## Biosensors

|                                                                                                                                         |    |
|-----------------------------------------------------------------------------------------------------------------------------------------|----|
| Development and Applications of Amperometric Biosensors<br>I. JOHN HIGGINS . . . . .                                                    | 3  |
| Biosensors Based on Thermistors and Semiconductors<br>BENGT DANIELSSON . . . . .                                                        | 9  |
| Use of Protein Coatings on Piezoelectric Crystals for Assay of Gaseous Pollutants<br>GEORGE G. GUILBAULT and J. NGEH-NGWAINBI . . . . . | 17 |
| Trends in Biosensor Technology<br>ELIZABETH A. H. HALL . . . . .                                                                        | 23 |
| DNA Probes in the Clinical Laboratory<br>ROBERT J. ERICKSON . . . . .                                                                   | 29 |
| Novel Immunosensor Systems<br>ISAO KARUBE . . . . .                                                                                     | 37 |
| Commercialization of Biosensors in Bioprocessing<br>MARC MASON . . . . .                                                                | 49 |

## Environmental Biotechnology

|                                                                                                                                                                                        |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Aerationssystems for Biological Suspensions in BIOHOCH-Reactors<br>H. G. MÜLLER . . . . .                                                                                              | 57 |
| Laboratory Evolution of Novel Catabolic Pathways<br>FERNANDO ROJO, JUAN L. RAMOS, DIETMAR PIEPER,<br>KARL-HEINRICH ENGESSER, HANS-JOACHIM KNACKMUSS and<br>KENNETH N. TIMMIS . . . . . | 65 |
| Degradation of Halogenated Hydrocarbons<br>JOHN T. WILSON . . . . .                                                                                                                    | 75 |

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| Anaerobic Treatment of Industrial Waste Water<br>HERMANN SAHM . . . . .                                                              | 79  |
| Review on the Application of Anaerobic Fluidized Bed Reactors in Waste<br>Water Treatment<br>W. A. ENGER and J. J. HEIJNEN . . . . . | 89  |
| High Solids Anaerobic Digestion of Apple Pomace<br>STEPHEN P. ETHERIDGE and WILLIAM J. JEWELL . . . . .                              | 113 |
| Microbial Degradation of Problematic Waste Air Components<br>THOMAS LEISINGER . . . . .                                              | 125 |
| Removal and Recovery of Metals by Biosorbent Materials<br>B. VOLESKY . . . . .                                                       | 135 |
