

James E. Gentle

# Random Number Generation and Monte Carlo Methods

With 30 Illustrations

Springer

# Contents

Preface	vii
<b>1 Simulating Random Numbers from a Uniform Distribution</b>	<b>1</b>
1.1 Linear Congruential Generators . . . . .	6
1.1.1 Structure in the Generated Numbers . . . . .	8
1.1.2 Skipping Ahead in Linear Congruential Generators . . . . .	14
1.1.3 Shuffling the Output Stream . . . . .	16
1.1.4 Tests of Linear Congruential Generators . . . . .	17
1.2 Computer Implementation of Linear Congruential Generators . . . . .	19
1.2.1 Insuring Exact Computations . . . . .	19
1.2.2 Restriction that the Output Be $> 0$ and $< 1$ . . . . .	20
1.2.3 Efficiency Considerations . . . . .	21
1.2.4 Vector Processors . . . . .	21
1.3 Other Congruential Generators . . . . .	22
1.3.1 Multiple Recursive Generators . . . . .	22
1.3.2 Lagged Fibonacci . . . . .	23
1.3.3 Add-with-Carry, Subtract-with-Borrow, and Multiply-with-Carry Generators . . . . .	23
1.3.4 Inversive Congruential Generators . . . . .	24
1.3.5 Other Nonlinear Congruential Generators . . . . .	25
1.3.6 Matrix Congruential Generators . . . . .	26
1.4 Feedback Shift Register Generators . . . . .	26
1.4.1 Generalized Feedback Shift Registers and Variations . . . . .	28
1.4.2 Skipping Ahead in GFSR Generators . . . . .	30
1.5 Other Sources of Uniform Random Numbers . . . . .	30
1.5.1 Generators Based on Chaotic Systems . . . . .	31
1.5.2 Tables of Random Numbers . . . . .	31
1.6 Portable Random Number Generators . . . . .	31
1.7 Combining Generators . . . . .	32
1.7.1 Wichmann/Hill Generator . . . . .	33
1.7.2 L'Ecuyer Combined Generators . . . . .	33

1.7.3	Properties of Combined Generators . . . . .	34
1.8	Independent Streams and Parallel Random Number Generation . . . . .	36
1.8.1	Lehmer Trees . . . . .	36
1.8.2	Combination Generators . . . . .	37
1.8.3	Monte Carlo on Parallel Processors . . . . .	37
	Exercises . . . . .	38
<b>2</b>	<b>Transformations of Uniform Deviates: General Methods</b>	<b>41</b>
2.1	Inverse CDF Method . . . . .	42
2.2	Acceptance/Rejection Methods . . . . .	47
2.3	Mixtures of Distributions . . . . .	55
2.4	Mixtures and Acceptance Methods . . . . .	57
2.5	Ratio-of-Uniforms Method . . . . .	59
2.6	Alias Method . . . . .	61
2.7	Use of Stationary Distributions of Markov Chains . . . . .	63
2.8	Weighted Resampling . . . . .	72
2.9	Methods for Distributions with Certain Special Properties . . . . .	72
2.10	General Methods for Multivariate Distributions . . . . .	76
2.11	Generating Samples from a Given Distribution . . . . .	80
	Exercises . . . . .	80
<b>3</b>	<b>Simulating Random Numbers from Specific Distributions</b>	<b>85</b>
3.1	Some Specific Univariate Distributions . . . . .	87
3.1.1	Standard Distributions and Folded Distributions . . . . .	87
3.1.2	Normal Distribution . . . . .	88
3.1.3	Exponential, Double Exponential, and Exponential Power Distributions . . . . .	92
3.1.4	Gamma Distribution . . . . .	93
3.1.5	Beta Distribution . . . . .	96
3.1.6	Student's <i>t</i> , Chi-Squared, and <i>F</i> Distributions . . . . .	97
3.1.7	Weibull Distribution . . . . .	99
3.1.8	Binomial Distribution . . . . .	99
3.1.9	Poisson Distribution . . . . .	100
3.1.10	Negative Binomial and Geometric Distributions . . . . .	101
3.1.11	Hypergeometric Distribution . . . . .	101
3.1.12	Logarithmic Distribution . . . . .	102
3.1.13	Other Specific Univariate Distributions . . . . .	102
3.1.14	General Families of Univariate Distributions . . . . .	104
3.2	Some Specific Multivariate Distributions . . . . .	105
3.2.1	Multivariate Normal Distribution . . . . .	105
3.2.2	Multinomial Distribution . . . . .	106

3.2.3	Correlation Matrices and Variance-Covariance Matrices . . . . .	107
3.2.4	Points on a Sphere . . . . .	109
3.2.5	Two-Way Tables . . . . .	110
3.2.6	Other Specific Multivariate Distributions . . . . .	111
3.3	General Multivariate Distributions . . . . .	112
3.3.1	Distributions with Specified Correlations . . . . .	112
3.3.2	Data-Based Random Number Generation . . . . .	115
3.4	Geometric Objects . . . . .	117
	Exercises . . . . .	118
<b>4</b>	<b>Generation of Random Samples and Permutations</b>	<b>121</b>
4.1	Random Samples . . . . .	121
4.2	Permutations . . . . .	123
4.3	Generation of Nonindependent Samples . . . . .	124
4.3.1	Order Statistics . . . . .	125
4.3.2	Nonindependent Sequences: Nonhomogeneous Poisson Process . . . . .	126
4.3.3	Censored Data . . . . .	127
	Exercises . . . . .	128
<b>5</b>	<b>Monte Carlo Methods</b>	<b>131</b>
5.1	Evaluating an Integral . . . . .	131
5.2	Variance of Monte Carlo Estimators . . . . .	133
5.3	Variance Reduction . . . . .	135
5.3.1	Analytic Reduction . . . . .	135
5.3.2	Antithetic Variates . . . . .	136
5.3.3	Importance and Stratified Sampling . . . . .	137
5.3.4	Common Variates . . . . .	137
5.3.5	Constrained Sampling . . . . .	138
5.3.6	Latin Hypercube Sampling . . . . .	138
5.4	Computer Experiments . . . . .	140
5.5	Computational Statistics . . . . .	141
5.5.1	Monte Carlo Methods for Inference . . . . .	141
5.5.2	Bootstrap Methods . . . . .	142
5.6	Evaluating a Posterior Distribution . . . . .	145
	Exercises . . . . .	146
<b>6</b>	<b>Quality of Random Number Generators</b>	<b>151</b>
6.1	Analysis of the Algorithm . . . . .	151
6.2	Empirical Assessments . . . . .	154
6.2.1	Statistical Tests . . . . .	154
6.2.2	Anecdotal Evidence . . . . .	158
6.3	Quasirandom Numbers . . . . .	159
6.3.1	Halton Sequences . . . . .	160

6.3.2	Sobol' Sequences . . . . .	161
6.3.3	Comparisons . . . . .	162
6.3.4	Variations . . . . .	163
6.3.5	Some Examples of Applications . . . . .	163
6.3.6	Computations . . . . .	164
6.4	Programming Issues . . . . .	164
	Exercises . . . . .	164
<b>7</b>	<b>Software for Random Number Generation</b>	<b>167</b>
7.1	The User Interface for Random Number Generators . . . . .	168
7.2	Controlling the Seeds in Monte Carlo Studies . . . . .	169
7.3	Random Number Generation in IMSL Libraries . . . . .	169
7.4	Random Number Generation in S-Plus . . . . .	172
	Exercises . . . . .	174
<b>8</b>	<b>Monte Carlo Studies in Statistics</b>	<b>177</b>
8.1	Simulation as an Experiment . . . . .	178
8.2	Reporting Simulation Experiments . . . . .	180
8.3	An Example . . . . .	180
	Exercises . . . . .	190
<b>A</b>	<b>Notation and Definitions</b>	<b>193</b>
<b>B</b>	<b>Solutions and Hints for Selected Exercises</b>	<b>199</b>
<b>Bibliography</b>		<b>205</b>
Literature in Computational Statistics . . . . .	206	
World Wide Web, News Groups, List Servers, and Bulletin Boards . . . . .	208	
References . . . . .	211
