

Contents

1. General introduction	1
1.1 Significance of aquifers for indirect N ₂ O emissions.....	1
1.2 Denitrification-related factors	2
1.3 Potential pathways for indirect N ₂ O emissions.....	3
1.4 Temporal and spatial variability of N ₂ O	3
1.5 Objectives	4
2. The dynamics of N₂O near the groundwater table and the transfer of N₂O into the unsaturated zone: A case study from a sandy aquifer in Germany.....	7
2.1 Abstract.....	7
2.2 Introduction	8
2.3 Methods	9
2.4 Results	12
2.5 Discussion.....	20
2.6 Conclusions	25
3. Spatial variability of N₂O concentrations and of denitrification-related factors in the surficial groundwater of a catchment in northern Germany	26
3.1 Abstract.....	26
3.2 Introduction	26
3.3 Methods	28
3.4 Results and discussion	33
3.5 Conclusions	41
4. Spatial and temporal variability of N₂O in the surface groundwater: a detailed analysis from a sandy aquifer in northern Germany.....	43
4.1 Abstract.....	43
4.2 Introduction	43
4.3 Methods	45
4.4 Results	50
4.5 Discussion.....	58
4.6 Conclusions	65
5. Estimation of indirect N₂O emissions from a shallow aquifer in northern Germany.....	67
5.1 Abstract.....	67
5.2 Introduction	67
5.3 Methods	69
5.4 Results.....	77

5.5 Discussion.....	83
5.6 Conclusions	88
6. Final discussion	90
6.1 N ₂ O dynamics in the surface groundwater.....	90
6.2 The impact of denitrification-related factors on N ₂ O accumulation in the surface groundwater.....	91
6.3 Spatial and temporal variability of N ₂ O in the surface groundwater	95
6.4 The significance of the vertical and the lateral pathway for indirect N ₂ O emissions	98
6.5 Conclusions	100
6.6 Future research.....	101
