

Plenary Lectures

<i>S. Schulz</i>	ERA-NET ICT agri – An Example of International Research Collaboration on the Basis of the FP7	1
<i>M. Richenhagen</i>	Global Challenges to Agricultural Engineering Technologies of Tomorrow	9

Tractors I / Design and Dynamics

<i>J. W. Wienkes, D. A. Bowman</i>	New Technical Developments – High Horsepower Agricultural Tractors	15
<i>C. Brinkmann, P. Mümken, L. Riesenbeck</i>	Further development of a 4x4 large tractor	21
<i>A. Bogala, A. Ulrich</i>	Development of a Control System to Improve Handling Performance of Tractors	27
<i>H. Schulze Zumkley, S. Böttinger</i>	Modular measuring wheels for high horsepower tractors	33

Tractors II / Emissions / Drive Train

<i>J. Mengele, Max Ott</i>	Field Test Experiences with SCR Technology to meet Tier 4 interim	41
<i>K. Müller-Haas, R. Brück, G. Kohnen</i>	Characterization of stressors at exhaust system components acquired on AgriPower equipment	49
<i>C. Kempermann, B. Stürmer, J. Kunelius</i>	Gear Ratio Meets Hydrostatics	55
<i>M. Landis, F. Machatschek</i>	Field test in tractors with low ash engine oil	61

Tractors III / Drive Train / Attachments

<i>M. Götz, W.-D. Gruhle, M. Mohr, K. Grad</i>	Electrically Assisted Powertrains for Agricultural Machinery, in particular Tractors	67
--	--	----

<i>W. Schleich, M. Brenninger</i>	The drive train family for a new series of vineyard, orchard and small standard tractors	73
<i>U. Stich</i>	Integration of the established swinging power lift into a vineyard tractor under confined space conditions	79
<i>U. Hoppe, J. Brügel</i>	Dynamic System Simulation of Tractor Front Loaders	85

Tractors IV / Traction / Test

<i>J. T. Roth, M. J. Darr</i>	Measurement of Soil-tire Interface Stresses	91
<i>A. Remmelmann, B. Völker, K. Tischler</i>	Hydraulic Power Brakes with ABS for Tractors and Mobile Equipment	97
<i>J.-F. Forissier,</i>	Methodological precautions for tractor fuel consumption's measurement	105
<i>D. Nagahata, W. Hendricx, J. Anthonis, T. Virtanen, P. Hannukainen</i>	Reducing Gear Whine of a Valtra Continuous Variable Transmission	113

Crop Protection

<i>J. J. Hiddema</i>	Using innovation to improve application quality in crop protection	123
<i>J. P. Fulton, A. Sharda, T.P. McDonald, W.C. Zech, M. J. Darr</i>	Impact of Auto-Swath Technology on Agricultural Sprayer Boom Dynamics	129
<i>H. Kam, O. Schmittmann, P. Schulze Lammers</i>	Cropping System for Mechanical Intra-/Inter Row Weeding	135
<i>D. Fischer, M. Ströbel, K. Köller</i>	Regulation-based mechanical weed control within the row in the sugar beet cultivation?	141

Automation Technology I

<i>T. E. Madsen, K. Kirk, M. R. Blas</i>	3D camera for forager automation	147
<i>G. Happich, H.-H. Harms, T. Lang</i>	Parallel Overloading Operations using a Model-Based Strategy	153
<i>G. Nienaber, N. Diekhans</i>	Kalman Filtering in Agricultural Applications	159
<i>D. Ehlert, M. Heisig, R. Adamek</i>	Environment detection on agricultural machinery by a laser scanner	165

Automation Technology II

<i>J. Schattenberg, M. Robert, H.-H. Harms, T. Lang</i>	A flexible mobile platform for research on cooperating machinery	173
<i>T. Bakker, J. Bontsema, J. Müller, C. J. van Asselt, E. J. van Henten, G. van Straten</i>	Automatic headland turning for four-wheel steered vehicles exploiting the full degrees of freedom	179
<i>D. Šeatović, H. Kutterer, T. Anken, M. Holpp</i>	Automatic Weed Detection in Grassland	187
<i>M. W. Veal, S. A. Shearer, T. S. Stombaugh, J. D. Luck, B. K. Koostra</i>	Automated Tractor Guidance and Implement Tracking Error Assessment	193

Energy from Biomass I – Technical Aspects

<i>M. Grau, P. Pickel</i>	Thermo Chemical Gasification of Contaminated Biomass	199
-------------------------------	--	-----

<i>M. Kratzeisen, N. Starcevic, C. Maurer, M. Martinov, J. Müller</i>	Use of biogas digestate as solid fuel	205
---	---------------------------------------	-----

<i>J. Rathbauer, K. Krammer, R. Zeller, H. Prankl</i>	Pure plant oil as alternative fuel for agriculture?	211
---	---	-----

<i>C. Maurer, N. Starcevic, J. Müller,</i>	Drying of biogas digestate in a hybrid solar/waste-heat drying plant	217
--	--	-----

Energy from Biomass II – Logistics

<i>P. Busato, R. Berruto, P. Piccarolo</i>	Modeling of biomass supply System performance, logistic costs and environmental sustainability	223
--	---	-----

<i>J. A. Thomasson, B.E. Hartley, S. W. Searcy, R. Sui, J.D. Gibson</i>	Optimizing the logistics of biomass harvest and transport	229
---	---	-----

<i>M. Strobl</i>	Transparency in biomass harvest logistics	239
------------------	---	-----

<i>B. Velázquez-Martí, Fernandez-Gonzalez</i>	Analysis of the work organization systems for harvesting wood biomass from pruning fruit trees	245
---	--	-----

Soil Tillage and Sowing

<i>J. Fehrmann, A. Groša, T. Herlitzius, G. Mohn, T. Mohn</i>	Introduction of a new tillage concept ROTAPULL	251
---	--	-----

<i>R. Kattenstroth, H.-H. Harms, W. Wurpts, J. Twiefel</i>	Reducing friction by ultrasound treatment exemplified by tillage	259
--	--	-----

<i>H. W. Griepentrog, J. M. Olsen, J. Weiner</i>	The Influence of Row Width and Seed Spacing on Uniformity of Plant Spatial Distributions	265
--	--	-----

<i>C. Surborg, M. Böging</i>	Constructional and measurement technical design and evaluation of a test stand for the determination of cross distribution in pneumatic seed drills	271
----------------------------------	---	-----

Industrial Product Development

<i>A. Vajs</i>	Modern diagnostics and telemetric service for agricultural products	277
<i>J. Zatrieb, R. Käsler, J. Hiddema</i>	New Generation of Hydro-Pneumatic Suspension Systems – Adaptive Damping	283
<i>H. E.S. Haapala, A. Pasila</i>	Agro Living Lab – an R&D platform – ensuring acceptability of new technology among farmers	291
<i>A. Hackfort, M. Schreiber</i>	Development of an Operating Strategy for a New Family of Tractor Terminals	297

Power Train / CVT

<i>A. Casella, G. Albertin</i>	Powertrain efficiency optimization of Full Toroidal Variator based IVT agricultural transmissions	303
<i>M. G. Kliffken, T. Anderl, D.van Bracht, C. Ehret</i>	Hydrostatic CVTs and Hydrostatic Hybrid Technology	309
<i>H. Lobb-Rabe</i>	Intelligent Drive Concept for self propelled Agricultural Harvesters	321
<i>M. Erkkilä, K. Huhtala, M. Vilenius, T. Virvalo</i>	Model-Based Design of Power-Split Drivelines	327

Data Handling

<i>P. Schreiweis, J. Gabbert, J. Sonnen</i>	Continuous and automated logging of measurement data during field tests increases the product quality of the series	333
---	---	-----

<i>C. Rusch,</i> <i>H. J. Meyer,</i> <i>M. Geimer,</i> <i>M. Scherer,</i> <i>T. Herlitzius,</i> <i>T. Engel,</i> <i>R. Ostermeier,</i> <i>T. Fechteler,</i> <i>A. Kritzner</i>	Autonomous Agricultural Documentation System for the Retracement of Harvested Crops	339
--	--	-----

<i>S. Andres,</i> <i>J. Zeddies</i>	Automatic Process Data Acquisition – Promising Information Systems for Russian Agroholdings?	345
<i>M. Nørremark,</i> <i>J. Overgaard,</i> <i>H. L. Jensen</i>	Web server and browser based vehicle and implement control	351

Harvesting Technology I

<i>K. Hindryckx</i>	Intelligent User Interface	357
<i>J. Baumgarten,</i> <i>S. Neu,</i> <i>B. Kettelhoit</i>	An assistance system for the optimization of the harvesting process in combine harvesters	363
<i>T. Rademacher</i>	The increase of efficiency of combines through optimisation of the machine's settings	369
<i>H. Risius,</i> <i>J. Hahn,</i> <i>H. Korte</i>	Implementation of Process Analytical Technology (PAT) for the Determination of Product Quality on a Combine Harvester	375

Harvesting Technology II

<i>G. Ivan,</i> <i>I. Ganea</i>	Considerations on the Shaking Process at the Conventional Cereal Harvesting Combines	381
<i>M. G. Gebrehiwot,</i> <i>J. De Baerdemaeker,</i> <i>M. Baelmans</i>	Computational and experimental study of a cross-flow fan for combine cleaning shoes	387
<i>D. Verhaeghe,</i> <i>M. Maasackers,</i> <i>J. Speer,</i> <i>H. Wesche</i>	Yield Measurements on Large Square Balers	393

<i>A. Suokannas, M. Nysand</i>	Functional performance of self-loading wagon compared to metered chopper for forage harvest	399
------------------------------------	---	-----

Harvesting Technology III

<i>K. Wild, V. Walther, J. K. Schueller</i>	Reducing fuel consumption for chopping maize with a self-propelling forage harvester	405
<i>M. Nysand, A. Suokannas</i>	Effect of mower–conditioner type and mowing method on drying speed and field losses	411
<i>J. K. Schueller, W. Suk Lee, Ji Hyun Yoon, C. D. Cran</i>	Robotic Technologies for Watermelon Harvest	417
<i>H. Mählmann</i>	Spring mounted crop flow of a self-propelled forage harvester	423

PTO / Hydraulics

<i>H. Trummer</i>	Electric Direct Smart Actuators for Proportional Hydraulic Valves	429
<i>T. Fedde, J. Rennert, S. Berkemann</i>	Concept of a Proportional Valve with separate Metering for Mobile Hydraulics	435
<i>R. Gugel, N. Tarasinski</i>	Infinitely variable PTO transmission	441
<i>A. Sarfert, J. Knobloch, W. Schremmer</i>	Development of an automatic hitching system Power Lock for drive shafts in a multinational cooperation of implement, tractor and drive shaft manufacturers	445

Terminals

<i>M. Ehl, S. Bauer</i>	Design and software concept of a new terminal generation	451
<i>D. C. Smart, B. Newendorp, T. Kilworth</i>	Application of Virtual Terminal as an Integrated Tractor Display Interface	457

<i>T. Dzinaj,</i> <i>J.-M. LeBars,</i> <i>A. Möller,</i> <i>M. Nagel,</i> <i>A. Ruckelshausen,</i> <i>B. Schniederbruns,</i> <i>V. Stöcklin,</i> <i>M. van den Boom</i>	ISOBUS meets the farmer: Multi-manufacturer ISO-Terminal	463
--	---	-----

<i>L. Völker,</i> <i>S. Han,</i> <i>M. Geimer</i>	Standardisation of the co-simulation of mobile machines with participation of different business partners	469
---	--	-----

Drives

<i>J. Pohlmann</i>	Hydraulic Transmission Concept of the Self-Propelled High Capacity Mower Conditioner	475
--------------------	---	-----

<i>A. Widemann,</i> <i>S. Martensen</i>	Embedded Automotive Control for Hydrostatic Propel Systems	481
--	---	-----

<i>M. Heckmann,</i> <i>M. Gallmeier,</i> <i>H. Auernhammer,</i> <i>H. Bernhardt</i>	Measuring and interpreting load spectra in the hydrostatic traction drive of a self-propelled forage harvester	489
--	---	-----

<i>T. Herlitzius,</i> <i>W. Aumer,</i> <i>M. Lindner,</i> <i>G. Bernhardt,</i> <i>H. Kuß,</i> <i>N. Michalke,</i> <i>U. Schuffenhauer</i>	Integration of an Electrical drive into a Tangential Threshing Cylinder	495
---	--	-----

Sensors

<i>D. Wroblewski,</i> <i>T. Bauer</i>	Practical Application of the Upcoming ISO/FDIS 25119 to Electro-Hydraulic	501
--	--	-----

<i>J. Eiffer,</i> <i>D. Schild,</i> <i>W. Lücke,</i> <i>D. von Hörsten</i>	Development of an electronic nose for <i>Fusarium</i> detection in wheat	509
---	---	-----

<i>E. Hartung, A. Zimmermann, E. Thiessen</i>	Nutrient based and site specific slurry application by near- infrared spectroscopy	515
<i>F. Beck, J. E Lenz, D. Gordon</i>	Inferential Sensing Techniques for Condition Monitoring	523
