Chapter I

INTRODUCTION 9

I.1 General 9
I.2 Tasks of the Group 9
I.3 Trends and Issues 10

Chapter II

POLICY AND SCIENTIFIC AND TECHNICO-ECONOMIC ASPECTS: SCIENCE, TECHNOLOGY AND SOCIETY 12

II.1 General 12
II.2 Policy Considerations: The Society 12
II.2.1 Japan 12
II.2.2 Australia 13
II.2.3 United States 13
II.2.4 Europe 14
II.3 Major Research Programmes: Science 16
II.3.1 Research programmes: road pavements and bridges 16
II.3.2 Research programmes: vehicles 16
II.3.3 System-wide programmes 17
II.4 Technico-economic Approaches: The Technology 17

Chapter III

SCALE AND ROLE OF HEAVY FREIGHT VEHICLES - NATIONAL AND INTERNATIONAL 19

III.1 Purpose of Chapter 19
III.2 Concepts and Definitions 19
III.3 Rules and Regulations 20
III.4 Heavy Freight Vehicles in Relation to other Transport Modes 20
III.5 Heavy Freight Vehicles - Structure of National Fleets 25
III.6 Statistics Related to the Scale of Freight Transport by Road 25
III.7 Trends in Road Freight Transport and Heavy Truck Usage 27

References 29

Chapter IV

EFFECTS ON ROAD TRAFFIC 30

IV.1 Introduction 30
IV.2 Importance of Commercial Vehicle Traffic 30
IV.3 Traffic Capacity and Passenger Car Equivalents of Trucks 32
IV.3.1 Highway Capacity Manual 32
IV.3.2 Recent standards and research 32
IV.4 Speed-flow Relationships of Trucks 33
IV.5 Climbing Lanes and Lane Usage 37
IV.5.1 Climbing lanes 37
IV.5.2 Lane usage and truck lanes 38
IV.6 Intersections and Urban Congestion 38
IV.7 Truck Speeds 41

Chapter V

EFFECTS ON ROAD SAFETY 47

V.1 General 47
V.2 Accident Involvement of Heavy Freight Vehicles 47
V.2.1 Data requirements 47
V.2.2 Problems in data analyses and international comparisons 47
V.2.3 Results of the Group's international enquiry 47
V.3 Some Heavy Freight Vehicle Specific Factors in the Causation and Severity of Accidents 50
V.3.1 Vehicle defects and insufficiencies 50
V.3.2 The rollover problem 51
V.3.3 Collision accident severity 51
V.4 Priority Areas of Research on Heavy Freight Vehicle Safety 52
V.4.1 Stability 52
V.4.2 Brakes 53
V.4.3 Technical control and inspection of vehicles 53
V.4.4 Driver 53
V.4.5 Other safety research 54

Chapter VI

EFFECTS ON ROAD PAVEMENTS 58

VI.1 Introduction 58
VI.2 Pavement Design and Maintenance 58
VI.2.1 Pavement design 58
VI.2.2 Pavement maintenance and strengthening 59
VI.2.3 Comparing pavement structures used in some Member countries as a function of traffic loading 61
VI.3 Vehicle Characteristics and Pavement Effects 62
VI.3.1 Main vehicle parameters affecting pavement performance 62
VI.3.2 Axle load and type 63
VI.3.3 Single and twin wheels and wide-base tyres 63
VI.3.4 Axle grouping 65
VI.3.5 Surface contact pressure of tyre 67
VI.3.6 Suspension system 67
VI.4 Effects of Vehicle Configurations 71
VI.4.1 Calculation methodology 71
VI.4.2 Examples 72
VI.5 Future Research Needs and the Use of Full-scale Test Facilities 72
VI.5.1 Present situation 72
VI.5.2 Realistic medium-term research targets 74
VI.5.3 Full-scale test facilities 74
VI.5.4 Costs and possibilities of co-operation 74

Selected Bibliography 75
Annex 77

Chapter VII

EFFECTS ON ROAD BRIDGES 80

VII.1 Introduction 81
VII.2 Design Codes and Load Spectra 81
VII.2.1 Design loading schemes 81
VII.2.2 Actual bridge loading 83
VII.3 Bridge Rating 85
VII.3.1 Rating methods 85
VII.3.2 Fatigue 87
VII.4 Effects of Increasing Heavy Freight Vehicle Weights 87
VII.4.1 National studies 87
VII.4.2 Summary remarks 88
VII.5 Need for Research 89

References 90

Chapter VIII

EFFECTS ON ENVIRONMENT 91

VIII.1 Introduction 91
VIII.2 Noise and Air-borne Vibration 91
VIII.2.1 Measurements and indices 91
VIII.2.2 Effect of vehicle's weight and configuration 92
VIII.2.3 Effect of vehicle's speed 92
VIII.2.4 Effect of different types of tyres and road textures 94
VIII.2.5 Quiet heavy vehicle 94
VIII.3 Ground-borne Vibration 96
VIII.4 Air Pollution and Odour 96
VIII.5 Social and Psychological Attitudes 97

References 99

Chapter IX

VEHICLE OPERATION AND ENERGY CONSIDERATIONS 101

IX.1 Operating Modes 101
IX.1.1 Use of freight vehicles as a function of gross vehicle weight 101
IX.1.2 Example of current operating modes (United Kingdom) 101
IX.1.3 Matching vehicle design operation with requirements 102
IX.2 Productivity Indicators 103
IX.2.1 Specific productivity parameters 103
IX.2.2 General productivity indicators 104
IX.3 The Problem of Overloading 105
IX.3.1 Detailed analyses 105
IX.3.2 Other national results 109
IX.4 Fuel Consumption 111
IX.4.1 Calculation methods and models 112
IX.4.2 Main findings 113
IX.4.3 Fuel consumption and changes in vehicle design 116

References 118

Chapter X

COSTING OF EFFECTS 119

X.1 Analysis of Total Operating Cost 119
X.1.1 Components of operating costs 119
X.1.2 Main findings 119
X.1.3 Cost parameters 121
X.2 Infrastructure Costs 124
X.2.1 The various theoretical taxation systems 125
X.2.2 The effect of heavy vehicle traffic on infrastructure expenditure .. 125
X.2.3 Allocation of marginalisable expenditure according to vehicle category 131
X.3 Societal Costs 134
X.3.1 The safety hazard cost of heavy vehicles 134
X.3.2 Cost of the impact of heavy vehicles on the environment 136
X.3.3 Summary results 137

References 138

Chapter XI

RECENT SYSTEMS STUDIES: THEIR APPROACHES AND FINAL RESULTS 140

XI.1 Principles and Issues 140
XI.2 Methods of Analysis 141
XI.3 Modal Split Analysis 141
XI.4 Problems Encountered in Measuring and Evaluating Various Elements 142
XI.5 Results of National Studies 142

Page

XI.5.1 The German study 142
XI.5.2 The United States study 143
XI.5.3 The Australian studies 145
XI.5.4 The British studies 147
XI.6 Summary of Common Findings 148

References 149

Chapter XII

SUMMARY, CONCLUSIONS AND RECOMMENDATIONS 151

XII.1 Background 151
XII.2 Mission 151
XII.3 General Trends and Data 151
XII.4 Effects on Road Traffic 152
XII.5 Effects on Road Safety 153
XII.6 Effects on Road Pavements 154
XII.7 Effects on Road Bridges 155
XII.8 Environmental Effects 156
XII.9 Vehicle Operation and Energy Considerations 157
XII.10 Costing of Effects 158
XII.11 Systems Studies 160
XII.12 General Conclusions 161
