

Contents

Introduction	1
1. Theoretical Fundamentals	3
1.1 Physical fundamentals	3
1.1.1 Nuclear magnetic resonance	3
1.1.2 Relaxation	6
1.1.3 Signal reception	9
1.1.4 Magnetic resonance imaging.....	12
1.1.5 Signal-to-noise ratio	17
1.2 Medical fundamentals	20
1.2.1 Dental anatomy	20
1.2.2 Objectives of dentistry.....	21
2. MRI Pulse Sequences and Techniques for Imaging of Teeth	23
2.1 Direct imaging of the tooth substance: solid state MRI	23
2.2 Indirect imaging of the tooth substance	24
2.2.1 Oral contrast medium	25
2.2.2 Pulse sequences	30
2.2.3 Multislice 2D versus 3D MRI	33
2.3 Conclusion	36
3. Precise Localization of Boundaries between Extended Uniform Objects in MRI	39
3.1 Introduction	39
3.2 Theoretical model	40
3.3 Simulations.....	43
3.4 Experiment	46
3.5 Discussion	50
4. In Vivo MRI-Based Dental Impression Using an Intraoral RF Receiver Coil	53
4.1 Motivation: CAD/CAM dental restorations.....	53
4.2 Materials and methods.....	56
4.2.1 RF coil construction details	56

4.2.2 Coil characterization	58
4.2.3 In vivo imaging and production of CAD/CAM restorations.....	58
4.3 Results	60
4.4 Discussion	64
5. Fast Contrast-Enhanced Dental MRI Using Compressed Sensing	67
5.1 Motivation	67
5.2 Compressed sensing	67
5.3 Materials and methods	70
5.3.1 Phantom study	70
5.3.2 In vivo study.....	71
5.4 Results	72
5.5 Discussion	76
6. In Vivo 3D MR Imaging and Quantification of Carious Lesions and Dental Pulp.....	77
6.1 Introduction.....	77
6.2 Materials and methods	79
6.2.1 In vivo MRI procedure	79
6.2.2 Quantification of carious lesions	81
6.3 Results	81
6.4 Discussion	86
7. MRI in Orthodontics and Oral and Maxillofacial Surgery	89
7.1 Introduction.....	89
7.2 Three-dimensional localization of impacted teeth using MRI	91
7.2.1 Motivation.....	91
7.2.2 Materials and methods.....	91
7.2.3 Results.....	93
7.3 Diagnosis of dental abnormalities in children using MRI.....	96
7.3.1 Motivation.....	96
7.3.2 Materials and methods.....	96
7.3.3 Results.....	97
7.4 Development of a dedicated RF receiver for MRI of maxillofacial region .	101
7.4.1 Theory: phased arrays	101
7.4.2 RF coil construction and testing.....	102
7.4.3 Results.....	103
7.5 Discussion	104

8. Functional MRI of the Temporomandibular Joint	107
8.1 Introduction	107
8.2 Correlation of MRI with real-time axiography of TMJ clicks.....	110
8.2.1 Motivation	110
8.2.2 Materials and methods	111
8.2.3 Results	112
8.3 Real-time dynamic radial MRI of the temporomandibular joint.....	114
8.3.1 Motivation	114
8.3.2 Materials and methods	116
8.3.3 Results	117
8.4 Discussion	118
9. Dental Materials in Dental MRI.....	119
9.1 Introduction	119
9.2 Materials and methods.....	124
9.3 Results.....	127
9.4 Discussion.....	135
10. Wii – Highly Sensitive Tracking of Patient Motion for Dental MRI	137
10.1 Motivation	137
10.2 Materials and methods.....	137
10.3 Results	140
10.4 Discussion	141
11. Perspectives of Dental MRI	143
11.1 The wide scope of dental MRI applications.....	143
11.2 Economical considerations	148
11.3 Discussion	152
Summary.....	155
Zusammenfassung	159
Bibliography	165
Curriculum Vitae.....	181
Publications	182
Acknowledgements	187
