	Sea Level Processes and Indicators	111
5.3	Coastal Morphology and the Recent Rise in Sea Level	116
5.4	Ice-Driven Sea Level Fluctuations	124
5.5	Tectonically Driven Sea Level Fluctuations	128
5.6	Sea Level and the Fate of Venice	132
<b>6</b>	<b>Organisms on and in the Sea Floor – Distribution, Activity and Environmental Reconstruction</b>	<b>136</b>
6.1	The Ocean Habitat	136
6.2	Benthic Life	141
6.3	Organisms and Rocky Substrate	143
6.4	Sandy Substrate	146
6.5	Muddy Bottom Substrate	147
6.6	Trails and Burrows	150
6.7	Bioturbation	152
6.8	Limits of Paleoecologic Reconstruction	154
<b>7</b>	<b>Imprint of Climatic Zonation on Marine Sediments</b>	<b>158</b>
7.1	Overall Zonation and Main Factors	158
7.2	Biogeographic Climate Indicators	161
7.3	Diversity and Shell Chemistry as Climatic Indicators	165
7.4	Coral Reefs, Markers of Tropical Climate	166
7.5	Geological Climate Indicators	171
7.6	Climatic Clues from Restricted Seas	173

<b>8</b>	<b>Patterns of Deep Sea Sedimentation</b>	181
8.1	Inventory and Overview	182
8.2	Red Clay and Clay Minerals	186
8.3	Calcareous Ooze	189
8.4	Siliceous Ooze	196
8.5	Turbidites	201
<b>9</b>	<b>Paleoceanography – The Deep Sea Record</b>	204
9.1	Pleistocene Oceanography	205
9.2	The Ice Age Ocean	205
9.3	The Pleistocene Cycles	207
9.4	Dynamics of Change	213
9.5	Ancient Oceans	214
9.6	Tertiary Oxygen Isotope Record	215
9.7	Fluctuations of the Carbonate Line	217
9.8	Fluctuations in Oxygenation of the Deep Ocean	222
<b>10</b>	<b>Resources from the Ocean Floor</b>	227
10.1	Types of Resources	227
10.2	Petroleum Beneath the Sea Floor	227
10.3	Raw Materials from Shelves	236
10.4	Heavy Metals on the Deep Sea Floor	239
10.5	Dumping on the Sea Floor	247
	Epilog	248
	List of Books and Symposia	250
	<b>Appendix</b>	255
A1	Conversions Between Common US Units and Metric Units	255
A2	Topographic Statistics	256
A3	The Geologic Time Scale	257
A4	Periodic Table of the Elements	258
A5	Common Minerals	259
A6	Common Rock Types	261
A7	Geochemical Statistics	263
A8	Radio-Isotopes and Dating	264
A9	Systematic Overview for Major Groups of Common Marine Organisms Important in Sea Floor Processes	268
	Index of Names	274
	Subject Index	277
