

Table of Contents

Best Student Paper

A Robust Speech Recognition System for Service-Robotics Applications.....	1
<i>Masrur Doostdar, Stefan Schiffer, and Gerhard Lakemeyer</i>	

Papers with Oral Presentation

Intuitive Humanoid Motion Generation Joining User-Defined Key-Frames and Automatic Learning	13
<i>Marco Antonelli, Fabio Dalla Libera, Emanuele Menegatti, Takashi Minato, and Hiroshi Ishiguro</i>	
Landmark-Based Representations for Navigating Holonomic Soccer Robots	25
<i>Daniel Beck, Alexander Ferrein, and Gerhard Lakemeyer</i>	
Mutual Localization in a Team of Autonomous Robots Using Acoustic Robot Detection	37
<i>David Becker and Max Risler</i>	
Tracking of Ball Trajectories with a Free Moving Camera-Inertial Sensor	49
<i>Oliver Birbach, Jörg Kurlbaum, Tim Laue, and Udo Frese</i>	
A Case Study on Improving Defense Behavior in Soccer Simulation 2D: The NeuroHassle Approach	61
<i>Thomas Gabel, Martin Riedmiller, and Florian Trost</i>	
Constraint Based Belief Modeling	73
<i>Daniel Göhring, Heinrich Mellmann, and Hans-Dieter Burkhard</i>	
Explicitly Task Oriented Probabilistic Active Vision for a Mobile Robot	85
<i>Pablo Guerrero, Javier Ruiz-del-Solar, and Miguel Romero</i>	
An Incremental SLAM Algorithm with Inter-calibration between State Estimation and Data Association	97
<i>Xiucui Ji, Hui Zhang, Dan Hai, and Zhiqiang Zheng</i>	
Development of an Augmented Environment and Autonomous Learning for Quadruped Robots	109
<i>Hayato Kobayashi, Tsugutoyo Osaki, Tetsuro Okuyama, Akira Ishino, and Ayumi Shinohara</i>	

Automatic Parameter Optimization for a Dynamic Robot Simulation ... <i>Tim Laue and Matthias Hebbel</i>	121
Arbitrary Ball Recognition Based on Omni-Directional Vision for Soccer Robots <i>Huimin Lu, Hui Zhang, Junhao Xiao, Fei Liu, and Zhiqiang Zheng</i>	133
A Robust Statistical Collision Detection Framework for Quadruped Robots <i>Tekin Meriçli, Çetin Meriçli, and H. Levent Akın</i>	145
Increasing Foot Clearance in Biped Walking: Independence of Body Vibration Amplitude from Foot Clearance..... <i>Hamid Reza Moballeghe, Mojgan Mohajer, and Raul Rojas</i>	157
Adapting ADDIE Model for Human Robot Interaction in Soccer Robotics Domain <i>Rajesh Elara Mohan, Carlos A. Acosta Calderon, Changjiu Zhou, Tianwu Yang, Liandong Zhang, and Yongming Yang</i>	166
A Proposal of Bridging Activities between RoboCupJunior and Senior Leagues..... <i>Yasunori Nagasaka, Tatsumasa Kitahara, and Tomoichi Takahashi</i>	177
A Collaborative Multi-robot Localization Method without Robot Identification <i>Nezih Ergin Özkucur, Barış Kurt, and H. Levent Akın</i>	189
Teamwork Design Based on Petri Net Plans <i>Pier Francesco Palamara, Vittorio A. Ziparo, Luca Iocchi, Daniele Nardi, and Pedro Lima</i>	200
Bayesian Spatiotemporal Context Integration Sources in Robot Vision Systems <i>Rodrigo Palma-Amestoy, Pablo Guerrero, Javier Ruiz-del-Solar, and C. Garretón</i>	212
Towards Cooperative and Decentralized Mapping in the Jacobs Virtual Rescue Team <i>Max Pfingsthorn, Yashodhan Nevatia, Todor Stoyanov, Ravi Rathnam, Stefan Markov, and Andreas Birk</i>	225
Robust Supporting Role in Coordinated Two-Robot Soccer Attack <i>Mike Phillips and Manuela Veloso</i>	235
A Novel Approach to Efficient Error Correction for the SwissRanger Time-of-Flight 3D Camera <i>Jann Poppinga and Andreas Birk</i>	247

Autonomous Evolution of High-Speed Quadruped Gaits Using Particle Swarm Optimization	259
<i>Chunxia Rong, Qining Wang, Yan Huang, Guangming Xie, and Long Wang</i>	
Designing Fall Sequences That Minimize Robot Damage in Robot Soccer	271
<i>Javier Ruiz-del-Solar, Rodrigo Palma-Amestoy, Paul Vallejos, R. Marchant, and P. Zegers</i>	
The Use of Scripts Based on Conceptual Dependency Primitives for the Operation of Service Mobile Robots	284
<i>Jesus Savage, Alfredo Weitzenfeld, Francisco Ayala, and Sergio Cuellar</i>	
An Omnidirectional Camera Simulation for the USARSim World.....	296
<i>Tijn Schmits and Arnoud Visser</i>	
Introducing Image Processing to RoboCupJunior: PALB VISION A First Implementation of Live Image Processing in RCJ Soccer	308
<i>Christoph Siedentop, Max Schwarz, and Sebastian Pfülb</i>	
Multi-robot Range-Only SLAM by Active Sensor Nodes for Urban Search and Rescue	318
<i>Dali Sun, Alexander Kleiner, and Thomas M. Wendt</i>	
Analysis Methods of Agent Behavior and Its Interpretation in a Case of Rescue Simulations	331
<i>Tomoichi Takahashi</i>	
Spiral Development of Behavior Acquisition and Recognition Based on State Value	343
<i>Yasutake Takahashi, Yoshihiro Tamura, and Minoru Asada</i>	
Determining Map Quality through an Image Similarity Metric	355
<i>Ioana Varsadan, Andreas Birk, and Max Pfingsthorn</i>	
Real-Time Spatio-Temporal Analysis of Dynamic Scenes in 3D Soccer Simulation	366
<i>Tobias Warden, Andreas D. Lattner, and Ubbo Visser</i>	
Coaching Robots to Play Soccer via Spoken-Language	379
<i>Alfredo Weitzenfeld, Carlos Ramos, and Peter Ford Dominey</i>	
Player Positioning in the Four-Legged League	391
<i>Henry Work, Eric Chown, Tucker Hermans, Jesse Butterfield, and Mark McGranaghan</i>	

Humanoid Robot Gait Generation Based on Limit Cycle Stability 403
Mingguo Zhao, Ji Zhang, Hao Dong, Yu Liu, Liguo Li, and Xuemin Su

Playing Creative Soccer: Randomized Behavioral Kinodynamic
Planning of Robot Tactics 414
Stefan Zickler and Manuela Veloso

Papers with Poster Presentation

A Robot Referee for Robot Soccer 426
Matías Arenas, Javier Ruiz-del-Solar, Simón Norambuena, and Sebastián Cubillos

Detection of Basic Behaviors in Logged Data in RoboCup Small Size
League 439
Koshi Asano, Kazuhito Murakami, and Tadashi Naruse

Using Different Humanoid Robots for Science Edutainment of
Secondary School Pupils 451
Andreas Birk, Jann Poppinga, and Max Pfingsthorn

Planetary Exploration in USARsim: A Case Study Including Real
World Data from Mars 463
Andreas Birk, Jann Poppinga, Todor Stoyanov, and Yashodhan Nevatia

Face Recognition for Human-Robot Interaction Applications: A
Comparative Study 473
Mauricio Correa, Javier Ruiz-del-Solar, and Fernando Bernuy

xROB-S and iCon-X: Flexible Hardware, Visual Programming and
Software Component Reuse 485
Stefan Enderle, Wolfgang Günther, Hans-Juergen Hilscher, and Holger Kenn

Multi-level Network Analysis of Multi-agent Systems 495
Pejman Irvani

A Decision-Theoretic Active Loop Closing Approach to Autonomous
Robot Exploration and Mapping 507
Xiucui Ji, Hui Zhang, Dan Hai, and Zhiqiang Zheng

Domestic Interaction on a Segway Base 519
W. Bradley Knox, Juhyun Lee, and Peter Stone

Combining Policy Search with Planning in Multi-agent Cooperation 532
Jie Ma and Stephen Cameron

Model-Free Active Balancing for Humanoid Robots	544
<i>Sara McGrath, John Anderson, and Jacky Baltes</i>	
Stereo-Vision Based Control of a Car Using Fast Line-Segment Extraction	556
<i>Brian McKinnon, Jacky Baltes, and John Anderson</i>	
A Layered Metric Definition and Evaluation Framework for Multirobot Systems	568
<i>Çetin Meriçli and H. Levent Akın</i>	
RobotStadium: Online Humanoid Robot Soccer Simulation Competition.....	580
<i>Olivier Michel, Yvan Bourquin, and Jean-Christophe Baillie</i>	
Real-Time Simulation of Motion-Based Camera Disturbances	591
<i>Dennis Pachur, Tim Laue, and Thomas Röfer</i>	
Database Driven RoboCup Rescue Server	602
<i>Rahul Sarika, Harith Siddhartha, and Kamalakar Karlapalem</i>	
What Motion Patterns Tell Us about Soccer Teams	614
<i>Jörn Sprado and Björn Gottfried</i>	
Designing Grounded Agents: From RoboCup to the Real-World.....	626
<i>Christopher Stanton</i>	
Robust Moving Object Detection from a Moving Video Camera Using Neural Network and Kalman Filter.....	638
<i>Sanaz Taleghani, Siavash Aslani, and Saeed Shiry</i>	
Collaborative Localization Based Formation Control of Multiple Quadruped Robots.....	649
<i>Qining Wang, Hua Li, Feifei Huang, Guangming Xie, and Long Wang</i>	
Author Index	661
