

# Contents

<b>1</b>	<b>Basic concepts</b>	<b>1</b>
1.1	Introduction .....	1
1.2	Principles of ultrahigh vacuum techniques .....	2
1.2.1	Why is UHV necessary? .....	2
1.2.2	Production of ultrahigh vacuum .....	3
1.2.3	Pressure measurement .....	4
1.2.4	Gas handling .....	4
1.3	Preparation of clean surfaces .....	5
1.4	Interaction of low energy electrons with matter .....	6
1.5	Electron energy analyzers .....	9
1.5.1	Retarding field grid analyzer (RFA) .....	9
1.5.2	Cylindrical mirror analyzer (CMA) .....	11
1.5.3	127°-analyzer .....	13
1.5.4	Concentric hemisphere analyzer (CHA) .....	14
1.6	References .....	15
<b>2</b>	<b>Auger electron spectroscopy</b>	<b>17</b>
2.1	Historical development .....	17
2.2	Instrumentation .....	18
2.2.1	Source of excitation .....	18
2.2.2	Sample .....	20
2.2.3	Analyzer and detector system .....	20
2.2.4	Further refinements .....	23
2.3	Mechanism of the Auger process .....	28
2.4	Energies and shapes of the Auger peaks .....	33
2.4.1	Free atoms .....	33
2.4.2	Condensed matter .....	34
2.4.3	Chemical effects .....	37
2.5	Intensity of the Auger electron emission .....	40
2.5.1	Auger yield .....	40
2.5.2	Ionization cross section .....	42
2.5.3	Auger electron emission from condensed matter .....	43
2.6	Detected volume .....	45
2.7	Qualitative analysis .....	47
2.8	Quantitative analysis .....	47
2.8.1	Determination of relative surface quantities .....	48
2.8.2	Absolute surface quantities .....	48
2.8.3	Alloys .....	49
2.8.4	Depth profiling .....	55
2.8.5	Kinetic studies .....	56

2.9	Deconvolution technique and band structure .....	57
2.10	References .....	61
<b>3</b>	<b>X-ray photoelectron spectroscopy (XPS)</b>	<b>65</b>
3.1	Introduction .....	65
3.2	Instrumentation .....	65
3.2.1	Light sources .....	65
3.2.2	Analyzer and detector .....	66
3.2.3	Data analysis .....	67
3.3	Physical principles .....	69
3.4	Qualitative surface analysis .....	70
3.4.1	Identification of elements .....	70
3.4.2	Core-level chemical shifts .....	71
3.5	Quantitative analysis .....	74
3.6	Final state effects .....	79
3.6.1	Relaxation effects .....	79
3.6.2	Multiplet splitting .....	79
3.6.3	Multi-electron excitations .....	80
3.6.4	Core-level satellites .....	81
3.7	Angular effects .....	82
3.8	References .....	83
<b>4</b>	<b>Ultraviolet photoelectron spectroscopy (UPS)</b>	<b>87</b>
4.1	Introduction .....	87
4.2	Instrumentation .....	89
4.2.1	Light sources .....	89
4.2.1.1	Resonance sources .....	89
4.2.1.2	Continuous sources .....	90
4.2.2	Sample .....	93
4.2.3	Analyzer and detector .....	93
4.3.	Photoionization process .....	94
4.3.1	Photoionization of atoms .....	95
4.3.2	Photoionization of molecules .....	97
4.3.3	Photoemission from solids .....	101
4.4	UPS from clean surfaces .....	108
4.4.1	Angle integrated photoemission .....	109
4.4.2	Angle resolved photoemission .....	110
4.5	UPS from adsorbate covered surfaces .....	114
4.5.1	Adsorbed atoms .....	117
4.5.2	Adsorbed noble gases .....	122
4.5.3	Adsorbed molecules .....	128

4.5.3.1	Adsorbed CO . . . . .	129
4.5.3.2	Adsorbed polyatomics . . . . .	138
4.6	References . . . . .	143
<b>5</b>	<b>Electron spectroscopy with noble gas ions and metastable atoms</b>	147
5.1	Introduction . . . . .	147
5.2	Instrumentation . . . . .	147
5.3	Deexcitation mechanisms . . . . .	148
5.4	Auger neutralization . . . . .	150
5.5	Auger deexcitation (Penning ionization) . . . . .	153
5.6	References . . . . .	156
<b>6</b>	<b>Appearance potential spectroscopy</b>	157
6.1	Introduction . . . . .	157
6.2	Instrumentation . . . . .	158
6.3	Mechanism . . . . .	160
6.4	Core-level binding energies . . . . .	163
6.5	Surface analysis . . . . .	165
6.6	Band structure and deconvolution . . . . .	165
6.7	Adsorbate studies/Chemical effects . . . . .	170
6.8	Extended fine structure . . . . .	171
6.9	References . . . . .	173
<b>7</b>	<b>Inverse photoemission (IPE, BIS)</b>	175
7.1	Introduction . . . . .	175
7.2	Instrumentation . . . . .	175
7.3	Mechanism of IPE . . . . .	176
7.4	Clean surfaces . . . . .	178
7.5	Adsorbate studies . . . . .	181
7.6	References . . . . .	183
<b>8</b>	<b>Electron energy loss spectroscopy (ELS, EELS)</b>	185
8.1	Introduction . . . . .	185
8.2	Instrumentation . . . . .	186
8.3	Ionization losses . . . . .	187
8.4	Plasmon losses and intraband transitions . . . . .	190
8.5	Extended loss fine structure . . . . .	195
8.6	Adsorbate induced losses . . . . .	197
8.7	References . . . . .	199

<b>9</b>	<b>Low energy electron diffraction (LEED)</b>	201
9.1	Introduction and historical development .....	201
9.2	Classification of periodic surface structures .....	203
9.2.1	Substrate and surface structures .....	203
9.2.2	Surfaces with periodic steps and kinks .....	206
9.3	Formation of the diffraction pattern .....	207
9.4	Instrumentation .....	209
9.4.1	Introduction .....	209
9.4.2	Electron gun .....	209
9.4.3	Detector system .....	210
9.5	Geometrical theory of diffraction .....	214
9.5.1	Introduction .....	214
9.5.2	The reciprocal lattice .....	215
9.5.3	Interference conditions and the Ewald construction .....	217
9.5.4	Analysis of a simple diffraction pattern .....	219
9.5.5	Domain structures .....	220
9.5.6	LEED patterns of incommensurate structures .....	224
9.6	Kinematic theory .....	226
9.6.1	Introduction .....	226
9.6.2	Scattering at two-dimensional lattices .....	227
9.6.3	Kinematical structure factor .....	230
9.6.4	Intensity-voltage (I/V) curves .....	230
9.7	Disordered structures .....	232
9.7.1	Introduction .....	232
9.7.2	The transfer width .....	233
9.7.3	Size effects and one-dimensional disorder .....	234
9.7.4	Lattice gas systems .....	238
9.7.5	Antiphase domains .....	242
9.7.6	Facets .....	244
9.7.7	Stepped surfaces .....	246
9.8	Simulation of diffraction patterns .....	248
9.9	Dynamical theories .....	250
9.9.1	Introduction .....	250
9.9.2	Physical parameters entering a dynamical theory .....	251
9.9.3	Multiple scattering .....	253
9.9.4	Data evaluation .....	255
9.10	Temperature effects .....	257
9.11	Spin-polarized LEED .....	261
9.12	References .....	262
<b>10</b>	<b>X-ray absorption fine structure (EXAFS)</b>	267
10.1	Introduction .....	267
10.2	Instrumentation .....	268

10.3	Theory of EXAFS .....	270
10.4	EXAFS data analysis .....	272
10.5	Applications of EXAFS to surface problems .....	277
10.5.1	Supported catalysts .....	277
10.5.2	Adsorbed layers .....	277
10.6	Near-edge structure (XANES) .....	280
10.7	References .....	282
<b>11</b>	<b>Vibrational spectroscopy (HREELS, EELS)</b>	285
11.1	Introduction .....	285
11.2	Instrumentation .....	286
11.3	Symmetry aspects of vibrating adsorbed molecules .....	288
11.3.1	General remarks .....	288
11.3.2	Symmetry elements .....	289
11.3.3	Point groups and representations .....	291
11.3.4	Irreducible representations .....	293
11.3.5	Symmetry properties of displacements .....	294
11.3.6	Application to degenerate point groups .....	299
11.3.7	Symmetry of adsorbed atoms .....	302
11.3.8	Symmetry of adsorbed molecules .....	303
11.4	Normal vibrations .....	305
11.5	Group frequencies .....	308
11.6	Theory of the electron scattering mechanism .....	308
11.6.1	Surface dipole scattering .....	308
11.6.2	Electron impact mechanism .....	311
11.6.3	Negative ion resonances .....	313
11.7	Experimental results .....	313
11.7.1	Clean surfaces .....	313
11.7.2	Adsorbed atoms .....	315
11.7.3	Adsorbed diatomics .....	323
11.7.4	Adsorbed polyatomics .....	326
11.7.5	Reaction intermediates .....	329
11.8	References .....	332
<b>12</b>	<b>Electron and photon stimulated desorption</b>	335
12.1	Introduction .....	335
12.2	Experimental .....	335
12.2.1	Changes of surface properties .....	336
12.2.2	Detection of desorbing species .....	336
12.3	Cross sections for desorption .....	339
12.4	Mechanisms for desorption .....	341

**XII**      *Contents*

12.5	Angular distribution of desorbing ions (ESDIAD) . . . . .	343
12.6	References . . . . .	345
<b>13</b>	<b>Appendix</b>	347
13.1	Fundamental constants . . . . .	347
13.2	Properties of selected elements . . . . .	347
13.3	Line positions in XPS using Al-K <sub>d</sub> radiation . . . . .	350
13.4	XPS atomic sensitivity factors . . . . .	354
13.5	Kinetic energies of Auger electrons . . . . .	357
13.6	Relative Auger sensitivity factors . . . . .	365
13.7	Character tables . . . . .	365
13.8	Characteristic group frequencies . . . . .	367
13.9	Abbreviations and acronyms . . . . .	369
