

Andreas Behr

Investment and Liquidity Constraints

Empirical Evidence for Germany

A 238862

Deutscher Universitäts-Verlag

Contents

| | |
|--|-----------|
| 1. Introduction | 1 |
| 2. The Q-theory of investment and the role of internal funds | 5 |
| 2.1. The Q -Model | 6 |
| 2.1.1. The derivation of a linear investment equation | 10 |
| 2.2. Investment, information and incentive problems in capital markets | 12 |
| 2.2.1. Illustrating the link between net worth and capital | 13 |
| 2.2.2. Empirical tests of Capital-Market Imperfections | 14 |
| 2.3. Conclusion | 16 |
| 3. Dynamic panel data estimation | 18 |
| 3.1. The problem of bias caused by lagged dependant variables | 18 |
| 3.1.1. The idea of instrumentation | 19 |
| 3.1.2. Generalized Methods of Moments (GMM) | 21 |
| 3.2. Dynamic panel data estimators | 23 |
| 3.2.1. The bias of the fixed effects model | 23 |
| 3.2.2. Some proposed dynamic panel data estimators | 26 |
| 3.2.2.1. The Anderson-Hsiao estimator | 26 |
| 3.2.2.2. The Arellano-Bond estimator | 29 |
| 3.2.2.3. The Blundell-Bond estimator | 31 |
| 3.2.2.4. The direct bias correction | 33 |
| 3.2.2.5. An alternative bias correction method | 35 |
| 3.3. Monte Carlo study | 36 |
| 3.3.1. The case of a strictly exogenous explanatory variable | 36 |
| 3.3.2. The case of a predetermined endogenous explanatory variable | 43 |
| 3.4. Conclusion | 44 |
| 4. The data source and measurement problems | 46 |
| 4.1. The data source | 46 |
| 4.2. The capital stock at replacement costs: A new algorithm | 49 |
| 4.2.1. A short review of the literature | 50 |
| 4.2.1.1. The approach by Lindenberg und Ross | 50 |
| 4.2.1.2. "NBER-approach" by Hall et al. | 50 |
| 4.2.1.3. The approach by Lewellen and Badrinath | 51 |
| 4.2.1.4. Critique | 54 |
| 4.2.2. A new algorithm | 54 |
| 4.2.2.1. The basic idea | 54 |
| 4.2.2.2. The disaggregation of the first period's capital stock into different vintages | 56 |
| 4.2.2.3. The retirement of the investment vintages | 57 |

| | |
|---|-----------|
| 4.2.2.4. Disaggregation of the capital stock at the beginning of the initial year into its vintages and retirements | 59 |
| 4.2.3. A comparison of the different approaches | 61 |
| 4.2.4. Estimates of the capital stock | 64 |
| 4.2.4.1. The aggregate capital stock at replacement costs | 64 |
| 4.2.4.2. A comparison with official sectoral data | 66 |
| 4.3. The Calculation of Q | 68 |
| 4.3.1. An Overview of empirical work using the direct forecasting approach..... | 68 |
| 4.3.1.1. The approach of Abel and Blanchard | 69 |
| 4.3.1.2. The extension by Gilchrist and Himmelberg | 70 |
| 4.3.1.3. The distinction between equipment and structures | 71 |
| 4.3.2. The Calculation of Q using firm-level balance sheet data | 72 |
| 4.3.3. Calculating Tobin's Q (average Q) | 72 |
| 4.3.4. Calculating marginal Q | 76 |
| 4.3.5. Empirical Results | 79 |
| 4.4. Conclusion | 82 |
| 5. Empirical findings | 84 |
| 5.1. Nonparametric regression results | 85 |
| 5.1.1. Aggregate investment..... | 85 |
| 5.1.2. Disaggregate investment | 87 |
| 5.1.2.1. Equipment | 87 |
| 5.1.2.2. Structures | 90 |
| 5.2. Aggregate and disaggregate Q -investment functions..... | 92 |
| 5.2.1. Aggregate investment..... | 92 |
| 5.2.2. Equipment | 94 |
| 5.2.3. Structures..... | 95 |
| 5.2.4. Results for classes of firm size..... | 95 |
| 5.2.5. Results for three main sectors | 98 |
| 5.3. Testing for liquidity effects in three sectors: manufacturing, construction, commerce..... | 101 |
| 5.3.1. Liquidity effects in manufacturing firms investment behavior | 101 |
| 5.3.1.1. Results for classes of firm size..... | 103 |
| 5.3.1.2. Stock measure of internal funds and the cash flow influence..... | 106 |
| 5.3.1.3. Measures of the bank-relation of firms and the cash flow influence..... | 111 |
| 5.3.1.4. Debt service of firms and the cash flow influence..... | 116 |
| 5.3.1.5. Conclusion | 121 |
| 5.3.2. Liquidity effects in construction firms investment behavior | 123 |
| 5.3.2.1. Stock measure of internal funds and the cash flow influence..... | 124 |
| 5.3.2.2. Measures of the bank-relation of firms and the cash flow influence..... | 126 |
| 5.3.2.3. Debt service of firms and the cash flow influence..... | 128 |
| 5.3.2.4. Conclusion | 129 |

| | |
|---|------------|
| 5.3.3. Liquidity effects in commerce firms investment behavior..... | 130 |
| 5.3.3.1. Stock measure of internal funds and the cash flow influence..... | 131 |
| 5.3.3.2. Measures of the bank-relation of firms and the cash flow influence..... | 133 |
| 5.3.3.3. Debt service of firms and the cash flow influence..... | 135 |
| 5.3.3.4. Conclusion | 136 |
| 5.4. An analysis of size effects | 137 |
| 5.4.1. Introduction | 137 |
| 5.4.2. Aggregate investment and firm size effects | 139 |
| 5.4.3. Firm size effects on investment..... | 140 |
| 5.4.4. A sectoral analysis of firm size effects..... | 143 |
| 5.4.5. Summarizing the size effects..... | 146 |
| 5.5. An eclectic approach..... | 147 |
| 6. Summary | 151 |
| Appendix..... | 155 |
