CHAPTER 1

History of Estrogen Research

C. LAURITZEN	1
A. The Classical Experiments of Extirpation and Reimplantation	1
I. Ovarian Extracts	1
B. Isolation of Estrogens	1
C. Analysis of the Steroid Structure; Nomenclature and Standardization	2
D. Partial and Total Synthesis of Estrogens	2
E. Localization of the Estrogen Production	2
F. Estrogens in Body Fluids and Tissues	3
G. Estrogens in Food	3
H. Estrogen Determination	4
I. Estradiol Effects at the Target Organs	4
I. Vagina and Endometrium	4
II. Breasts	4
III. Hypothalamus and Pituitary	4
J. Biogenesis and Metabolism of Estrogens	5
K. Physiological Effects of Estrogens	5
I. Genomic Actions	5
II. Non-genomic Actions	6
L. Mechanism of Action of Estrogens	6
M. Effects on Lipids	6
N. Effects on Coagulation	7
O. Estrogens in Pregnancy	7
P. Fetal Endocrinology	7
Q. Estrogens for Treatment	7
I. Preparations	7
II. Treatment of Cycle Anomalies, Bleeding Disturbances and Dysmenorrhea	8
R. Side Effects of Estrogens	8
S. Treatment in Pregnancy	8
T. Treatment of Climacteric Complaints	8

U. Estrogens and Carcinogenesis	9
V. Estrogens and Life Expectancy	9
References	10

Part 1: Chemistry of Estrogens and Antiestrogens

CHAPTER 2

Steroidal Estrogens

G. NEEF	17
A. Introduction	17
B. Total Synthesis	18
C. Partial Synthesis	20
I. Ring-A Substitution	21
II. Ring-B Substitution	25
III. Ring-C Substitution	28
IV. Ring-D Substitution	30
V. The Periphery	33
D. Labeling of Estradiol and its Derivatives	34
E. Bioconversions of Estrogens	35
References	35

CHAPTER 3

Non-stEROidal Estrogens

J.A. DODGE and C.D. JONES	43
A. Introduction	43
B. Structural Classifications of Non-Steroidal Estrogens	44
I. 1,2-Diarylethanes and Ethylenes	44
1. Diethylstilbestrol (DES), hexestrol (HES) and Analogues	44
2. Structure – Activity Relationships	45
3. DES Metabolites	46
II. Flavones and Isoflavones	47
III. Macrolactones	47
IV. Alkylphenols and Arylphenols	49
V. Non-Aromatic Estrogens	49
VI. Miscellaneous Non-Steroidal Templates	50
C. Conclusions	50
References	50

CHAPTER 4

Antiestrogens and Partial Agonists

E. von ANGERER, With 17 Figures	55
---------------------------------------	----

Contents	XIII
A. Introduction	55
B. Triphenylethylene Derivatives	56
I. Tamoxifen	56
II. Triphenylethylene Derivatives Related to Tamoxifen	57
III. Fixed-Ring Analogues of Tamoxifen	61
IV. 1,2,3-Triarylpropenone-Derived Antiestrogens	63
C. Diphenylethylene Derivatives	66
I. 1,1-Diphenylethylene-Derived Agents	66
II. 1,2-Diphenylethylene Derivatives	67
III. 2-Phenylindoles and Related Heterocycles	68
D. Steroidal Compounds	70
I. 7α -Substituted Estradiol Derivatives	70
II. 11β -Substituted Estradiol Derivatives	72
E. Conclusion	74
References	75

CHAPTER 5

Structure – Activity Relationships

E. von ANGERER. With 2 Figures	81
A. Introduction	81
B. Estrogens and Antiestrogens with a Modified Steroid Structure	82
I. Modifications of the A Ring	84
II. Modifications of the D Ring	84
III. Modifications of the B Ring	85
IV. Modifications of the C Ring	87
V. Conclusion	87
C. Non-Steroidal Estrogens and Antiestrogens	90
I. Derivatives of Diethylstilbestrol	90
II. 2-Phenylindole Derivatives	91
III. 2-Phenylbenzo[b]thiophene Derivatives	94
IV. Triphenylethylene Derivatives	94
V. 2,3-Triphenyl-2H-1-Benzopyrans and Related Structures	98
VI. Conclusion	100
References	101

Part 2: Molecular Biology of Estrogenic Action

CHAPTER 6

Structure and Function of the Estrogen Receptor

A.K. HIHI and W. WAHLI. With 3 Figures	111
--	-----

A. Introduction	111
B. Structure of the Estrogen Receptor	111
I. The A/B Domain	112
II. The DNA-Binding Domain	112
III. The Ligand-Binding Domain	115
C. ER Functions and Transcription	116
I. ER DNA-Binding Properties	116
II. ER Ligand-Independent Activity	117
III. Ligand-Dependent Transcriptional Activity	117
D. ER Isotype Diversity Generates Specificity	120
I. ER α and ER β Heterodimerization	120
II. Tissue Distribution and Ligand Binding	120
III. ER α and ER β Differential Activity	121
E. ER α Knock-Out Mouse: A Functional Model	122
F. Future Directions	122
References	123

CHAPTER 7

Estrogen-Regulated Genes

A. WEISZ	127
A. Introduction	127
B. Transcriptional Control of Gene Activity by Estrogens	129
I. Molecular and Cellular Determinants of Gene Responses to Estrogens	130
1. The Estrogen Receptors	130
2. Estrogen-Responsive Gene Elements	132
a) Estrogen Response Elements and Other Estrogen-Responsive DNA Elements	132
b) Target Gene Promoters	135
3. The Target Cell Environment	135
C. Non-transcriptional Control of Gene Activity by Estrogens	137
I. Post-transcriptional Effects of Estrogens	138
II. Extra-Genomic Effects of Estrogens	139
References	139

CHAPTER 8

Regulation of Constitutive and Inducible Nitric Oxide Synthase by Estrogen

K. KAUSER and G.M. RUBANYI. With 6 Figures	153
A. Introduction	153
B. Isoenzymes of NOS	153
I. Nitric Oxide Synthase-I	154

Contents	XV
II. Nitric Oxide Synthase-II	154
III. Nitric Oxide Synthase-III	155
C. Regulation of NOS Isoenzymes by 17β -Estradiol	155
I. Inhibition of NOS-II Activity by 17β -Estradiol	155
II. Upregulation of Endothelial NOS-III Activity by 17β -Estradiol	156
1. Gender Difference and the Effect of 17β -Estradiol on Endothelial Function	158
2. Potential Mechanism of Estrogen-Induced Increased Endothelial NO Production	159
a) NOS-III Gene Expression	159
b) NOS-III Enzyme Activity	161
c) Bioactivity of NO	162
3. Role of the Estrogen Receptor in the Regulation of NOS-III	162
4. Role of Increased Endothelial NO in the Anti-Atherosclerotic Effect of 17β -Estradiol	164
D. Summary	165
References	166

CHAPTER 9

Non-Genomic Effects of Estrogens

V.D. RAMIREZ and J. ZHENG. With 5 Figures	171
List of Abbreviations	171
A. Introduction	172
B. Evidence for Fast Estradiol-Evoked Biological Responses	173
I. Central Biological Responses	173
1. Fast Estradiol Effects on the Catecholamine System	173
2. Fast Estradiol Effects on the Hippocampus	174
3. Fast Estradiol Effects on Other Areas of the Central Nervous System	176
II. Peripheral Biological Responses	177
C. Evidence for Specific Estradiol Binding Sites in Cellular Membranes	180
I. Central Sites	180
II. Peripheral Sites	181
D. Evidence for Diverse Protein Estrogen Binders	182
I. Estrogen Binders in Plasmalemmal Microsomal Fractions	182
II. Estrogen Binders in Mitochondrial Lysosomal Fractions	184
III. Estrogen Binders from Other Origins	184

E. Diverse Mechanisms in the Fast Actions of Estradiol	186
I. Channel Regulator	187
1. Ca ²⁺ Channels	187
2. Others	187
II. Transduction Activator	188
1. Cyclic Adenosine Monophosphate (cAMP)	188
2. Phospholipase C (PLC)	188
3. Mitogen-Activated Protein Kinase (MAPK)	188
III. Metabolic Regulator	189
1. ATPase/ATP Synthase	189
2. Glyceraldehyde-3-Phosphate Dehydrogenase (G3PD)	190
3. Others	191
F. Overview and Concluding Remarks	192
I. The Continuum Theory	192
References	193

CHAPTER 10

Molecular Mechanisms of Antiestrogen Action

L.T. SEERY, J.M.W. GEE, O.L. DEWHURST, and R.I. NICHOLSON	201
A. Introduction	201
B. Key Elements in Estrogen-Receptor Signalling Important for Antiestrogen Action	202
C. Molecular Actions of Antiestrogens	204
I. Effects of Antiestrogens on Binding to the Receptor, Dimerisation and Nuclear Localisation	205
II. Effects of Antiestrogens on Estrogen Receptor (ER) – Estrogen Response Element (ERE) Binding and Subsequent Transcriptional Activation	205
1. Altered ER – ERE Binding Efficiency	205
2. Changes in ER Conformation Influence AF-2 Activity	206
3. Effects Enabled by AF-1 and the Phenomenon of AF-1/AF-2 Promoter Dependency	206
4. Effects Enabled by the Cellular Levels of Co-Activators/Co-Repressors	207
5. Effects on Ligand-Independent ERE Transactivation	207
6. Effects Enabled by Promoter Elements and ERE Sequence	208
7. Effects Enabled by ER Sub-Type	208
III. Effects on AP-1- and NF-κB-Mediated Transactivation	208

IV. Effects on Antiestrogen-Specific Response	
Elements	209
V. Effects on ER Degradation	209
VI. Non-ER Action of Antiestrogens	209
D. Modifying Effects of the Normal Cellular Phenotype on Antiestrogen Response	210
E. Modifying Effects of the Cancer Cell Phenotype on Antiestrogen Response	212
F. Conclusions	213
References	213

Part 3: Biosynthesis and Metabolism of Endogenous Estrogens

CHAPTER 11

Estrogen Transforming Enzymes

M.J. REED and A. PUROHIT. With 2 Figures	223
A. Introduction	223
B. Metabolism of Estradiol by 17 β -Hydroxysteroid Dehydrogenase Type 2 (HSD2)	223
I. 17 β HSD Superfamily	223
II. Tissue Distribution	225
III. Regulation of 17 β HSD2	226
C. Cytochrome P ₄₅₀ Mono-Oxygenase Hydroxylation of Estrogens	227
I. Cytochrome P ₄₅₀ S	227
II. C2-and C16 α -Hydroxylation of Estrogens	227
1. Effect of 2- or 16 α -Hydroxylation on Metabolite Estrogenicity	227
2. Modulation by Thyroid Hormones, Body Weight and Diet	227
3. Effect of Smoking on C2/C16 α -Hydroxylation	228
4. C2/C16 α -Hydroxylation and Breast Cancer	229
5. Induction of C2-Hydroxylation by Indole-3- Carbinol	229
6. C2/C16 α -Hydroxylation in Different Ethnic Groups	230
7. Effect of Pesticides on C2/C16 α -Estrogen Hydroxylation	231
8. Inhibition of C2-Hydroxylation	231
9. Estrogen-2-Hydroxylation by Placental Aromatase	231
D. Catechol Estrogens and Carcinogenesis	232
E. Estrogen Sulphates	233
I. Estrogen Sulphate Formation	233
II. Biological Role of Estrogen Sulphation	233
III. Regulation of Estrogen Sulphation	234

F. Estrogen Glucuronides	235
G. Lipothal Estrogens	235
H. Conclusions	237
References	237

CHAPTER 12

Metabolism of Endogenous Estrogens

T.H. LIPPERT, H. SEEGER, and A.O. MUECK. With 3 Figures	243
A. Introduction	243
I. Estradiol Breakdown Mechanisms	243
II. Sex Differences in Estradiol Metabolism	246
III. Catechol Estrogen Metabolism	248
B. Estrogen Metabolism and Disease	249
I. Breast Cancer	251
II. Endometrial Cancer	252
III. Cervical Cancer	253
IV. Prostate Cancer	253
V. Papilloma of the Larynx	254
VI. Liver Disease	254
VII. Lupus Erythematosus	255
VIII. Disease of the Thyroid	255
IX. Weight Changes	256
X. Depression	256
XI. Osteoporosis	257
C. Drugs	257
D. Lifestyle	259
E. Pregnancy	261
I. Changes in Metabolism During Pregnancy	264
References	265

Part 4: Physiology and Pathophysiology of Estrogens

CHAPTER 13

Phylogeny of Estrogen Synthesis, Extranodal Distribution of Estrogen Receptors and Their Development Role

L. SOBEK and V.K. PATCHEV	275
A. Phylogeny of Estrogen Synthesis	275
B. Extranodal Distribution of Estrogen Receptors and Their Functional Significance	276
I. Breast	276

II. Bone	276
III. Gastrointestinal Tract	277
IV. Cardiovascular System	278
V. Immune System	278
VI. Pituitary	279
VII. Central Nervous System	280
VIII. Membrane-Bound ERs	281
C. Hormonal Regulation of ER Synthesis	282
I. Estrogens	282
II. Thyroid Hormones	283
III. Progesterone	283
IV. Androgens	283
V. Glucocorticoids	284
VI. Neurotransmitters	284
D. Developmental Role of ERs as Exemplified by Hormone-Dependent Brain Differentiation	285
References	288

CHAPTER 14

Female Reproductive Tract

C. HEGELE-HARTUNG. With 4 Figures	299
A. Embryology of the Reproductive Tract	299
B. Sex Differentiation	300
I. Genetic Sex	300
II. Gonadal Sex	301
1. Male	301
2. Female	302
III. Somatic Sex	302
1. Male Sex Differentiation	302
2. Female Sex Differentiation	303
3. Estrogens and Sex Differentiation	304
C. Estrogens and Ovary	304
D. Fallopian Tubes	305
I. Steroidal Regulation	305
E. Uterus	306
I. Estrogen Regulation	307
II. Estrogens and Uterine Pathology	309
F. Cervix	309
I. Estrogen Regulation	309
G. Vagina	310
I. Estrogens and Vaginal Pathology	310
References	310

CHAPTER 15**Estrogen and Brain Function: Implications for Aging and Dementia**

S.E. ALVES and B.S. McEWEN	315
List of Abbreviations	315
A. Introduction	315
B. Current Views on Estrogen's Mechanism of Action	316
C. Non-Reproductive Brain Functions Influenced by Estrogen	317
I. Cognition (Learning and Memory)	317
1. Basal Forebrain Cholinergic System	317
2. Hippocampal γ -Aminobutyric Acid (GABA) Interneurons	318
3. Hippocampal CA1 Pyramidal Neurons	318
II. Psychological Function	319
1. Midbrain Serotonergic Neurons	319
III. Sensorimotor Performance	321
1. Nigrostriatal Dopaminergic System	321
IV. Non-Neuronal Functions: "Brain Maintenance"	322
1. Glial Cells	322
2. Endothelial Cells of the Blood – Brain Barrier (BBB) ..	323
D. Summary	324
References	324

CHAPTER 16**Cardiovascular System**

M. BIRKHÄUSER. With 4 Figures	329
A. Introduction	329
B. Cardioprotective Mechanism of Estrogens	331
I. Indirect Action on the Cardiovascular System by a Change of the Lipid Balance	331
1. Atherogenic Lipoproteins	331
2. High-Density Lipoprotein	332
3. Lipoprotein (a)	332
4. Influence of Estrogen Replacement Therapy and HRT on the Lipid Profile	333
II. Direct Effect of Estrogens on the Vascular Wall	333
C. Influence of Progesterone and Progestagens	337
D. Conclusion	338
References	338

CHAPTER 17**Immune System**

E. NAGY, E. BARAL, and I. BERCZI. With 1 Figure	343
---	-----

A. Introduction	343
B. Effect on Primary Lymphoid Tissue	343
I. The Effect of Estrogens	343
1. The Bone Marrow	343
2. The Thymus	344
C. Effect on Immune Function	344
I. The Effect of Estrogens	344
1. Receptors	344
2. Cytokines	344
3. Humoral Immunity	345
4. Cell-Mediated Immunity	345
5. Inflammation	345
II. The Effect of Anti-Estrogens	346
1. Lymphocytes	346
2. Humoral Immunity	346
3. Cell-Mediated Immunity	346
4. Inflammation	347
D. Conclusions	347
References	348

CHAPTER 18

Male Reproductive Function

M. SIMONI and E. NIESCHLAG	353
A. Introduction	353
B. Source of Estrogen in the Male	353
C. Localization of the Estrogen Receptor in the Male Genital Tract	353
D. Function of Estrogens in the Male	355
I. Bone Maturation	355
II. Testicular Function	355
III. Prostate	357
IV. Behavior	358
E. Conclusions	358
References	359

CHAPTER 19

The Effect of Estrogens and Antiestrogens on the Urogenital Tract

A. HEXTALL and L. CARDOZO. With 2 Figures	363
A. Introduction	363
B. Pathophysiology	363
I. Hormonal Influences on the Urogenital Tract	363
II. The Effect of Ageing on the Bladder	364

C. Estrogen and Urinary Incontinence	365
I. Epidemiological Studies	365
II. Estrogen and the Continence Mechanism	367
III. Estrogens for Stress Incontinence	368
IV. Estrogens for Urge Incontinence	370
D. Estrogen for Recurrent Urinary-Tract Infections	370
E. Estrogen for Vaginal Atrophy	371
F. Antiestrogens and the Urogenital Tract	372
G. Conclusions	373
References	373

CHAPTER 20

Effects of Estrogens on Various Endocrine Regulations

F. GOMEZ	379
A. The Complexity of Estrogen's Action on Various Tissues	379
I. Introduction	379
II. Estrogen Receptor-Mediated Tissue Specificity	379
III. Sex-Hormone-Binding Globulin-Mediated Estrogenic Action	380
B. Estrogens and the Thyroid	381
I. Sexual Dimorphism in Thyroid Disease	381
II. The Effect of Estrogens in Thyroid Enlargement	381
III. Thyroid Dysfunction	382
IV. Thyroid Hormone-Binding Globulin	382
V. Thyrotropin Regulation	383
C. Estrogens and the Adrenal Glands	384
I. Sexual Dimorphism in Adrenal Disease?	384
II. Regulation of Adrenal Sex-Steroid Precursors	384
III. Anti-toxic Properties of the Adrenal Glands	385
IV. Corticosteroid-Binding Globulin	386
V. Corticotropin Regulation	386
D. Estrogens and the Phosphocalcic Metabolism	387
I. Bone Remodeling and Calcium Kinetics	387
II. Parathyroid Hormone	389
III. Vitamin D	390
References	391
Subject Index	397
