Contents

CONTRIBUTORS

v

PREFACE

vii

Nitrate Metabolism

ANTONIA HERRERO and ENRIQUE FLORES

| | | |
|---|--|----|
| 1 | Introduction | 1 |
| 2 | Nitrate and nitrite uptake: the physiological evidence | 2 |
| 3 | Nitrate reduction | 6 |
| 4 | Incorporation of ammonium into carbon skeletons | 10 |
| 5 | Genetic structure of the system for nitrate assimilation | 11 |
| 6 | Regulation of nitrate assimilation | 17 |
| 7 | Nitrogen control in cyanobacteria | 23 |
| 8 | Concluding remarks | 24 |
| | References | 25 |

Ammonia Assimilation and its Biotechnological Aspects in Cyanobacteria

S BOUSSIBA

| | | |
|---|--|----|
| 1 | Introduction | 36 |
| 2 | Ammonium Assimilation | 36 |
| 3 | Uptake Mechanisms | 39 |
| 4 | Regulation of Key Enzymes in Nitrogen Metabolism | 49 |
| 5 | Biotecnological Aspects | 52 |
| 6 | Conclusions | 61 |
| | References | 62 |

Urea Metabolism

ASHWANI K. RAI

| | | |
|---|----------------------|----|
| 1 | Introduction | 73 |
| 2 | Ecology | 74 |
| 3 | Urea transport | 77 |
| 4 | Enzymology of urease | 78 |
| 5 | Role of urease | 85 |
| 6 | Method of estimation | 85 |
| | References | 87 |

Nitrogen Metabolism of the Symbiotic Systems of Cyanobacteria
JACEK PLAZINSKI

| | | |
|---|--|-----|
| 1 | Introduction | 95 |
| 2 | Symbiotic cyanobacteria - cyanobionts | 97 |
| 3 | Symbiotic systems with cyanobactria - cyanobioses | 99 |
| 4 | Comparisons between endophytic and cultured cyanobacteria | 113 |
| 5 | Transfer of fixed nitrogen in symbiotic systems | 114 |
| 6 | Nitrogen fixation by cyanobacteria | 115 |
| 7 | The genetics of nitrogen fixation in symbiotic cyanobacteria | 119 |
| 8 | Concluding remarks | 121 |
| | References | 123 |

Interactions between Carbon and Nitrogen Metabolism

CATALINA LARA and MIGUEL G. GUERRERO

| | | |
|---|--|-----|
| 1 | Introduction | 131 |
| 2 | Assimilation of inorganic nitrogen and carbon | 132 |
| 3 | Incidence of ammonium assimilation on CO ₂ fixation | 135 |
| 4 | Interactions between nitrate assimilation and CO ₂ fixation | 139 |
| 5 | Carbon dependence of N ₂ fixation | 143 |
| 6 | Concluding remarks | 147 |
| | References | 148 |

Environmental stresses

MARTIN HAGEMANN and NORBERT ERDMANN

| | | |
|---|--|-----|
| 1 | Introduction | 156 |
| 2 | Individual stress syndromes in cyanobacteria | 158 |
| 3 | Signal recognition and transmission | 195 |
| 4 | Combined stressors | 198 |
| 5 | Future prospects | 199 |
| | References | 201 |

Methodologies used in the study of nitrogen metabolism

HELMAR ALMON and HERBERT BÖHME

| | | |
|---|--|-----|
| 1 | Introduction | 221 |
| 2 | Techniques for quantitative determination of N-metabolites | 222 |
| 3 | Nitrate and nitrite uptake | 225 |
| 4 | Ammonium transport | 226 |

| | | |
|----|----------------------------|-----|
| 5 | Nitrate reductase | 228 |
| 6 | Nitrite reductase | 229 |
| 7 | Nitrogenase | 230 |
| 8 | Glutamine synthetase | 235 |
| 9 | Glutamate synthase (GOGAT) | 237 |
| 10 | Glutamate dehydrogenase | 238 |
| | References | 240 |

Future Prospects

IOAN I. ARDELEAN

| | | |
|---|--------------|-----|
| 1 | Introduction | 248 |
| 2 | Proposals | 250 |
| 3 | Applications | 257 |
| | References | 264 |
