

Joachim Schneider

Public Private Partnership for Urban Rail Transit

Forms, regulatory conditions, participants

With a Foreword by Prof. Dr.-Ing. Dipl.-Kfm. Dieter Jacob

Deutscher Universitäts-Verlag

Content

1. Theoretical and methodological introduction	1
1.1 Private infrastructure financing and regional development – classification of the study with consideration of the current debate about public transport deregulation	1
1.2 Reorganizing public tasks through public private partnerships (PPP) - definitions	4
1.3 State of Research about Transit Related Partnerships in the US	8
1.4 New institutional economics as a tool to analyze the topic	11
1.5 Basic elements of the new institutional economics (NIE)	14
1.6 Reorganization of public tasks from the perspective of neo-institutionalism	16
1.7 Specific elements of the regulatory framework	17
1.8 Regulatory systems and efficiency in case study countries	31
1.9 Summary and introduction into the study structure	33
2. Urban Rail-transit in the US - Development trends	36
2.1 Urban Sprawl and Public Transit - a brief introduction	36
2.2 Development of urban rail-transit systems and in the USA	39
2.3 Development of transit ridership	43
2.4 Selected North American study areas	44
3. Overview of areas and tools of public funding and private contribution	50
3.1 Federal Transportation Policy - Intermodality, Efficiency, Innovative Financing	50
3.2 Operation versus Infrastructure Financing; Federal versus local Funding	52
3.3 Public Funding Possibilities and Private Capital Needs	55
3.4 Leverage private capital through project-related bonds	58
3.5 Leverage private capital through new financing tools	63
3.6 Location Efficient Mortgages	67
3.7 Public risk and cost reduction and project acceleration through new project delivery methods (Design-Build, Operate, Maintain, Finance, Transfer etc.)	70
3.8 Private financial contribution to the use of transit assets (Transit Joint versus Transit Oriented Development)	73
3.9 Overview of private contribution forms and their application in study areas	78

4. Trends of transit development, infrastructure funding, urban and real estate development and perspectives of public-private partnerships in Study Areas	79
4.1 New York/ New Jersey: city and suburbia are refocusing on transit, but weak regional coherence limits project-related private financial contribution	79
4.2 Washington D.C.: Further improving WMATA's land-use impacts inside the Beltway and building new connections outside it	92
4.3 Atlanta/GA: Planning to stop highway extension and to build up various layers of rail service and concentrating development at subway rail stations	105
4.4 Dallas/TX: Local sales tax pays for the start of a new Light Rail system that follows and strongly spurs development	118
4.5 San Diego/CA: the country's first new Light Rail system attracts development interest and prepares developer co-financing of new lines through transit villages	126
4.6 Portland/OR: a long and expensive phase to reverse strong car-dependence, spur development through Light Rail and attract developers' financial interest to expand the system	138
4.7 Toronto/ON: North America's only postwar transit-oriented city is increasingly disconnected from the car dominated region and from a car oriented development community	148
5. Design/Build - "Turnkey"Projects	154
5.1 Privately Initiated and Financed Turnkey-Projects – the Las Vegas Monorail	154
5.2 Privately built and co-financed projects – the MAX Airport-extension in Portland/OR	157
5.3 Build Operate Maintain - the Hudson-Bergen Light Rail Line in New Jersey	162
5.4 Design Build Operate Maintain (DBOM) projects in the UK as elements of the national Public Private Partnership strategy	189
5.5 DBOM limited contract – the Greater Manchester Metrolink	192
5.6 DBOM long term contract – Tramtrack Croydon Limited	209
5.7 New procurement methods for Light Rail Projects in the UK and the US - summary with special attention to the role of the principal agent relationship	218

6. Transit Joint Development (TJD)	227
6.1 Joint Development Forms	227
6.2 Joint Development Policy in Washington, D.C.	229
6.3 TJD Examples in Atlanta/GA	257
6.4 Upgrading Joint Development in New York	267
6.5 SEPTA'S Lease and Maintain Program in Philadelphia	275
6.6 Federal Support of Transit Joint Development	278
6.7 Real Estate Policy of the Deutsche Bahn AG, private development examples	280
6.8 The transfer of restrained property rights as a means to spur transit oriented urban development and generate ridership-revenue	295
7. Transit-oriented Development (TOD)	300
7.1 Administrative and Regulatory Framework of Transit-Oriented Development	303
7.2 Transit-oriented Development in New Jersey	317
7.3 Private Initiative and Transit-oriented Projects in Dallas/TX	310
7.4 Light Rail generates privately co-financed development projects in San Diego/CA	323
7.5 Transit-oriented Development tools and results in Portland/OR	335
7.6 Toronto/ON: New need for development examples in North America's most transit-oriented city	350
7.7 The Orenco Station Development as a national showcase of transit-oriented development	352
7.8 Political approval and application of TOD promoting tools as transaction cost-reducing factors	378
8. Summary and Conclusions	386
8.1 System extensions and dynamic ridership development	386
8.2 Funding possibilities, needs and forms	387
8.3 Financial contribution through DBOM, Transit Joint and Transit Oriented Development	392
8.4 Comparative institutional analysis - the regulatory framework	406
8.5 The Transfer of property rights	413
8.6 Transaction cost analysis	417
8.7 Principal-agent-relationship	424
8.8 Transferability of institutional patterns and financial achievements	427
8.9 Final remarks	437

9. Sources	441
9.1 List of Interviews	441
9.2 List of Literature	446
9.3 Sources of Illustrations	457
10. Attachments	462
10.1 Manchester Metrolink Concession agreement (excerpts)	462
10.2 WMATA "Joint Development Politics and Guidelines" (excerpts)	471
10.3 Summary of TOD case studies in New Jersey, Dallas, San Diego, and Toronto	477
