

Contents

1	The Use of Mercury Amalgamation in Gold and Silver Mining	1
1.1	Historical Background	1
1.2	Present-Day Worldwide Utilization of Mercury Amalgamation	4
1.3	Present-Day Amalgamation Mining Techniques	6
2	Estimating Losses of Mercury to the Environment	15
2.1	Emissions Factors	15
2.2	Mercury Emissions from Historical Gold and Silver Mining	18
2.3	The Second Gold Rush in the South	22
3	Mercury in the Atmosphere	29
3.1	Characteristics of Mercury Emission to the Atmosphere	29
3.1.1	Active Mercury Vaporization: Burning of Amalgam	30
3.1.2	Passive Mercury Vaporization:	
	Degassing from Contaminated Soils, Waters and Tailings	33
3.2	Mercury Concentrations in Air of Urban and Rural Areas	35
3.3	Chemical Forms, Reactivity and Fate of Hg in the Atmosphere	36
3.4	Impacted Areas Through the Atmospheric Transport Pathway	39
3.4.1	Soils	39
3.4.2	Lakes	44
4	Mercury in Tropical Aquatic and Terrestrial Systems	47
4.1	Characteristics of Mercury Emissions to the Aquatic Environment	47
4.2	Leaching from Tailings	48
4.2.1	Mercury Distribution in Gold Mining Tailings	48
4.2.2	Mercury Export from Tailings to Adjacent Aquatic Systems	51

4.3	Rivers	53
4.3.1	River Systems in Tropical Areas	53
4.3.2	Mercury and Its Associations in River Sediments	56
4.3.3	Hydrological Effects on Hg Dispersion	58
4.3.4	Dispersion of Mercury in River Systems	60
4.4	Tropical Reservoirs	64
4.4.1	Atmospheric Inputs	65
4.4.2	Fluvial Inputs	65
4.4.3	Mercury Cycling in Artificial Tropical Reservoirs	66
4.5	Mercury Methylation	70
5	Mercury in Biota	79
5.1	Terrestrial Vegetation	79
5.2	Aquatic Macrophytes	80
5.3	Animals (Excluding Fish)	83
5.4	Fish	85
5.4.1	Mercury Concentrations and Distribution in Fish	86
5.4.2	Methyl-Mercury in Fish from Gold Mining Areas	90
5.4.3	Fish Response Changes in Hg Environmental Concentrations	91
5.5	The Atmospheric Link in Fish Mercury Content of Fish	93
6	Mercury Contamination of Humans in Gold and Silver Mining Areas	97
6.1	Exposure Characteristics to Human Groups	98
6.2	Mercury Concentrations in Humans from Occupational Exposure	99
6.3	Mercury Concentrations in Humans Due to Environmental Exposure	104
6.3.1	Mercury Concentrations in Human Blood	105
6.3.2	Mercury Concentrations in Human Hair	105
7	Perspectives on the Temporal Development of Mercury Inputs into the Environment	111
7.1	Global Inputs	111
7.2	The Decrease in Mercury Inputs from Industrial Point Sources	112
7.3	Temporal Development in Gold-Mining Regions: The Second Gold Rush and Before	117
8	Summary and Outlook	121
	References	125
	Subject Index	143
