Executive Summary	v
TABLE OF CONTENTS	vii
 CHAPTER ONE	 1
1.0 INTRODUCTION.....	1
1.1 Study Motivation	1
1.2 Research Questions.....	3
1.3 Organization of the thesis	4
1.4 The COMESA exchange rate mechanism and trade relations.....	4
1.5 Choice and a brief background of the countries in the model	5
1.6 Trade creation and diversion.....	14
1.7 Some basic definitions and concepts	15
1.8 Theoretical approaches to calculating equilibrium exchange rates	16
1.8.1 Purchasing Power Parity Approach	16
1.8.2 Balassa-Samuelson variant of PPP	17
1.8.3 Capital Enhanced Measures of the Equilibrium Exchange Rates (CHEER)...	18
1.8.4 The Behavioural Equilibrium Real Exchange Rates Approach (BEER).....	19
1.8.5 The Fundamental Equilibrium Real Exchange Rates Approach (FEER).....	20
1.8.6 The Natural Real Exchange rate (NATREX)	21
1.8.7 The Permanent Equilibrium Exchange rate (PEER).....	21
 CHAPTER TWO	 22
2. Theoretical Model of the Equilibrium exchange rates determination.....	22
2.1 Structure of the model.....	22
2.2 Demand Side.....	22
2.2.1 The households	22
2.2.2 Government.....	28
2.2.3 Market clearing condition in the non-tradable goods market.	28
2.3 Supply side.....	29
2.3.1 The firm's cost minimization problem.	29
2.3.2 Production	31
2.3.3 Market clearing conditions in the factor markets	33
2.3.4 Profit maximizing wage-rental ratio	34
2.4 Capital account.....	41
2.5 External balance.....	41
2.6 Temporary Equilibrium conditions.....	42
2.6.1 Factor market equilibrium conditions.....	42
2.6.2 Non-tradable goods market equilibrium conditions	42
2.6.3 Fiscal Balance (Government sector).....	42
2.6.4 Tradable goods conditions (Trade balance condition).....	42
2.7 Internal Temporary Equilibrium	42
2.8 Balance of payments Equilibrium.....	43
2.9 Internal-External equilibrium.....	43
2.10 Effects of changes in the fundamentals on the equilibrium real exchange rates ..	44

CHAPTER THREE	47
3. Cointegration and Error correction Model.....	47
3.1 Model specification and implementation	47
3.1.1 Empirical task	47
3.1.2 Specifying the empirical model	48
3.2 Construction of variables and data sources	51
3.2.1 Construction of Variables	51
3.2.2 Data Sources	51
3.3 Determining the Order of Integration of the variables	51
3.3.1 Stability and Stationarity conditions.....	53
3.3.2 Testing for unit roots.....	56
3.3.3 Correcting for stationarity.....	63
3.3.4 Perron test for structural change	71
3.4 COINTEGRATION AND ERROR CORRECTION MODEL	75
3.4.1 Cointegrated relations	75
3.4.2 Testing for cointegration.....	78
3.4.3 Engle and Granger (EG) two-step cointegration method.	79
3.4.4 The Johansen cointegration technique	80
3.4.5 Error Correction Model.....	83
Cointegration test and VECM results.....	84
3.5 Estimations results for Kenya	84
3.5.1 Lag selection	86
3.5.2 Maximum eigenvalue test results.....	87
3.5.3 Restricting the general model for Kenya	89
3.5.4 Exogeneity tests	89
3.5.5 The Long-run theoretical restrictions.....	90
3.5.6 Restricted cointegration results for Kenya.....	92
3.5.7 Discussion of long-run results	94
3.5.8 Impulse responses for Kenya	95
3.5.9 Variance Decomposition.....	97
3.5.10 Stability test of the model for Kenya	100
3.5.11 Equilibrium Exchange rates and Exchange rate Misalignments in Kenya ..	101
3.6 Estimation for Germany.....	104
3.7 Estimation results for Uganda.....	108
3.8 Estimations for Rwanda.....	111
3.9 Estimations for Zambia.....	115
3.10 Estimations for Seychelles	118
3.11 Estimations for Angola	121
3.12 Estimations for Egypt	124
3.13 Estimations for Pakistan	127
3.14 Estimations for Brazil	130
3.15 Estimations for USA	134
3.16 Estimations for Russia	137

CHAPTER FOUR.....	141
4. Effects of real exchange misalignments on trade flows	141
4.1 Net Export Model.....	141
4.2 Literature Review	142
4.2.1 Review of literature on the determinants of net exports	142
4.2.2 Empirical Literature on the effects of misalignments on trade.....	144
4.3 Empirical Model.....	146
4.3.1 The Baseline model.....	147
4.3.2 One-way fixed effects error component model.	147
4.3.3 One-way random effects error component model.....	150
4.3.4. A two way fixed effects error component model.....	150
4.3.5 A two way random effects error component model.....	151
4.4 Hypothesis tests with panel data.....	151
4.4.1 Two-way or one-way error component.....	151
4.4.2 Hausman Specification test (fixed effects Vs Random effects model).....	152
4.4.3 Test for Poolability	153
4.4.4 Decision from the hypothesis tests	154
4.5 Panel Unit Roots.....	154
4.5.1 Levin, Lin and Chu test.....	155
4.5.2 Im, Pesaran and Shin test	155
4.6 Pooled ADF and Phillip-Perron (PP) tests for Cointegration.....	157
4.7 Estimation results.....	158
4.7.1 Estimation and inference in panel cointegration models	159
4.7.2 Panel OLS estimation for Kenya	160
4.7.3 Panel cointegration results for Uganda	163
4.7.4 Panel cointegration results for Rwanda	165
4.7.5 Panel cointegration results for Angola.....	167
4.7.6 Panel cointegration results for Egypt.....	168
4.7.7 Panel cointegration results for Seychelles	170
4.7.8 Panel cointegration results for Zambia	171
4.7.9 Panel cointegration results for Pakistan.....	172
4.7.10 Panel cointegration results for Brazil.....	174
4.7.11 Panel cointegration results for USA	176
4.7.12 Panel cointegration results for Germany.....	177
4.7.13 Panel cointegration results for Russia.....	178
4.8 Gains and losses from trade	180
4.8.1 Trade gains and losses between horticultural product exporters	181
4.8.2 Trade gains and losses between Cotton and Textiles exporters.....	183
4.8.3 Trade gains and losses among exporters of crude oil and petroleum product ...	185
CHAPTER FIVE	187
5. Summery and Conclusion	187
References.....	191
APPENDICES.....	203
Appendix 3.1 Table VI.B for model C in Perron (1989 pp1377).....	203

Appendix 3.2 Critical Values for the Engle-Granger Cointegration Test	203
Appendix 3.3 Residual Based Cointegration Test with I(1) and I(2) Variables	204
Appendix 3.4 Graphs of the movements of variables at levels.....	205
Appendix 3.5 Unit root test results	211
Appendix 3.6 Derivation of the Trace Test	219
Appendix 4.1 General Unrestricted model (No fixed effects, no random effects).....	223
Appendix 4.2 General Fixed Effects model.....	224
Appendix 4.3 Summery of panel unit root tests	225
