

CONTENTS

	Page
1. Introduction	
1.1 Preliminaries	9
1.2 Special Study Group 3.87	12
2. Objectives of the International Absolute Gravity Basestation Network (IAGBN) Project	
2.1 Secular Gravity Changes Monitoring	14
2.2 Basis for Subordinate Networks	20
2.3 Calibration, Instrument Testing and Metrology	21
3. Network Design	
3.1 General Considerations	22
3.2 Global Site Selection	25
3.2.1 Crustal Age (Map)	26
3.2.2 Plate Pattern (Map)	28
3.2.3 Convection Pattern (Maps)	30
3.2.4 Gravity Variation Model (Map)	34
3.2.5 Space Geodetic Stations (Map)	36
3.2.6 Earth Tides Observation Stations (Map)	40
3.2.7 M2 Oceanic Tide Gravity Effect on Land (Map)	44
3.2.8 Seismic Risk (Map)	46
3.3 International Absolute Gravity Basestation Networks (A) & (B)	49
3.3.1 IAGBN (A) (Map)	50
3.3.2 IAGBN (B) (Map)	52
3.4 Local Site Selection Criteria	54
4. Station Listing IAGBN (A)	56
5. Prospect	61
6. References / Literature	62
