

CONTENTS

Summary	I
Zusammenfassung	III
List of Figures.....	VIII
List of Tables	XII
Abbreviations and symbols	XIV
1 Introduction	1
1.1 Background	3
1.2 Aim and scope	4
1.3 Methodology	6
2 Post-combustion CO₂ capture	9
2.1 Process	10
2.2 Solvents.....	12
2.2.1 Amines	14
2.2.2 Solutions of alkali salts	20
2.2.3 Ammonia.....	21
2.2.4 Solutions of amino acid salts	24
2.2.5 Ionic liquids	24
2.3 Solvent selection	25
3 Semi-empirical column model.....	29
3.1 Solvent properties.....	33
3.1.1 CO ₂ solubility.....	34
3.1.2 Heat of absorption	38
3.1.3 Heat capacity.....	39
3.1.4 Density	40
3.2 Implementation	41
3.2.1 Mass balance, equilibrium, and summation equations.....	42
3.2.2 Enthalpy balance equations.....	45
3.3 Model validation.....	47
3.3.1 Absorber.....	50
3.3.2 Desorber	54

4 Model development.....	59
4.1 CO ₂ capture unit.....	59
4.1.1 Absorber.....	63
4.1.2 Desorber.....	66
4.2 CO ₂ compressor.....	67
4.3 Power plant.....	68
4.4 Implementation in EBSILON®Professional.....	72
4.5 Overall process.....	76
4.5.1 Supply of reboiler heat duty.....	76
4.5.2 Integration.....	79
4.5.3 Cooling system.....	83
5 Energetic evaluation of selected solvents.....	85
5.1 Basis of comparison.....	85
5.1.1 Net efficiency penalty and total power loss.....	86
5.1.2 Reboiler heat duty.....	86
5.2 Solvent characterisation.....	88
5.2.1 Temperature limits.....	88
5.2.2 CO ₂ capacity.....	91
5.2.3 CO ₂ capacity increase by overstripping.....	93
5.3 General impact of CCU on overall process.....	96
5.3.1 Reboiler temperature and steam quantity.....	96
5.3.2 Reboiler temperature and steam quality.....	98
5.3.3 Reboiler temperature, lean loading, and CO ₂ compression.....	100
5.3.4 Summary.....	103
5.4 Limitations of semi-empirical column model.....	104
5.5 Retrofit integration.....	106
5.5.1 Solution flow rate.....	106
5.5.2 Reboiler temperature.....	110
5.5.3 RLHX temperature difference.....	120
5.6 Retrofit integration with increased crossover design pressure.....	127
5.7 Greenfield integration.....	132
6 Conclusions.....	139

References	145
A Annex.....	163
A.1 Summary of key facts.....	163
A.2 CO ₂ loading definition.....	164
A.3 Solvent properties.....	165
A.3.1 CO ₂ solubility.....	165
A.3.2 Heat of absorption	170
A.3.3 Heat capacity	171
A.3.4 Density	174
A.4 Model validation data	176
A.5 Nomograms for graphical CO ₂ capture process evaluation	178
A.6 Additional diagrams	182
