# Matrix Groups

**An Introduction to Lie Group Theory**

With 16 Figures

Springer

---

## Part I. Basic Ideas and Examples

---

<b>1. Real and Complex Matrix Groups</b>	<b>3</b>
1.1 Groups of Matrices	3
1.2 Groups of Matrices as Metric Spaces	5
1.3 Compactness	12
1.4 Matrix Groups	15
1.5 Some Important Examples	17
1.6 Complex Matrices as Real Matrices	29
1.7 Continuous Homomorphisms of Matrix Groups	31
1.8 Matrix Groups for Normed Vector Spaces	33
1.9 Continuous Group Actions	37
<b>2. Exponentials, Differential Equations and One-parameter Subgroups</b>	<b>45</b>
2.1 The Matrix Exponential and Logarithm	45
2.2 Calculating Exponentials and Jordan Form	51
2.3 Differential Equations in Matrices	55
2.4 One-parameter Subgroups in Matrix Groups	56
2.5 One-parameter Subgroups and Differential Equations	59
<b>3. Tangent Spaces and Lie Algebras</b>	<b>67</b>
3.1 Lie Algebras	67
3.2 Curves, Tangent Spaces and Lie Algebras	71
3.3 The Lie Algebras of Some Matrix Groups	76

3.4	Some Observations on the Exponential Function of a Matrix Group .....	84
3.5	$SO(3)$ and $SU(2)$ .....	86
3.6	The Complexification of a Real Lie Algebra .....	92
4.	<b>Algebras, Quaternions and Quaternionic Symplectic Groups</b> .....	99
4.1	Algebras .....	99
4.2	Real and Complex Normed Algebras .....	111
4.3	Linear Algebra over a Division Algebra .....	113
4.4	The Quaternions .....	116
4.5	Quaternionic Matrix Groups .....	120
4.6	Automorphism Groups of Algebras .....	122
5.	<b>Clifford Algebras and Spinor Groups</b> .....	129
5.1	Real Clifford Algebras .....	130
5.2	Clifford Groups .....	139
5.3	Pinor and Spinor Groups .....	143
5.4	The Centres of Spinor Groups .....	151
5.5	Finite Subgroups of Spinor Groups .....	152
6.	<b>Lorentz Groups</b> .....	157
6.1	Lorentz Groups .....	157
6.2	A Principal Axis Theorem for Lorentz Groups .....	165
6.3	$SL_2(\mathbb{C})$ and the Lorentz Group $Lor(3, 1)$ .....	171

---

## Part II. Matrix Groups as Lie Groups

---

7.	<b>Lie Groups</b> .....	181
7.1	Smooth Manifolds .....	181
7.2	Tangent Spaces and Derivatives .....	183
7.3	Lie Groups .....	187
7.4	Some Examples of Lie Groups .....	189
7.5	Some Useful Formulæ in Matrix Groups .....	193
7.6	Matrix Groups are Lie Groups .....	199
7.7	Not All Lie Groups are Matrix Groups .....	203
8.	<b>Homogeneous Spaces</b> .....	211
8.1	Homogeneous Spaces as Manifolds .....	211
8.2	Homogeneous Spaces as Orbits .....	215
8.3	Projective Spaces .....	217
8.4	Grassmannians .....	222

8.5	The Gram–Schmidt Process .....	224
8.6	Reduced Echelon Form .....	226
8.7	Real Inner Products .....	227
8.8	Symplectic Forms .....	229
<b>9.</b>	<b>Connectivity of Matrix Groups .....</b>	<b>235</b>
9.1	Connectivity of Manifolds .....	235
9.2	Examples of Path Connected Matrix Groups .....	238
9.3	The Path Components of a Lie Group .....	241
9.4	Another Connectivity Result .....	244

---

### Part III. Compact Connected Lie Groups and their Classification

---

<b>10.</b>	<b>Maximal Tori in Compact Connected Lie Groups .....</b>	<b>251</b>
10.1	Tori .....	251
10.2	Maximal Tori in Compact Lie Groups .....	255
10.3	The Normaliser and Weyl Group of a Maximal Torus .....	259
10.4	The Centre of a Compact Connected Lie Group .....	262
<b>11.</b>	<b>Semi-simple Factorisation .....</b>	<b>267</b>
11.1	An Invariant Inner Product .....	267
11.2	The Centre and its Lie Algebra .....	270
11.3	Lie Ideals and the Adjoint Action .....	272
11.4	Semi-simple Decompositions .....	276
11.5	The Structure of the Adjoint Representation .....	278
<b>12.</b>	<b>Roots Systems, Weyl Groups and Dynkin Diagrams .....</b>	<b>289</b>
12.1	Inner Products and Duality .....	289
12.2	Roots systems and their Weyl groups .....	291
12.3	Some Examples of Root Systems .....	293
12.4	The Dynkin Diagram of a Root System .....	297
12.5	Irreducible Dynkin Diagrams .....	298
12.6	From Root Systems to Lie Algebras .....	299
	<b>Hints and Solutions to Selected Exercises .....</b>	<b>303</b>
	<b>Bibliography .....</b>	<b>323</b>
	<b>Index .....</b>	<b>325</b>
