**Foreword** XIX

**Preface** XXI

**List of Contributors** XXV

### Fuel Cell Basics

#### 1      **Electrocatalysis and Catalyst Degradation Challenges in Proton Exchange Membrane Fuel Cells** 3

*Hubert A. Gasteiger, Daniel R. Baker, Robert N. Carter, Wenbin Gu,  
Yuxin Liu, Frederick T. Wagner, and Paul T. Yu*

Abstract 3

- 1.1    Introduction 3
- 1.2    Voltage Losses in State-of-the-Art Automotive PEM Fuel Cells 4
- 1.3    Catalyst Development Needs and Approaches 6
- 1.4    Catalyst Degradation via Platinum Dissolution 10
- 1.5    Carbon-Support Corrosion 11
- 1.6    Conclusion 14
- 1.6    References 14

#### 2      **High-Temperature PEM Fuel Cells: Electrolytes, Cells, and Stacks** 17

*Christoph Wannek*

Abstract 17

- 2.1    Introduction 17
- 2.2    Approaches to Increase the Operating Temperature  
of Sulfonated Membranes 19
- 2.3    HT-PEFCs with Phosphoric Acid-Based Polybenzimidazole-Type  
Membranes 23
- 2.4    Alternative Liquid Electrolytes 33
- 2.5    Acidic Salts and Oxides 35
- 2.6    Conclusion 36
- 2.6    References 37
