

## TABLE OF CONTENTS

	Page
<b>Series</b>	
<b>1. Terminology</b>	
<b>Lecture</b>	
1. The Atom and the Nucleus . . . . .	2
2. Interaction of Light with Matter . . . . .	3
3. Forces Holding Nuclei Together . . . . .	6
4. Reactions between Nuclei . . . . .	8
5. Radioactivity. . . . .	11
6. B-Decay; Neutron Reactions . . . . .	13
7. Nuclear Fission. . . . .	15
<b>2. Radioactivity</b>	18
8. The Radioactive Decay Law. . . . .	18
9. The Radioactive Decay Law; Fluctuations; Passage Through Matter . . . . .	21
10. $\alpha$ - Particles and Their Interaction with Matter. . . . .	24
11. The Theory of Stopping Power . . . . .	26
12. The Theory of Stopping Power . . . . .	28
13. Interaction of Charged Particles with Matter . . . . .	31
14. Interaction of Radiations with Matter. . . . .	32
15. The Properties of Nuclei . . . . .	34
16. Survey of Stable Nuclei. . . . .	36
17. Theory of Alpha Disintegration; Theory of Beta Particles . . . . .	39
18. Positron Emission and K Capture; Gamma Radiation . . . . .	41
<b>3. Neutron Physics</b>	
19. Discovery of the Neutron . . . . .	44
20. Neutron Sources. . . . .	46
Typical Reactions for Production of Neutrons . . . . .	46
21. Properties of Slow Neutrons. . . . .	48
22. Properties of Slow Neutrons (Cont.). . . . .	49
23. Fast Neutrons. . . . .	53
24. Properties of Fast Neutrons Cross-Section Measurements . . . . .	57
<b>4. Two-Body Problem</b>	
25. Nuclear Constants. . . . .	61
26. Neutron-Proton Interaction . . . . .	63
27. Spin-Spin Forces in the Deuteron Proton-Proton Scattering. . . . .	65
28. Three-Body Problem . . . . .	69
29. Interaction of Neutron and Proton with Fields. . . . .	69
30. Interaction of Neutron and Proton with Fields. . . . .	72
<b>5. The Statistical Theory of Nuclear Reactions</b>	
31. Introduction . . . . .	81
32. Qualitative Treatment. . . . .	82
33. Cross Sections and Emission Probabilities. . . . .	85
34. The Excited Nucleus. . . . .	89
35. Resonance Process. . . . .	93
36. Non-Resonance Process. . . . .	100
<b>6. Diffusion Theory</b>	
37. Diffusion Equations and Point Source Solutions . . . . .	115
38. Point Source Problems and Albedo . . . . .	117
39. The Slowing Down of Neutrons . . . . .	122
40. The Slowing Down of Neutrons in Water. . . . .	126
41. The Boltzman Equation: Corrections to Diffusion Theory. . . . .	130
