

Table of contents

Table of contents	i
List of tables	iv
List of figures	vii
List of Abbreviations, Acronyms, and Units	viii
1. Introduction	1
2. Literature review	4
2.1. Agriculture in Ethiopia	4
2.1.1. Prevailing production status	4
2.1.2. Agricultural research aspects	7
2.1.2.1. Background information	7
2.1.2.2. Systems approach	9
2.2. Livestock production systems	12
2.2.1. Pastoral livestock production	13
2.2.2. Mixed crop-livestock production	13
2.3. The sheep production sector	18
2.3.1. Existing production status	18
2.3.2. Flock demographic structure	19
2.3.3. Reproductive performance	21
2.3.3.1. Age at first lambing	21
2.3.3.2. Lambing interval	23
2.3.3.3. Litter size and annual lambing rate	25
2.3.4. Growth performance	27
2.3.4.1. Pre-weaning growth rate	27
2.3.4.2. Post-weaning growth rate	29
2.3.5. Flock mortality and causes of death	30
2.3.5.1. Pre-weaning mortality	30
2.3.5.2. Post-weaning mortality	31
2.3.5.3. Causes of death	31
2.3.6. Flock off-take and growth rate	31
2.3.7. Productivity	32
2.4. The present study area	33
2.4.1. Location, climate and vegetation	36
2.4.2. Agricultural production systems	38

2.4.3. The sheep production system	39
3. Materials and methods	41
3.1. Approach and framework of the study	41
3.3. The study sample	42
3.4. Data collection and preparation	43
3.4.1. Socio-economic data	43
3.4.2. Sheep production monitoring data	44
3.5. Statistical analysis	45
3.5.1. Analysis plan	45
3.5.2. Socio-economic data analysis	46
3.5.3. Sheep production data analysis	47
4. Results and discussion	51
4.1. Farming systems	51
4.1.1. Results	51
4.1.1.1. Household resources	51
4.1.1.2. Livestock herd and sheep flock size	56
4.1.1.3. Area cultivated and quantity of grain produced	56
4.1.2. Discussion	57
4.1.2.1. Effect of family size on livestock herd and sheep flock size	57
4.1.2.2. Effect of landholding size and grazing area on livestock herd and sheep flock size	58
4.1.2.3. Area cultivated and quantity of grain produced	59
4.2. Flock structure	60
4.2.1. Results	60
4.2.2. Discussion	60
4.3. Reproductive performance	62
4.3.1. Results	62
4.3.1.1. Age at first lambing	62
4.3.1.2. Lambing interval	63
4.3.1.3. Litter size	65
4.3.1.4. Annual lambing rate	67
4.3.2. Discussion	68
4.3.2.1. Age at first lambing	68
4.3.2.2. Lambing interval	70

4.3.2.3. Litter size	71
4.3.2.4. Annual lambing rate	72
4.4. Disposal, survival rate and causes of losses	74
4.4.1. Results	74
4.4.1.1. Description	74
4.4.1.2. Survival rate	74
4.4.1.3. Causes of losses	77
4.4.2. Discussion	78
4.5. Growth performance	81
4.5.1. Results	81
4.5.1.1. Weight and growth rates of young lambs	81
4.5.1.2. Weight development at ages above one year	91
4.5.2. Discussion	94
4.5.2.1. Birth weight	94
4.5.2.2. Pre-weaning weight and growth rate	96
4.5.2.3. Post-weaning weight and growth rates	99
4.5.2.4. Weight development at ages above one year	100
4.6. Productivity	102
4.6.1. Results	102
4.6.2. Discussion	105
4.7. Relationships between birth and off-take rates	107
4.7.1. Results	107
4.7.2. Discussion	108
5. Concluding discussion	110
5.1. The significance of sheep rearing for the smallholder farmer	110
5.2. Constraints to improved sheep production	110
5.3. Methodological considerations for improved sheep production	111
6. Conclusions and recommendations	113
7. Summary	115
8. Zusammenfassung	117
References	120

List of Tables

Table 2.1. Per capita agricultural output and food consumption in Ethiopia from 1979/92	5
Table 2.2. Agricultural production systems in the Ethiopian highlands	14
Table 2.3. Main factors influencing enterprise choice and productivity of an Ethiopian smallholder	17
Table 2.4. Village sheep structure by age and sex	21
Table 2.5. Age at first lambing of some African indigenous sheep	23
Table 2.6. Lambing intervals of some African indigenous sheep	24
Table 2.7. Litter size and annual lambing rate of some African indigenous sheep	26
Table 2.8. Weights of some tropical sheep breeds at specified ages	28
Table 2.9. Mortality rates of some tropical sheep at specified ages	30
Table 2.10. Some contrasting characteristics of the study areas	35
Table 3.1. Type of information collected by location	42
Table 3.2. The study sample	42
Table 3.3. Parameters studied	43
Table 3.4. Data analysis plan	45
Table 4.1.1. Description of households	51
Table 4.1.2. Partial correlation coefficients and mean squares for livestock herd size and sheep flock size	56
Table 4.1.3. Least squares means and standard errors for area cultivated and quantity of grain produced	57
Table 4.2.1. The age and sex structure of the sheep flocks in Debre Brehan and Inewari areas	60
Table 4.3.1. Mean squares from the analysis of variance for the age at first lambing	62

Table 4.3.2. Least squares means for the age at first lambing	63
Table 4.3.3. Mean squares from the analysis of variance for lambing interval	64
Table 4.3.4. Least squares means for lambing interval	65
Table 4.3.5. Mean squares from the analysis of variance for litter size	66
Table 4.3.6. Least squares means for litter size	67
Table 4.3.7. Results from the analysis of variance for annual lambing rate	67
Table 4.3.8. Least squares means for the annual lambing rate	68
Table 4.4.1. Sheep disposal reasons	74
Table 4.4.2. Lamb survival rate and standard errors within specified pre-weaning ages	75
Table 4.4.3. Lamb survival rate and standard errors from birth up to 90, 180 and 365 days	76
Table 4.4.4. Causes of sheep losses in Debre Brehan	77
Table 4.4.5. Causes of sheep losses in Inewari	78
Table 4.5.1. Results from the analysis of variance for weight of young lambs of up to one year of age in Debre Brehan	82
Table 4.5.2. Results from the analysis of variance for weight of young lambs of up to one year of age in Inewari	83
Table 4.5.3. Least squares means for weight of young lambs of up to one year of age in Debre Brehan	84
Table 4.5.4. Least squares means for weight of young lambs of up to one year of age in Inewari	85
Table 4.5.5. Results from the analysis of variance for weight gains of young lambs from birth up to one year of age in Debre Brehan	87
Table 4.5.6. Results from the analysis of variance for weight gains of young lambs from birth up to one year of age in Inewari	88
Table 4.5.7. Least squares means for weight gains of young lambs from birth up to one year of age in Debre Brehan	89

Table 4.5.8. Least squares means for weight gains of young lambs from birth up to one year of age in Inewari	90
Table 4.5.9. Results from the analysis of variance for weight development at ages above one year	92
Table 4.5.10. Least square means for weight development at ages above one year	93
Table 4.6.1. Results from the analysis of variance for productivity indices in Menz sheep in Debre Brehan	102
Table 4.6.2. Least squares means for productivity indices in Menz sheep in Debre Brehan	103
Table 4.6.3. Results from the analysis of variance for productivity indices in Menz sheep in Inewari	104
Table 4.6.4. Least squares means for productivity indices in Menz sheep in Inewari	104

List of Figures

Fig. 3.1. The Highland regions of Ethiopia	34
Fig. 3.2. Mean monthly rainfall distribution in the region of the present study areas	37
Fig. 4.1.1. Regression of grain production on family size, livestock herd size and landholding size	53
Fig. 4.1.2. Regression of area cultivated on family size, livestock herd size and landholding size	54
Fig. 4.1.3. Regression of livestock herd size on landholding size and on family size	55
Fig. 4.7.1. Monthly distribution of births, sales and consumption in Menz sheep in Debre Brehan and Inewari areas	107
Fig. 4.7.2. Frequency distribution of animals sold or slaughtered for consumption at home within one year of age by age at disposal	108
