Prefaces	V
List of Symbols	VII
Symbols for Languages	VII
Symbols in Chemical Structures	VII
Mathematical Symbols	VII
Averages and Other Markings	VII
Exponents and Superscripts	VIII
Indices and Subscripts	VIII
Physical Quantities	IX
Table of Contents	XIII

1 Introduction	1
1.1 Basic Terms	1
1.2 History of Plastics	4
1.3 Economic Importance	6
Literature	12
References	12

Polymers

2 Chemical Structure of Polymers	13
2.1 Constitution	13
2.1.1 Introduction	13
2.1.2 Linear Polymers	13
2.1.3 Branched Polymers	15
2.1.4 Unordered Networks	16
2.1.5 Ordered Chain Assemblies	17
2.1.6 Nomenclature	17
2.2 Molecular Weights	18
2.2.1 Molar Mass Averages	19
Number and Mass Averages	19
Absolute Methods	20
Viscometry	20
Rheometry	21
2.2.2 Molar Mass Distributions	22
2.3 Stereoisomerism	24
2.3.1 Configurational Isomerism	24
Definitions	24
Determination of Tacticity	26
2.3.2 Torsional Isomerism	26
2.3.3 Conformational Isomerism	27
Literature	28

3	Polymer Syntheses	31
3.1	Introduction	31
3.1.1	Raw Materials for Polymers	31
3.1.2	Classification of Syntheses	32
3.1.3	Polymer Formation	33
3.1.4	Thermodynamics of Polymerization	34
3.1.5	Polymerization Reactors	35
	Reactor Types	35
	Effect on Molecular Weight Distribution	37
3.1.6	Source and Process Based Terms	39
	Homopolymers	39
	Copolymers	40
3.2	Chain Polymerization	41
3.2.1	Overview	41
3.2.2	Free-Radical Polymerization	42
	Initiation	43
	Propagation	43
	Termination	44
	Chain Transfer	44
	Polymerization Kinetics	45
	Crosslinking Polymerizations	45
	Process Engineering	45
3.2.3	Anionic Polymerization	47
3.2.4	Cationic Polymerization	47
3.2.5	Coordination Polymerizations	48
3.2.6	Copolymerization	49
3.3	Polycondensation and Polyaddition	51
3.3.1	Introduction	51
3.3.2	Linear Polycondensation	52
3.3.3	Non-linear Polycondensation	54
3.3.5	Polyaddition	55
3.4	Polymer Reactions	55
3.4.1	Polymer Transformations	55
3.4.2	Formation of Block and Graft Copolymers	56
3.4.3	Crosslinking Reactions	57
3.4.4	Degradation Reactions	57
	Literature	58
	Reference	60
4	Physical Structure of Polymers	61
4.1	Solubility of Polymers	61
4.2	Dilute Solutions	62
4.2.1	Unperturbed Coils	62
4.2.2	Perturbed Coils	63
4.3	Concentrated Solutions and Melts	64
4.4	Non-crystalline States	66

4.4.1	Amorphous Polymers	66
4.4.2	Oriented Polymers	67
4.5	Crystalline Polymers	67
4.5.1	Introduction	67
4.5.2	Crystal Structure	68
4.5.3	Morphology	70
4.6	Mesophases	73
4.6.1	Introduction	73
4.6.2	Liquid Crystals	73
	Mesogens	73
	Thermotropic Liquid–Crystalline Polymers	75
	Lyotropic Liquid–Crystalline Polymers	75
4.6.3	Block Copolymers	76
4.6.4	Acidic Copolymers and Ionomers	78
4.7	Gels	79
4.8	Polymer Surfaces	80
4.8.1	Structure	80
4.8.2	Interfacial Tension	80
4.8.3	Adsorption	81
