Table of Contents

Invited Talks

Fostering Proof Scores in CafeOBJ ................................. 1
Kokichi Futatsugi

Exploiting Partial Success in Applying Automated Formal Methods
(Abstract) ................................................. 21
Matthew B. Dwyer

Multicore Embedded Systems: The Timing Problem and Possible
Solutions (Abstract) ..................................... 22
Wang Yi

Theorem Proving and Decision Procedures

Applying PVS Background Theories and Proof Strategies in Invariant
Based Programming ....................................... 24
Johannes Eriksson and Ralph-Johan Back

Proof Obligation Generation and Discharging for Recursive Definitions
in VDM ..................................................... 40
Augusto Ribeiro and Peter Gorm Larsen

Correct-by-Construction Model Transformations from Partially
Ordered Specifications in Coq ............................ 56
Imán Poernomo and Jeffrey Terrell

Decision Procedures for the Temporal Verification of Concurrent
Lists ......................................................... 74
Alejandro Sánchez and César Sánchez

An Improved Decision Procedure for Propositional Projection Temporal
Logic ....................................................... 90
Zhenhua Duan and Cong Tian

Web Services and Workflow

A Semantic Model for Service Composition with Coordination Time
Delays .......................................................... 106
Natallia Kokash, Behnaz Changizi, and Farhad Arbab

Compensable WorkFlow Nets .................................. 122
Fazle Rabbi, Hao Wang, and Wendy MacCaull
Automatically Testing Web Services Choreography with Assertions .......................... 138
   Lei Zhou, Jing Ping, Hao Xiao, Zheng Wang, Geguang Pu, and Zuohua Ding

Applying Ordinary Differential Equations to the Performance Analysis
of Service Composition ................................................................. 155
   Zuohua Ding, Hui Shen, and Jing Liu

Verification I

Verifying Heap-Manipulating Programs with Unknown
Procedure Calls ............................................................................. 171
   Shengchao Qin, Chenguang Luo, Guanhua He, Florin Craciun, and Wei-Ngan Chin

API Conformance Verification for Java Programs ............................. 188
   Xin Li, H. James Hoover, and Piotr Rudnicki

Assume-Guarantee Reasoning with Local Specifications ................... 204
   Alessio Lomuscio, Ben Strulo, Nigel Walker, and Peng Wu

Automating Coinduction with Case Analysis .................................... 220
   Eugen-Ioan Goriac, Dorel Lucanu, and Grigore Roșu

Applications of Formal Methods

Enhanced Semantic Access to Formal Software Models .................... 237
   Hai H. Wang, Danica Damljanovic, and Jing Sun

Making Pattern- and Model-Based Software Development More
Rigorous .......................................................................................... 253
   Denis Hatebur and Maritta Heisel

Practical Parameterised Session Types .......................................... 270
   Andi Bejleri

A Formal Verification Study on the Rotterdam Storm Surge Barrier .... 287
   Ken Madlener, Sjaak Smetsers, and Marko van Eekelen

Verification II

Formalization and Correctness of the PALS Architectural Pattern for
Distributed Real-Time Systems ........................................................ 303
   José Meseguer and Peter Csaba Ölveczky

Automated Multiparameterised Verification by Cut-Offs .................... 321
   Antti Siirtola
## Automating Cut-off for Multi-parameterized Systems
Youssef Hanna, David Samuelson, Samik Basu, and Hridesh Rajan

## Method for Formal Verification of Soft-Error Tolerance Mechanisms in Pipelined Microprocessors
Miroslav N. Velev and Ping Gao

## Formal Verification of Tokeneer Behaviours Modelled in fUML Using CSP
Islam Abdelhalim, James Sharp, Steve Schneider, and Helen Treharne

## Probability and Concurrency

- **Model Checking Hierarchical Probabilistic Systems**
  Jun Sun, Songzheng Song, and Yang Liu

- **Trace-Driven Verification of Multithreaded Programs**
  Zijiang Yang and Karem Sakallah

- **Closed Form Approximations for Steady State Probabilities of a Controlled Fork-Join Network**
  Jonathan Billington and Guy Edward Gallasch

- **Reasoning about Safety and Progress Using Contracts**
  Imene Ben-Hafaiedh, Susanne Graf, and Sophie Quinton

## Program Analysis

- **Abstract Program Slicing: From Theory towards an Implementation**
  Isabella Mastroeni and Durica Nikolić

- **Loop Invariant Synthesis in a Combined Domain**
  Shengchao Qin, Guanhua He, Chenguang Luo, and Wei-Ngan Chin

- **Software Metrics in Static Program Analysis**
  Andreas Vogelsang, Ansgar Fehnker, Ralf Huuck, and Wolfgang Reif

- **A Combination of Forward and Backward Reachability Analysis Methods**
  Kazuhiro Ogata and Kokichi Futatsugi

## Model Checking

- **Model Checking a Model Checker: A Code Contract Combined Approach**
  Jun Sun, Yang Liu, and Bin Cheng
On Symmetries and Spotlights – Verifying Parameterised Systems
Nils Timm and Heike Wehrheim
534

A Methodology for Automatic Diagnosability Analysis
Jonathan Ezekiel and Alessio Lomuscio
549

Making the Right Cut in Model Checking Data-Intensive Timed Systems
Rüdiger Ehlers, Michael Gerke, and Hans-Jörg Peter
565

Comparison of Model Checking Tools for Information Systems
Marc Frappier, Benoît Fraikin, Romain Chossart, Raphaël Chane-Yack-Fa, and Mohammed Ouenzar
581

Object Orientation and Model Driven Engineering

A Modular Scheme for Deadlock Prevention in an Object-Oriented Programming Model
Scott West, Sebastian Nanz, and Bertrand Meyer
597

Model-Driven Protocol Design Based on Component Oriented Modeling
Prabhu Shankar Kaliappan, Hartmut König, and Sebastian Schmerl
613

Laws of Pattern Composition
Hong Zhu and Ian Bayley
630

Dynamic Resource Reallocation between Deployment Components
Einar Broch Johnsen, Olaf Owe, Rudolf Schlatte, and Silvia Lizeth Tapia Tarifa
646

Specification and Verification

A Pattern System to Support Refining Informal Ideas into Formal Expressions
Xi Wang, Shaoying Liu, and Huaikou Miao
662

Specification Translation of State Machines from Equational Theories into Rewrite Theories
Min Zhang, Kazuhiro Ogata, and Masaki Nakamura
678

Alternating Interval Based Temporal Logics
Cong Tian and Zhenhua Duan
694
