

Brian Straughan

Explosive Instabilities in Mechanics

With 12 Figures

Springer

Contents

1. Introduction	1
1.1 Blow-Up in Partial Differential Equations in Applied Mathematics	1
1.2 Methods of Establishing Non-existence and Growth Solutions	4
1.2.1 The Concavity Method	4
1.2.2 The Eigenfunction Method	10
1.2.3 Explicit Inequality Methods	12
1.2.4 The Multi-Eigenfunction Method	15
1.2.5 Logarithmic Convexity	17
1.3 Finite Time Blow-Up Systems with Convection	19
1.3.1 Fujita-Type Problems	20
1.3.2 Equations with Gradient Terms	24
1.3.3 Systems with Gradient Terms	27
1.3.4 Equations with Gradient Terms and Non-Dirichlet Boundary Conditions	28
1.3.5 Blow-Up of Derivatives	31
2. Analysis of a First-Order System	33
2.1 Conditional Decay of Solutions	33
2.2 Boundedness of Solutions	37
2.3 Unconditional Decay of Solutions	40
2.3.1 Special Cases	43
2.4 Global Non-existence of Solutions	44
2.5 Numerical Results by Finite Elements	47
2.5.1 Solution Structure with Linear and Quadratic Right-Hand Sides	47
3. Singularities for Classical Fluid Equations	63
3.1 Breakdown for First-Order Systems	63
3.2 Blow-Up of Solutions to the Euler Equations	66
3.2.1 Vortex Sheet Breakdown and Rayleigh–Taylor Instability	70
3.2.2 A Mathematical Theory for Sonoluminescence	71

3.3	Blow-Up of Solutions to the Navier–Stokes Equations	74
3.3.1	Self-similar Solutions	77
3.3.2	Bénard–Marangoni Convection	78
4.	Catastrophic Behaviour	
	in Other Non-linear Fluid Theories	81
4.1	Non-existence on Unbounded Domains	81
4.1.1	Ladyzhenskaya’s Models	81
4.1.2	Global Non-existence Backward in Time for Model I, When the Spatial Domain Is \mathbf{R}^2	86
4.1.3	Global Non-existence Backward in Time for Model I, When the Spatial Domain Is \mathbf{R}^3	90
4.1.4	Exponential Growth for Model II, Backward in Time	94
4.1.5	The Backward in Time Problem for Model III	97
4.2	A Model for a Second Grade Fluid in Glacier Physics	99
4.2.1	Non-existence Forward in Time for Model I	101
4.2.2	Non-existence Backward in Time for Model I	103
4.2.3	Exponential Growth Forward in Time for Model II	105
4.2.4	Exponential Boundedness Backward in Time for Model II	108
4.3	Blow-Up for Generalised KdV Equations	108
4.4	Very Rapid Growth in Ferrohydrodynamics	112
4.5	Temperature Blow-Up in an Ice Sheet	115
5.	Blow-Up in Volterra Equations	119
5.1	Blow-Up for a Solution to a Volterra Equation	119
5.1.1	A General Non-linear Volterra Equation	122
5.1.2	Volterra Equations Motivated by Partial Differential Equations on a Bounded Spatial Domain	125
5.2	Blow-Up for a Solution to a System of Volterra Equations	126
5.2.1	Coupled Non-linear Volterra Equations Which May Arise from Non-linear Parabolic Systems	127
6.	Chemotaxis	131
6.1	Mathematical Theories of Chemotaxis	131
6.1.1	A Simplified Model	133
6.2	Blow-Up in Chemotaxis When There Are Two Diffusion Terms	134
6.3	Blow-Up in Chemotaxis with a Single Diffusion Term	137
7.	Change of Type	143
7.1	Instability in a Hypoplastic Material	143

7.2	Instability in a Viscous Plastic Model for Sea Ice Dynamics	150
7.3	Pressure Dependent Viscosity Flow	152
8.	Rapid Energy Growth in Parallel Flows	155
8.1	Rapid Growth in Incompressible Viscous Flows	155
8.1.1	Parallel Flows	158
8.1.2	Energy Growth in Circular Pipe Flow	168
8.1.3	Linear Instability of Elliptic Pipe Flow	171
8.2	Transient Growth in Compressible Flows	172
8.3	Shear Flow in Granular Materials	173
8.4	Energy Growth in Parallel Flows of Superimposed Viscous Fluids	176
	Bibliography	179
	Subject Index	193
