Partial Differential Equations VI

Elliptic and Parabolic Operators

Springer-Verlag Berlin Heidelberg New York London Paris Tokyo Hong Kong Barcelona Budapest

I. Elliptic Operators on Closed Manifolds

M.S. Agranovich

Translated from the Russian by M. Capinski

Contents

Pre	face		3
	0.1	The Scope of the Paper	3
	0.2	Some Notation and Conventions	4
§1.	Pseudodifferential and Elliptic Pseudodifferential Operators		
	in \mathbb{R}	<i>n</i>	5
	1.1	Definitions and Examples. Boundedness Theorems	5
	1.2	A Calculus of Pseudodifferential Operators	7
	1.3	The Kernel of a Pseudodifferential Operator and the	
		Pseudolocal Property	10
	1.4	Change of Variables in Pseudodifferential Operators	11
	1.5	Polyhomogeneous Pseudodifferential Operators. Principal	
		and Subprincipal Symbols	12
	1.6	Polyhomogeneous Pseudodifferential Operators of Negative	
		Order as Integral Operators	14
	1.7	Polyhomogeneous Pseudodifferential Operators of Zero	
		Order and Singular Integral Operators	16
	1.8	Elliptic Operators in \mathbb{R}^n	17
§2.	Pseudodifferential Operators and Elliptic Pseudodifferential		
	Operators on a Closed Manifold		19
	2.1	Pseudodifferential Operators on a Manifold M	19
	2.2	Elliptic Pseudodifferential Operators on M	22
	2.3	Elliptic Operators as Fredholm Operators in Sobolev	
		Spaces	25

	2.4 2.5	Pseudodifferential Operators on a Circle and on a Torus The Spectrum of a Linear Operator and the System of Its	30
	2.6	Root Vectors	35
		Operator on <i>M</i> . Examples	39
§3.	$\begin{array}{c} \mathrm{Som} \\ 3.1 \end{array}$	e Variants and Generalizations Other Classes of Scalar Pseudodifferential Operators in \mathbb{R}^n	43
	3.2	and on M	43
	Ð	Operators in Sections of Bundles. Elliptic Complexes	$\frac{48}{55}$
§4.	Pseudodifferential Operators with a Parameter		
	4.1	Pseudodifferential Operators Depending on a Parameter	
	4.0	Polynomially. Ellipticity with Parameter	55 50
	4.2	A Parametrix for $A - \lambda I$	56
	4.3	Generalizations	60
<u>و</u> ب	4.4	Calculus of Pseudodifferential Operators with a Parameter	62
§5.	5.1		66 66
	$5.1 \\ 5.2.$	Functions of Pseudodifferential Operators of Zero Order Positive Operators in a Hilbert Space and Some Functions	66
	0.2.	of Them	68
	5.3	Powers of an Elliptic Operator	08 72
	$5.3 \\ 5.4$	Estimates of <i>s</i> -numbers, Integral Representation, and	12
	0.4	Traces of Operators of Negative Order	74
	5.5	Meromorphic Continuation of Kernel and Trace of a Power	14
	0.0	of a Positive Elliptic Pseudodifferential Operator	78
	5.6	The Exponent e^{-tA} for an Elliptic Pseudodifferential	10
	0.0	Operator A; Asymptotics of Its Kernel and Trace	80
	5.7	Asymptotics of the Kernel and the Trace of the Resolvent	83
	5.8	The Exponent e^{-itA} for an Elliptic Pseudodifferential	00
	0.0	Operator A of the First Order	86
	5.9	Generalizations and Variants	92
§6.		etral Properties of Elliptic Operators of Nonzero Order	52
30.	on M		
	6.1	Selfadjoint Elliptic Pseudodifferential Operators	94 94
	6.2	Weak Perturbations of Selfadjoint Elliptic	• -
		Pseudodifferential Operators	102
	6.3	Selfadjoint Elliptic Pseudodifferential Operators and Their	
		Weak Perturbations on a Circle	109
	6.4	Elliptic Operators far from Selfadjoint	115
			-
