Table of Contents

Foreword v

Acknowledgement vii

List of Figures xiii

List of Tables xvii

List of Abbreviations xix

1. Introduction 1

2. Technological Background 7

2.1 Printed Circuit Boards 7

2.2 Components 8

2.3 SMT Assembly Process 10

2.3.1 Screen Printing 11

2.3.2 Component Placement 11

2.3.3 Reflow Soldering 12

2.3.4 Cleaning 12

2.3.5 Testing 12

2.3.6 Rework 13

3. SMT Placement Machines 15

3.1 Structure of SMT Placement Machines 16

3.1.1 Component Feeders 16

3.1.2 Component Magazine 17

3.1.3 Placement Head 18

3.1.4 Component Centering 19

3.1.5 PCB Table 20

3.1.6 Positioning System 20

3.2 Pick-and-Place Machines 20

3.3 Collect-and-Place Machines 22

Bibliografische Informationen
http://d-nb.info/989217329

digitalisiert durch DEUTSCHE NATIONAL BIBLIOTHEK

3.4 Chip Shooter 24

3.5 Other Forms of SMT Machines 25

3.6 Selection of the Appropriate SMT Machine 28

4. Production Planning in Electronics Assembly 31

4.1 Overview of Planning Problems 31

4.2 Hierarchical Decomposition of Planning Problems 33

4.2.1 Multiple PCB – Multiple Machine (M-M) Problems 34

4.2.2 Single PCB – Multiple Machine (1-M) Problems 35

4.2.3 Multiple PCB – Single Machine (M-1) Problems 38

4.2.4 Single PCB – Single Machine (1-1) Problems 38

4.3 Setup Strategies 39

4.3.1 Unique Setup Strategy 41

4.3.2 Minimum Setup Strategy 51

4.3.3 Group Setup Strategy 62

4.3.4 Partial Setup Strategy 67

4.3.5 Evaluation of Setup Strategies 71

5. Development of Group Setup Strategies 75

5.1 Hierarchical Clustering Based on Conventional Approaches 76

5.1.1 Clustering Approaches 76

5.1.2 Similarity Measures 78

5.1.3 Linkage Methods 81

5.1.4 Group Setup Using Conventional Hierarchical Clustering 84

5.2 Hierarchical Clustering Based on Inclusion Trees 86

5.2.1 Inclusion Measure 86

5.2.2 Clustering Using Inclusion Trees 87

5.2.3 Group Setup Using Inclusion Trees 89

5.3 Improving Group Setup Solutions 92

5.3.1 Move Heuristic 92

5.3.2 Swap Heuristic 92

5.4 Machine-Specific Operations Scheduling 93

5.4.1 Feeder Assignment 97
5.4.2 Nozzle Assignment 104
5.4.3 Placement Sequencing 110
5.4.4 Improving the Feeder Assignment and Component Placement Sequence 119
5.4.5 Determination of the Group Makespan 121

6. Numerical Investigation 123

6.1 Experimental Design 123
6.1.1 Integrated Group Setup Solution System 123
6.1.2 Technical Parameters 125
6.1.3 Generation of Test Data 126

6.2 Comparison of Group Setup Approaches 129
6.2.1 Determining the Best Conventional Setup Approach 129
6.2.2 Comparison of Best Group Setup Approach Based on Conventional Clustering Against Inclusion-Based Grouping 133
6.2.3 Performance of Improvement Heuristics 135

6.3 Comparison of the Proposed Group Setup Approach Against Other Approaches 138
6.3.1 Group Setup Strategy vs. Unique Setup Strategy 138
6.3.2 Effect of the Makespan Constraint in the Grouping Procedure 143
6.3.3 Effect of Integrating Batch Sizes in the Feeder Assignment Procedure 145

6.4 Numerical Tests on Industrial PCBs 147
6.4.1 Tests on Industrial PCBs with Low Component Commonality 147
6.4.2 Tests on Industrial PCBs with High Component Commonality 152

6.5 Concluding Remarks 158

7. Conclusions 159
