

S.E. Ahmed
N. Reid (Editors)

Empirical Bayes and Likelihood Inference

Springer

Contents

List of Contributors	xiii
1 Bayes/EB Ranking, Histogram and Parameter Estimation: Issues and Research Agenda	1
<i>T.A. Louis</i>	
1 Introduction	1
2 Model and Inferential Goals	2
3 Triple-Goal Estimates	4
4 Triple Goal Evaluations	5
5 Correlated θ 's and Unequal l_k	9
6 Research Agenda	12
7 References	15
2 Empirical Bayes Estimators and EM Algorithms in One-Way Analysis of Variance Situations	17
<i>I. Guttman</i>	
1 The Model	17
2 Some Analysis Derived From the Hierarchical Model	18
3 Large Sample Properties of the Estimates: The Collapsing Effect	21
4 Mean Square Considerations	23
5 The EM Algorithm in the One-Way Situation: Case σ_y^2 Unknown	27
6 References	32
3 EB and EBLUP in Small Area Estimation	33
<i>J.N.K. Rao</i>	
1 Introduction	33
2 Type 1 Model	35
3 Type 2 Model	39
4 References	41
4 Semiparametric Empirical Bayes Estimation in Linear Models	45
<i>P.K. Sen</i>	
1 Introduction	45
2 Preliminary Notions	46
3 Empirical Bayes Interpretations	48
4 BAN Estimators: Empirical Bayes Versions	52
5 Semiparametric Empirical Bayes Estimators	55

4	BAN Estimators: Empirical Bayes Versions	52
5	Semiparametric Empirical Bayes Estimators	55
6	Some Concluding Remarks	61
7	References	63
5	Empirical Bayes Procedures for a Change Point Problem with Application to HIV/AIDS Data	67
	<i>S.-L.T. Normand and K. Doksum</i>	
1	Introduction	67
2	Gaussian Models	68
3	Estimation of Parameters	71
4	Application to the SFMHS Cohort	73
5	Discussion	77
6	References	78
6	Bayes and Empirical Bayes Estimates of Survival and Hazard Functions of a Class of Distributions	81
	<i>M. Ahsanullah and S.E. Ahmed</i>	
1	Introduction	81
2	Estimation Strategies	82
3	Numerical Results	85
4	References	87
7	Bayes and Empirical Bayes Procedures for Selecting Good Populations From a Translated Exponential Family	89
	<i>R.S. Singh</i>	
1	Introduction	89
2	Bayes and Empirical Bayes Approach	91
3	Development of Empirical Bayes Procedures	93
4	Asymptotic Optimality of the EB Procedures and Rates of Convergence	96
5	Concluding Remarks and Extension of the Results	99
6	References	99
8	Shrinkage Estimation of Regression Coefficients From Censored Data With Multiple Observations	103
	<i>S.E. Ahmed</i>	
1	Preliminaries and Introduction	103
2	Preliminary Test Estimation	110
3	Shrinkage Estimation	114
4	Positive-Part Shrinkage Estimation	116
5	Recommendations and Concluding Remarks	118
6	Appendix	119
7	References	119

9 Bayesian and Likelihood Inference for the Generalized Fieller–Creasy Problem	121
<i>M. Yin and M. Ghosh</i>	
1 Introduction	121
2 Likelihood Based Analysis	123
3 Noninformative Priors	125
4 Propriety of Posteriors	128
5 Simulation Study and Discussion	130
6 Appendix	135
7 References	137
10 The Estimation of Ratios From Paired Data	141
<i>D.A. Sprott</i>	
1 Introduction	141
2 The Standard Analysis; Assumption (a)	143
3 An Approximate Conditional Location-Scale Model; Assump- tion (b)	145
4 A Full Location-Scale Model; Assumption (c)	147
5 Examples	150
6 The Linear Functional Relationship	154
7 Discussion	156
8 References	158
11 Meta-Analysis: Conceptual Issues of Addressing Apparent Failure of Individual Study Replication or “Inexplicable” Heterogeneity	161
<i>K. O’Rourke</i>	
1 Introduction	161
2 MA and RCT Background	163
3 History Overview	164
4 Current Likelihood Based Methods for MA	166
5 Examples of EB, CL and HB Approaches	167
6 Future Directions	170
7 Initial Conclusions	172
8 A Bayesian Afterthought	173
9 Final Conclusions	174
10 Re-Analysis of Examples	175
11 What is a MA and When Should It Be Done	179
12 References	180
12 Ancillary Information for Statistical Inference	185
<i>D.A.S. Fraser and N. Reid</i>	
1 Introduction	185
2 Third Order Statistical Inference	187
3 First Derivative Ancillary	189

4	Bending and Tilting	192
5	Second Order Coordinates for a Data Component	195
6	Second Order Ancillary Directions	197
7	First Order Ancillary Directions	200
8	Examples	204
9	References	207
13	The Relevance Weighted Likelihood With Applications	211
	<i>F. Hu and J.V. Zidek</i>	
1	Introduction	211
2	The Relevance Weighted Likelihood	212
3	Applying the NP-REWL	216
4	Applying the P-REWL	221
5	Discussion	225
6	Appendix: Proofs of the Theorems	226
7	References	234
